ACKNOWLEDGMENTS

This edition of the *Statistical Abstract* was prepared under the direction of **William Lerner,** Chief, Statistical Compendia Staff, Data User Services Division. **Susan S. Berger** was responsible for general supervision and compilation, assisted by **Minerva K. Moreland** for technical editorial work and **Edward C. Jagers** for graphic content. **Ellen M. Ewell** had primary responsibility for editing and clerical operations.

The cooperation of the many contributors to this volume is gratefully acknowledged. The source note below each table credits the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract.*

In a few instances, contributors have requested that their data be designated as subject to copyright restrictions. The source notes to the tables affected include a copyright notice. Permission to use copyright material should be obtained directly from the copyright owner.

PREFACE

The *Statistical Abstract of the United States,* published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, the Guide to Sources, the section on Publications of Recent Censuses, and the Guide to State Statistical Abstracts.

This volume includes a selection of data from many statistical publications, both governmental and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts than can be presented here. Data not available in publications issued by the contributing agency but obtained from the agency's unpublished tabulations and records are identified in the source notes as "unpublished data." More information on the subjects covered in tables so noted may generally be obtained from the source.

Except as otherwise indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is given primarily to national data, many tables present data for regions and individual States and a smaller number for metropolitan areas and cities. In addition, a broad selection of social and economic items is presented in section 33 for the ten standard Federal regions and their component States and in section 34 for more than 150 large metropolitan areas. Statistics for the Commonwealth of Puerto Rico and for outlying areas of the United States are included in many State tables and are supplemented by information in section 31. Additional information for cities, counties, metropolitan areas, congressional districts, and other small units, as well as more historical data, are available in various supplements to the *Abstract.* (See inside back cover.)

The statistics shown in sections 33 and 34 are also available separately in a reprint, *Statistics for Federal Regions, States, and Metropolitan Areas,* which can be obtained from the Superintendent of Documents, Washington, D.C. 20402. The price per copy is $1.15; a 25 percent discount is allowed on orders of 100 copies or more sent to the same address. Copies can also be purchased at any U.S. Department of Commerce District Office located in certain large cities.

USA Statistics in Brief, 1974, a pocket-size loose insert, is also available separately for 25 cents per copy at the above addresses.

Changes in the 1974 edition.—This edition, the 95th annual issue, presents data for the most recent year or period available by July 1974.

Each year the more than 1,300 tables and charts are reviewed and evaluated. New tables and charts of current interest are added, continuing series are brought up to date, and less timely data are curtailed or eliminated. Text notes are revised as necessary to incorporate new definitions and source references.

Especially noteworthy among the new tables in this year's edition are those on energy and fuels. Ten tables have been introduced; seven to the newly-titled "Energy," formerly "Power," section and three to the "Manufactures" section. The former now includes new material on fuel and energy consumption by consumer group and by household appliances, oil imports by country of origin, exports and imports of selected fuels, peak loads and capabilities of electric utilities, and average electricity use and billing per utility customer. The new tables in the "Manufactures" section present data on fuels and energy used in manufacturing and on shipments and inventories of petroleum and coal products.

Continuing current interest in distribution of income and in minority groups is reflected in seven new tables added to the "Income, Expenditures, and Wealth" section. The new tables relate to family income classified by family characteristics, by race, by low income status, by metropolitan area residence, and for families of Spanish and Mexican origin and persons 65 years old and over. Two other tables in this section show new data on credit card use by income level of users and net worth of top wealth holders.

Altogether there are 66 entirely new tables in this edition, scattered through 23 sections. In addition to the new tables mentioned above, following are some of the other subjects covered by new tables:

Inmates of institutions, p. 45
Newly-licensed and foreign physicians, p. 76
Nursing and related care homes, p. 81
Characteristics of the blind, p. 86
Days lost from school, p. 129
Violent crimes in cities, p. 149
Pre-retirement age characteristics, p. 280
Job vacancies in manufacturing, p. 344
Residential heating gas prices, p. 419
Congressional incumbents reelected, p. 433
Election campaign costs for national offices, p. 442
Activities of fire departments, p. 472
U.S. multinational companies, p. 487
Sales and profits for petroleum and coal products, p. 489
Commercial broadcast stations affiliated with newspapers, p. 505
Railroads controlled by conglomerates, p. 572
Salt-water sport fishing, p. 649
Prices of new one-family houses sold, p. 695
Mortgage status of homeowner properties, p. 706
Suicide rates for selected countries, p. 818

In addition, many of the sections have undergone tabular rearrangement and format changes designed to improve the organization of subject matter.

Of the tables included in the 1973 edition, 32 were omitted from this issue. The omissions represent primarily tables for which comparable details appear in the new or retained tables or for which no recent data are available.

In an attempt to improve the timeliness of data received from certain of the contributing sources, the following changes have occurred in the location of sections 8 through 15. Sections 14 and 15, Federal Government Finances and Employment and State and Local Government Finances and Employment, are now respectively, sections 8 and 9. Section 10 remains as Social Insurance and Welfare Services. Section 11 has become National Defense and Veterans Affairs, formerly section 9. Labor Force, Employment, and Earnings, formerly section 8, is now section 12. Former sections 11, 12, and 13 are now 13, 14, and 15. See the table of contents, pp. vi and vii.

The weights and measures table, formerly shown as Appendix I following section 34, now appears on pp. x and xi. This change was induced by increasing public interest in the use of metric system units. A related change is the introduction of metric units in several land area tables (sections 6 and 7) and in international tables (section 32).

Responsibility.—The contents of this volume were taken from a large number of sources. The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

SUGGESTIONS AND COMMENTS

Many persons have offered suggestions for improving the presentation of data in the *Statistical Abstract* and its supplements. Their comments have been most helpful. Users of these publications are urged to continue to make their needs known for consideration in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington, D.C. 20233.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

Please consult the source publications available in local libraries or write to the agencies indicated in the source notes to the tables covering the desired subject. Write to the Bureau of the Census only if it is cited as the source.

See Guide to Tabular Presentation, p. xii, for definition of median.

Grams (g)	×	.04	=	ounces(avdp)
Kilograms (kg)	×	2.2	=	pounds(avdp)
Kilowatts (kw)	×	1.3	=	horsepower
Degrees Celsius	×	9/5+32	=	degrees Fahrenheit

Units of Length

U.S.			to	Metric
Inch (in)			=	25.4 millimeters
Foot (ft)	=	12 in	=	0.305 meter
Yard (yd)	=	36 in or 3 ft	=	0.914 meter
Rod (rd)	=	16½ ft or 5½ yd	=	5.029 meters
Furlong (fur)	=	660 ft or 220 yd or 40 rd	=	201.168 meters
Mile (mi)	=	5,280 ft or 1,760 yd or 320 rd	=	1.609 kilometers

Metric			to	U.S.
Millimeter (mm)	=	.001 meter	=	0.039 inch
Centimeter (cm)	=	.01 meter	=	0.394 inch
Decimeter (dm)	=	.1 meter	=	3.937 inches
Meter (m)			=	3.281 feet
Dekameter (dam)	=	10 meters	=	32.808 feet
Hectometer (hm)	=	100 meters	=	328.083 feet
Kilometer (km)	=	1,000 meters	=	0.621 mile

Units of Area

U.S.			to	Metric
in^2 (sq in)			=	6.452 cm^2
ft^2 (sq ft)	=	144 sq in	=	0.093 m^2
yd^2 (sq yd)	=	1,296 sq in or 9 sq ft	=	0.836 m^2
rod^2 (sq rd)	=	272¼ sq ft or 30¼ sq yd	=	25.293 m^2
Acre	=	43,560 sq ft or 4,840 sq yd or 160 sq rd	=	0.405 ha
$mile^2$ (sq mi)	=	27,878,400 sq ft or 3,097,600 sq yd or 102,400 sq rd or 640 acres	=	2.59 km^2

Metric			to	U.S.
Sq millimeter (mm^2)	=	.000001 m^2	=	0.002 sq in
Sq centimeter (cm^2)	=	.0001 m^2	=	0.155 sq in
Sq decimeter (dm^2)	=	.01 m^2	=	15.5 sq in
Sq meter (m^2) or centare (ca)			=	10.764 sq ft
Sq dekameter (dam^2) or acre (a)	=	100 m^2	=	3.954 sq rd
Sq hectometer (hm^2) or hectare (ha)	=	10,000 m^2	=	2.471 acres
Sq kilometer (km^2)	=	1,000,000 m^2	=	0.386 sq mi

Units of Volume

U.S.			to	Metric
in^3 (cu in)			=	16.387 cm^3
ft^3 (cu ft)	=	1,728 cu in	=	0.028 m^3
yd^3 (cu yd)	=	46,656 cu in or 27 cu ft	=	0.765 m^3
Cord (cd)	=	128 cu ft	=	3.625 m^3

Metric			to	U.S.
Cu millimeter (mm^3)	=	.000000001 m^3	=	0.00006 cu in
Cu centimeter (cm^3)	=	.000001 m^3	=	0.061 cu in
Cu decimeter (dm^3)	=	.001 m^3	=	61.023 cu in
Cu meter (m^3) or stere (s)			=	35.315 cu ft

Weights and Measures

Units of Weight (or Mass)

U.S.		to	Metric
Avoirdupois Weight [1]			
Grain		=	0.065 gram
Dram (dr avdp)	= 27.343 grains	=	1.772 grams
Ounce (oz avdp)	= 16 drams or 437.5 grains	=	28.350 grams
Pound (lb avdp)	= 7,000 grains or 256 drams or 16 ounces	=	0.454 kilogram
Hundredweight (cwt)	= 100 pounds	=	45.359 kg
Ton, short (tn)	= 2,000 pounds	=	0.907 metric ton
Ton, long	= 2,240 pounds	=	1.016 metric ton
Troy Weight [2]			
Grain		=	0.065 gram
Pennyweight (dwt)	= 24 grains	=	1.555 grams
Ounce (oz t) [3]	= 480 grains or 20 dwt	=	31.104 grams
Pound (lb t)	= 5,760 grains or 12 ounces	=	0.373 kilograms

Metric		to	U.S.
Milligram (mg)	= .001 g	=	0.015 grain, avdp/t
Centigram (cg)	= .01 g	=	0.154 grain, avdp/t
Decigram (dg)	= .1 g	=	1.543 grains, avdp/t
Gram (g)		=	0.035 oz avdp
Dekagram (dag)	= 10 g	=	0.353 oz avdp or 0.322 oz troy
Hectogram (hg)	= 100 g	=	3.527 oz avdp or 3.215 oz troy
Kilogram (kg)	= 1,000 g	=	2.205 lb avdp or 2.679 lb troy
Metric ton	= 1,000 kg	=	1.102 short tons or 0.984 long tons

[1] Used for weighing ordinary commodities.
[2] Used for weighing precious metals, jewels, etc.
[3] Also known as fine ounces.

Units of Capacity

Liquid

U.S.		to	Metric
Minim (min)		=	0.062 ml
Fluid dram (fl dr)	= 60 min	=	3.697 ml
Fluid ounce (fl oz)	= 8 fl dr	=	29.573 ml
Gill (gi)	= 32 fl dr or 4 fl oz	=	118.292 ml
Pint (pt)	= 16 fl oz or 4 gi	=	0.473 liter
Quart (qt)	= 32 fl oz or 2 pt	=	0.946 liter
Gallon (gal)	= 8 pt or 4 qt	=	3.785 liters

Dry

U.S.		to	Metric
Pint (pt)		=	.551 dm^3
Quart (qt)	= 2 pints	=	1.101 dm^3
Peck (pk)	= 16 pints or 8 quarts	=	8.810 dm^3
Bushel (bu)	= 64 pints or 32 quarts or 4 pecks	=	35.238 dm^3

Metric		to	U.S.		
Millimeter (ml)	= .001 liter	=	0.034 fl oz (liquid)	=	0.002 pt (dry)
Centiliter (cl)	= .01 liter	=	0.338 fl oz (liquid)	=	0.018 pt (dry)
Deciliter (dl)	= .1 liter	=	3.382 fl oz (liquid)	=	0.182 pt (dry)
Liter (l) [1]		=	1.057 qt (liquid)	=	0.908 qt (dry)
Dekaliter (dkl)	= 10 liters	=	2.642 gal (liquid)	=	1.135 pk (dry)
Hectoliter (hl)	= 100 liters	=	26.418 gal (liquid)	=	2.838 bu (dry)

[1] Defined as 1.000028 cubic decimeters.

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.

B Base figure too small to meet statistical standards for reliability of derived figure.

D Figure withheld to avoid disclosure of information pertaining to a specific organization or individual.

NA Data not enumerated, tabulated, or otherwise available separately.

NS Percent change irrelevant or insignificant.

S Figure does not meet publication standards for reasons other than that covered by symbol B, above.

X Figure not applicable because column heading and stub line make an entry impossible, absurd, or meaningless.

Z Entry would amount to less than half the unit of measure shown.

Headnotes immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

Footnotes below the bottom rule of tables give information relating to specific items or figures within the table.

Unit indicators ("In thousands," "In millions of dollars," etc.) are usually given in boldface type as the first element of the headnote. In tables where several units are used, the unit indicators are generally given in the stub or in the column headings.

Median: The value which divides the distribution into two equal parts—one-half the cases falling below this value and one-half exceeding it.

Parallel vertical rules are used to the right of a total column to indicate—

(1) that the components which follow add to the total (e.g., tables 1, 3, 20, etc.);

(2) in the case of derived figures, that the underlying data are additive to their total (e.g., table 20 for percentages, table 26 for ratios, table 71 for rates, and table 114 for averages).

Heavy vertical rules are used—

(1) in tables where the stub (the area, date, or descriptive column at the left) is continued into one or more additional columns across the table to separate each segment of stub and its accompanying data columns from the continued segments (e.g., tables 2, 5, 10, etc.);

(2) to set off independent sections of a table (e.g., tables 1, 4, 7, etc.).

In many tables, details will not add to the totals shown because of rounding.

RECENT TRENDS

General Note: Average annual percent changes for items in this table were computed using the compound interest rate formula. Absolute values or values with less rouding than appear here were used in the computations.

The source table cited for each item generally provides more complete information and notations concerning the item. In a number of instances, figures in this table represent revisions and supersede figures shown elsewhere in this volume.

Standard Notes: — Represents zero. na Not available. ns Percent change not relevant or significant. x Not applicable. z Less than 0.05 percent.

[1] Where na occurs in 1973 column only, percent change calculated refers to 1970-72 period, except as noted.
[2] As of July 1, except as noted and except births, deaths, marriages, and divorces which are totals for entire year; Resident population excludes Armed Forces abroad, except as noted.
[3] 1960 and 1970 data as of April 1.
[4] 1960-70.
[5] For 1960, 14 years old and over; thereafter, 18 years old and over.
[6] As of March. Excludes Armed Forces living in barracks in U.S., therefore will not add to total resident population.
[7] 1969. [8] 1971. [9] 1965-69. [10] 1969-71.

Section 1

Population

This section presents statistics on the growth, distribution, and characteristics of the population of the United States. The principal source of these data is the Bureau of the Census, which conducts a decennial census of the population and a monthly current population survey and also prepares periodic population estimates. For a list of publications, see the Guide to Sources in Appendix III of this book.

Decennial censuses.—The Constitution provides for a census of population within every 10-year period, primarily to establish a basis for apportionment of Members of the House of Representatives among the States. For over a century after the first census in 1790, the census organization was a temporary one. In 1902, the Bureau of the Census was established as a permanent Federal agency, responsible for enumerating the population and also for compiling statistics on other subjects and at other times.

In population censuses, each person is counted as an inhabitant of his usual place of residence. While this place is not necessarily his legal residence, voting residence, or domicile, the use of these different bases of classification would usually produce substantially the same statistics.

In recent censuses, some data were obtained from representative samples of the population rather than from a complete count, as follows: 5 percent in 1940, 20 percent in 1950, 25 percent in 1960, and 5, 15, and 20 percent in 1970. Exact agreement is not to be expected among the various samples, nor between them and the complete count, but sample data may be used with confidence where large numbers are involved and assumed to indicate patterns and relationships where small numbers are involved.

Estimates based on evaluation studies of the 1970 census results indicate a total net underenumeration of about 5.3 million persons, compared with 5.1 million in 1960. Among the persons who were not counted in 1970, about 3.4 million were white and about 1.9 million were Negro. The overall rate of net underenumeration in 1970 was about 2.5 percent, compared with 2.7 percent in 1960 and 3.3 percent in 1950. Data from the 1950, 1960, and 1970 censuses have not been adjusted for the estimated underenumeration.

Current Population Survey.—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutional civilian population. The sample is located in 449 areas comprising 863 counties and independent cities with coverage in every State and the District of Columbia. About 58,500 housing units and other quarters are designated for the sample at any time, of which about 50,000 (containing 105,000 persons 16 years old and over) are occupied by households eligible for interview; of these, in turn, about 4 to 6 percent are, for various reasons, unavailable for interview. See also text, section 12, Labor Force, Employment, and Earnings.

Population estimates and projections.—National estimates are derived by use of decennial census data as benchmarks and of data available from various agencies as follows: Births and deaths (Public Health Service); immigrants (Immigration and Naturalization Service); the Armed Forces (Department of Defense); net movement between Puerto Rico and the U.S. mainland (Puerto Rico Planning Board); and Federal employees abroad (Civil Service Commission and Department of Defense). State estimates are based on similar data and also on a variety of data series, including school statistics from State departments of education and parochial school systems.

National population projections indicate the approximate future level and characteristics of the population under given assumptions as to future fertility, mortality,

and net immigration. The method used to develop the projections involved preparation of projections of each of the components of population change—births, deaths, and net immigration—and the combination of these with July 1 estimates of the current population. Projections for States and metropolitan areas incorporate further assumptions about population redistribution through interarea migration.

Current estimates and projections are consistent with official census figures and are not adjusted for estimated census underenumeration. For details on methodology, see the source cited below individual tables.

Standard Metropolitan Statistical Areas (SMSA).—SMSA's are defined for Federal interagency use by the Office of Management and Budget. Based on these OMB definitions, the entire territory of the United States may be classified as (*a*) metropolitan (inside SMSA's); or (*b*) nonmetropolitan (outside SMSA's). For descriptive details and tables showing changes in definitions for various years, see the introductory text to section 34 of this book. A listing of area titles and components of each SMSA is given at the end of section 34.

Urban and rural areas.—According to the 1970 census definition, the urban population comprises all persons in (*a*) places of 2,500 inhabitants or more incorporated as cities, villages, boroughs (except Alaska), and towns (except in New England, New York, and Wisconsin), but excluding persons living in the rural portions of extended cities; (*b*) unincorporated places of 2,500 inhabitants or more; and (*c*) other territory, incorporated or unincorporated, included in urbanized areas. An urbanized area consists of a central city, or twin cities, with a total of 50,000 inhabitants or more, together with contiguous closely settled territory (urban fringe). Certain incorporated places are designated as "extended cities" because they have one or more large portions with relatively low population density. These portions are classified as rural.

In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more, and certain areas (usually minor civil divisions) classified as urban under special rules relating to population size and density. This "previous urban definition" was replaced in 1950 by the current urban definition. Substantially the same definition was used in the 1950 and 1970 censuses except for the introduction of the "extended cities" concept in the latter. In 1960 (but not in 1970) certain towns in New England, townships in New Jersey and Pennsylvania, and Arlington County, Va., were also designated as urban places. In all definitions, the population not classified as urban constitutes the rural population.

Farm and nonfarm residence.—The rural population is divided into "rural-farm," comprising persons living on farms, and "rural-nonfarm," comprising the remainder. According to the 1960 and 1970 census definitions, the farm population consists of persons living in rural areas on places of less than 10 acres yielding agricultural products which sold for $250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for $50 or more in the previous year.

Race.—The population is divided into three major groups on the basis of race: White, Negro, and other. The 1960 and 1970 censuses obtained the information on race principally through self-enumeration; thus, the data represent essentially self-classification by people according to the race with which they identify themselves. Persons of Mexican or Puerto Rican birth or ancestry who did not identify themselves as of a race other than white were classified as white. In 1970, the father's race was used for persons of mixed parentage who were in doubt as to their classification. In 1960, persons who reported mixed parentage of white and any other race were classified according to the other race; mixtures of races other than white were classified according to the father's race.

Mobility status.—Classification of the population by mobility status is based on comparison of an individual's place of residence at the survey or census date with that of a specified earlier date. *Nonmovers* includes all persons living in the same house in the United States at the beginning and end of the period. *Movers* includes all persons living in a different house in the United States at the beginning and at the end of the period. *Migrants* includes all persons who were living in a different county in the United States at the beginning and at the end of the period, and are classified according to whether they moved within the same State or into a different State. *Persons abroad* includes all persons living outside the United States at the beginning of the period.

Nativity.—The category "Native" comprises persons born in the United States, the Commonwealth of Puerto Rico, an outlying area of the United States, or at sea. It also includes persons born in a foreign country who have at least one parent born in the United States. Persons not having any of the foregoing qualifications are classified as "foreign born."

Ethnic Origin.—"Ethnic origin" is determined on the basis of a question asking for self-identification of the person's origin or descent and is, therefore, a report on what persons perceive their origin to be. A question on ethnic origin was included in the Current Population Surveys for 1969, 1971, 1972, and 1973. The answers to this question produce results somewhat different from those based on inferences from such characteristics as place of birth, country of origin, language spoken in the home, or surname. 1973 CPS data for persons of Spanish origin are not comparable with earlier years, due to (1) redesign of survey sample reflecting new information available from the 1970 census; (2) change in allocation rules for children under 14 years old; and (3) change in the number of Mexican origin categories.

Household.—A "household" comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household. See text, section 27, Construction and Housing, for definition of "housing unit."

Group quarters are living arrangements for persons who do not live in housing units. Examples of group quarters are: A rooming house, an institution, a college dormitory, or a military barracks.

Family.—The term "family" refers to a group of two or more persons related by blood, marriage, or adoption and residing together in a household. A primary family consists of the head of a household and all other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household and related to each other.

Subfamily.—A "subfamily" is a married couple with or without children, or one parent with one or more unmarried children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with whom they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A "married couple" is defined as a husband and his wife living together in the same household, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with nonrelatives only. A secondary individual in a household is a person such as a guest, lodger, or resident employee who is not related to any other person in the household. Persons in group quarters, except inmates of institutions, are classified as secondary individuals.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. II. UNITED STATES POPULATION—PROJECTIONS TO 2000

[See table 3]

No. 3. Estimated and Projected Population, by Age and Sex, 1950 to 2000, and Zero Growth Projection, 1980 to 2050

[**In thousands, except percent.** As of July 1. Includes Armed Forces abroad. Projections are consistent with the April 1, 1970 census. These projections were prepared using the "cohort-component" method. Series C, D, E, and F assume a slight improvement in mortality, an annual net immigration of 400,000 and completed cohort fertility rates (i.e., average number of births per 1,000 women upon completion of childbearing) that move toward the following levels: C–2,800; D–2,500; E–2,100; F–1,800. Series X assumes no net immigration and "replacement level" fertility beginning immediately (i.e., an annual total fertility rate of 2,100) and continuing indefinitely (i.e., a completed cohort fertility rate of 2,100). Replacement level fertility is the level at which the population would exactly replace itself in the absence of net immigration. See p. 1 for derivation of estimates and projections]

X Not applicable.

[1] Series X, which would reach zero growth around the middle of the twenty-first century at 277 million, is one of the many possible approaches to zero growth. The immediate cessation of net immigration, combined with replacement level fertility would not lead to immediate zero growth because the United States has a relatively young age structure (due to the post-World War II baby boom) which provides momentum for continued growth. Zero growth in 1974 (assuming no dramatic change in mortality) would require an annual total fertility rate of about 1,000 with net immigration at the current level, or about 1,200 with no net immigration. The total fertility rate in 1973 was about 1,900.

[1] See footnote 3, table 1.

[2] Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

[3] Includes population of Corn Islands (1950, 1,304; 1960, 1,872) not shown separately. Lease of Corn Islands from Republic of Nicaragua was terminated in 1971. Area total excludes area of these islands (4 square miles).

[4] Enderbury Island uninhabited in 1950 and 1960; Canton and Enderbury in 1970.

[5] Sand Island uninhabited at time of enumeration.

[6] Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (3 square miles), and Palmyra (4 square miles); uninhabited at time of enumeration.

[7] Under jurisdiction of the United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[8] Administered by United States since July 18, 1947, under United Nations Trusteeship system.

[9] Estimated civilian population as of June 30, 1950.

[10] Census of 1958 conducted by the Office of the High Commissioner, Trust Territory of the Pacific Islands.

[11] Comprises 717 square miles of land area and 7,772 square miles of water area.

[12] Excludes U.S. citizens temporarily abroad on private business, travel, etc. Such persons were enumerated at their usual place of residence in the United States as absent members of their own households.

[13] Based on 20-percent sample of reports received.

[14] Based partially on tabulations provided by Dept. of Defense.

[15] Represents U.S. citizens abroad for extended periods. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

No. 8. State Centers of Population: 1970

[See headnote, table 6]

STATE	Latitude			Longitude			Approximate location
	°	′	″	°	′	″	
Alabama	32	59	28	86	46	39	In Chilton County, 13 miles northwest of Clanton.
Alaska	61	08	24	148	58	47	In Anchorage Census Division, 35 miles southeast of Anchorage.
Arizona	33	17	09	111	41	15	In Maricopa County, 25 miles southeast of Phoenix.
Arkansas	34	54	52	92	21	05	In Pulaski County, 12 miles north-northwest of Little Rock.
California	35	28	03	119	28	31	In Kern County, 27 miles west-northwest of Bakersfield.
Colorado	39	26	37	105	07	36	In Jefferson County, 21 miles south-southwest of Denver.
Connecticut	41	29	17	72	52	38	In Cheshire town, New Haven County, 5 miles southwest of Meriden.
Delaware	39	28	44	75	33	33	In New Castle County, in the Delaware River, 19 miles south of Wilmington.
District of Columbia	38	54	22	77	00	29	1.2 miles north-northeast of the Capitol.
Florida	27	51	49	81	43	32	In Polk County, 7 miles east-southeast of Bartow.
Georgia	33	08	52	83	48	13	In Jasper County, 10 miles northeast of Forsyth.
Hawaii	21	13	38	157	39	20	In Honolulu County, in Kaiwi Channel, 4 miles southeast of Koko Head.
Idaho	44	12	00	114	49	57	In Custer County, 6 miles east of Stanley.
Illinois	41	13	03	88	23	12	In Grundy County, 12 miles south of Morris.
Indiana	40	11	48	86	17	30	In Clinton County, 13 miles southeast of Frankfort.
Iowa	41	59	46	93	05	14	In Marshall County, 10 miles southwest of Marshalltown.
Kansas	38	27	39	96	39	46	In Chase County, 16 miles southwest of Council Grove.
Kentucky	37	48	54	85	16	57	In Washington County, 10 miles east of Bardstown.
Louisiana	30	43	44	91	28	41	In West Feliciana Parish, 28 miles northwest of Baton Rouge.
Maine	44	26	57	69	37	20	In Vassalborough town, Kennebec County, 7 miles south of Waterville.
Maryland	39	09	51	76	47	11	In Howard County, 7 miles south of Ellicott City.
Massachusetts	42	17	26	71	23	40	In Framingham town, Middlesex County, 2 miles west-northwest of Natick.
Michigan	42	48	21	84	02	58	In Shiawassee County, 20 miles southwest of Flint.
Minnesota	45	14	12	93	39	01	In Wright County, 25 miles northwest of Minneapolis.
Mississippi	32	36	57	89	39	18	In Leake County, 3 miles west-northwest of Lena.
Missouri	38	31	27	92	01	36	In the Osage River, on the Osage County-Cole County line, 8 miles east-southeast of Jefferson City.
Montana	46	53	52	110	49	30	In Meagher County, 5 miles west-southwest of Neihart.
Nebraska	41	11	49	97	32	49	In Polk County, within the city of Osceola.
Nevada	37	38	16	116	45	08	In Nye County, 40 miles south-southeast of Tonopah.
New Hampshire	43	11	35	71	28	45	In Pembroke town, Merrimack County, 3 miles east of Concord.
New Jersey	40	29	45	74	24	04	In Edison township, Middlesex County, 1 mile east of Highland Park.
New Mexico	34	34	45	106	06	53	In Torrance County, 10 miles northeast of Mountainair.
New York	41	30	49	74	43	02	In Forestburgh town, Sullivan County, 9.5 miles south of Monticello.
North Carolina	35	34	28	79	40	12	In Randolph County, 11 miles south-southeast of Asheboro.
North Dakota	47	27	48	99	30	57	In Wells County, 8.5 miles east of Bowdon.
Ohio	40	32	42	82	40	45	In Morrow County, 18 miles south-southwest of Mansfield.
Oklahoma	35	35	02	96	56	20	In Lincoln County, 8 miles south-southwest of Chandler.
Oregon	44	44	33	122	33	10	In Linn County, 28 miles southeast of Salem.
Pennsylvania	40	27	17	77	11	59	In Centre township, Perry County, 3 miles north of Bloomfield.
Rhode Island	41	45	39	71	26	02	In Cranston City, Providence County, 1.25 miles south of Cranston city hall.
South Carolina	34	03	35	81	02	55	In Richland County, 5 miles north of Columbia.
South Dakota	44	08	29	98	57	55	In Buffalo County, 20 miles west-northwest of Wessington Springs.
Tennessee	35	45	45	86	30	06	In Rutherford County, 8 miles southwest of Murfreesboro.
Texas	31	04	52	97	31	30	In Bell County, 11 miles west of Temple.
Utah	40	33	51	111	49	43	In Salt Lake County, 7 miles south of Holladay.
Vermont	44	02	45	72	48	24	In Granville town, Addison County, 19 miles southwest of Montpelier.
Virginia	37	36	20	77	58	35	In Powhatan County, 30 miles west-northwest of Richmond.
Washington	47	21	10	121	31	57	In King County, 15.5 miles southeast of North Bend.
West Virginia	38	43	44	80	58	42	In Gilmer County, 16 miles south-southwest of Glenville.
Wisconsin	43	40	56	88	55	04	In Mackford town, Green Lake County, 4 miles southeast of Markesan.
Wyoming	42	40	09	106	46	59	In Natrona County, 26 miles west-southwest of Casper.

1965	2,315	1.2	3,801	1,830	373	11.9	10.1	19.6	9.4	1.9	96.6
1967	2,072	1.1	3,555	1,861	414	10.4	8.5	17.9	9.4	2.1	87.6
1968	1,952	1.0	3,535	1,948	398	9.7	7.9	17.6	9.7	2.0	85.7
1969	2,089	1.0	3,605	1,934	453	10.3	8.2	17.8	9.5	2.2	86.5
1970	2,223	1.1	3,725	1,926	438	10.9	8.8	18.2	9.4	2.1	87.9
1971	2,017	1.0	3,559	1,924	387	9.8	7.9	17.2	9.3	1.9	81.9
1972	1,615	0.8	3,256	1,964	325	7.7	6.2	15.6	9.4	1.6	73.3
1973	1,505	0.7	3,141	1,978	344	7.2	5.5	14.9	9.4	1.6	69.3
Annual average change											
1935–1939	915	0.7	2,421	1,447	29	7.1	7.5	18.8	11.2	0.2	77.4
1940–1944	1,543	1.1	2,872	1,468	114	11.4	10.4	21.2	10.8	0.8	87.6
1945–1949	2,274	1.6	3,491	1,464	231	15.7	14.0	24.1	10.1	1.6	103.1
1950–1954	2,690	1.7	3,903	1,500	285	17.1	15.2	24.8	9.5	1.8	113.2
1955–1959	2,960	1.7	4,259	1,614	316	17.2	15.4	24.8	9.4	1.8	120.7
1960–1964	2,767	1.5	4,210	1,757	346	14.9	13.2	22.6	9.4	1.9	113.2
1965–1969	2,125	1.1	3,628	1,888	419	10.7	8.7	18.3	9.5	2.1	89.8
1960–1970	2,426	1.3	3,901	1,832	387	12.6	10.8	20.2	9.5	2.0	100.2
1970–1973	1,840	0.9	3,420	1,948	374	8.9	7.1	16.5	9.4	1.8	77.9

Z Less than 0.05 percent.

[1] For 1940–1972, includes admissions into and discharges from Armed Forces abroad. Through 1970, includes "error of closure" (the amount necessary to make the components of change add to the net change between censuses), for which figures are not shown separately. [2] Percent of population as of Jan. 1. [3] Adjusted for underregistration prior to April 1, 1970. [4] Prior to April 1, 1960, adjusted for underregistration of infant deaths. [5] Annual births per 1,000 resident females 15 to 44 years of age.

Source: U.S. Bureau of the Census, *Current Population Reports*, series P-25, No. 521.

No. 10. Estimated and Projected Total Fertility Rates: 1960 to 2005

[Represents the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified calendar year. Rates differ slightly from those published by the National Center for Health Statistics. They are the sum of single year of age central birth rates which are based on births adjusted for underregistration and numbers of females adjusted for net census undercount. The rates for 1970 and 1971 were estimated on the basis of vital statistics data from selected States. For brief statement of assumptions, see headnote, table 3]

Year	Series				Year	Series			
	C	D	E	F		C	D	E	F
Estimates:					Projections—Con.				
1960	3,655				1975	2,395	2,258	1,943	1,806
1965	2,922				1980	2,622	2,400	2,043	1,819
1970	2,428				1985	2,755	2,482	2,096	1,822
1971	2,252				1990	2,797	2,504	2,107	1,813
Projections:					1995	2,802	2,503	2,103	1,804
1972	2,150	2,100	2,000	1,950	2000	2,800	2,501	2,101	1,801
1973	2,300	2,200	1,900	1,800	2005 and later	2,800	2,500	2,100	1,800
1974	2,347	2,229	1,922	1,803

No. 14. Population Projections—States: 1980 and 1990

[In thousands. As of July 1. Preliminary. Roman numerals indicate interstate migration assumptions. Series I assumes 1960–1970 migration patterns will continue. Series III assumes no net interstate migration. Letters C and E represent national population projection series in *Current Population Reports*, series P–25, No. 470. See source for detailed explanation]

No. 17. Urban and Rural Places and Population, by Size of Place: 1910 to 1970

["Previous urban definition" refers to the definition used prior to 1950 when a number of large and densely settled places were not included as urban because they were not incorporated. In 1950, the Bureau of the Census adopted the concept of the urbanized area and delineated boundaries for unincorporated places, making possible the recognition of territory as urban, irrespective of its corporate status. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition. See also *Historical Statistics, Colonial Times to 1957*, series A 181–209]

CLASS AND SIZE	PREVIOUS URBAN DEFINITION					CURRENT URBAN DEFINITION		
	1910	1920	1930	1940	1950	1950	1960	1970

[1] In 1940 and later censuses, Bluefield, Va., and Bluefield, W. Va.; Bristol, Tenn., and Bristol, Va.; Delmar, Del., and Delmar, Md.; Harrison, Ohio, and West Harrison, Ind.; Junction City, Ark., and Junction City, La.; Texarkana, Ark., and Texarkana, Tex.; Texhoma, Okla., and Texhoma, Tex.; and Union City, Ind., and Union City, Ohio, were counted as separate incorporated places, whereas in 1910, 1920, and 1930, each pair was counted as a single place.

No. 19. Land Area, Population, and Density of Urban and Rural Territory, by Metropolitan and Nonmetropolitan Status: 1960 and 1970

[Areas, as defined for the 1960 and 1970 censuses, respectively. Changes in land area between the censuses reflect (a) changes in the extent of urban territory and of Standard Metropolitan Statistical Area (SMSA's) and (b) alterations resulting from remeasurement of land areas, including changes in the extent of inland water area]

No. 22. Large Metropolitan Areas—Population, 1960 to 1972

[**In thousands, except as indicated.** Covers 131 large SMSA's, as defined in *Standard Metropolitan Statistical Areas*, 1967 (as amended up to April 5, 1974) as issued by the Executive Office of the President, Office of Management and Budget. For New England, data refer to metropolitan State economic areas (SEA). Figures for 1970 include corrections as shown in U.S. Bureau of the Census, *Census of Population; 1970*, Vol. 1 *Characteristics of the Population*, Part 1, *United States Summary*. Change measured from April 1, 1960 to April 1, 1970 and from April 1, 1970 to July 1, 1972; minus sign (−) indicates decrease. Rank based on unrounded figures. For more detailed data on large SMSA's and for definitions and components of SMSA's and SEA's, see section 31]

No. 28. Components of Population Change, by Race, Between 1960 and 1970

[In thousands, except as indicated. Total population, including Armed Forces abroad; growth, birth, and death rates per 1,000 population estimated as of July 1]

ITEM	Total	White	Other races
Population:			
1960	180,007	159,467	20,540
1970	204,335	179,065	25,270
APR. 1, 1960 to APR. 1, 1970			
Components of change:			
Net increase	24,328	19,598	4,729
Births [1]	39,033	32,512	6,521
Deaths [2]	18,263	16,035	2,228
Net immigration [3]	3,557	3,121	436
Percent of 1960 population:			
Net increase	13.5	12.3	23.0
Births [1]	21.7	20.4	31.7
Deaths [2]	10.1	10.1	10.8
Net immigration [3]	2.0	2.0	2.1
1960 (calendar year):			
Net growth rate	16.1	15.1	23.8
Birth and death rates:			
Births [1]	23.8	22.7	33.0
Deaths [2]	9.5	9.4	10.0
General fertility rate [4]	118.0	113.2	153.6
1970 (calendar year): [5]			
Net growth rate	10.9	9.5	20.2
Birth and death rates:			
Births [1]	18.2	17.2	25.3
Deaths [2]	9.4	9.4	9.3
General fertility rate [4]	87.9	84.1	113.0

[1] Adjusted for underregistration. [2] Includes deaths in the Armed Forces abroad. [3] Includes changes due to admissions into, and discharges from, Armed Forces abroad, amounting to 11,000 for the total population, and "error of closure" (the amount necessary to make the components of change add to the net change between censuses). [4] Births per 1,000 resident females aged 15 to 44 as of July 1. [5] Preliminary.

No. 50. Households, by Population Per Household and Race of Head: 1900 to 1973

[Prior to 1960, excludes Alaska and Hawaii. Data for 1900–1970 are for census dates; see table 1. For definition of household, see text, p. 3. See also *Historical Statistics, Colonial Times to 1957*, series A 242 and A 255–263]

Item	1900 (June)	1910 (Apr.)	1920 (Jan.)	1930 (Apr.)	1940 (Apr.)	1950 (Apr.)	1960 (Apr.)	1970 (Apr.)	1973 (Mar.)
All households, 1,000	15,964	[1] 20,256	[1] 24,352	29,905	34,949	42,857	53,021	63,450	68,251
Average annual change since prior year shown, 1,000	(X)	434	418	542	504	791	1,016	1,043	1,646
Percent [2]	(X)	2.44	1.90	2.02	1.56	2.06	2.15	1.80	2.50
Population per household [3]	4.76	4.54	4.34	4.11	3.77	3.52	3.38	3.20	3.01
White households, 1,000	14,064	[4] 18,002	21,826	26,983	31,680	[5] 39,044	47,868	56,529	60,618
Percent	88.1	88.9	89.6	90.2	90.6	91.2	90.3	89.1	88.8
Negro households, 1,000	1,834	2,173	2,431	2,804	3,142	[5] 3,633	5,153	6,180	6,809
Other households, 1,000	66	[4] 81	95	118	127	[5] 149		741	824

X Not applicable. [1] Includes small number of hotels, institutions, and other group quarters. [2] Computed by compound interest formula. [3] Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of group quarters. [4] Estimated. [5] Population in occupied housing units.

No. 51. Households, Families, and Individuals—Projections: 1975 to 1990

[**In thousands.** As of July 1. Includes members of the Armed Forces living off post or with their families on post, but excludes all other members of the Armed Forces. Series 1 assumes that the annual change in the proportions of the evermarried and single population who are heads of households or families will be the same as from 1957 to 1969, in general. Series 2 assumes that rates of change in the proportions of the evermarried and single population who are heads of households or families will be one-half those for Series 1. For additional explanation, see source]

No. 64. Religious Bodies—Selected Data

[Represents latest information available from religious bodies with memberships of 50,000 or more; excludes a few groups giving no data. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and The Episcopal Church now report all baptized persons, and not only those confirmed. Data which appear in italics are "noncurrent," i.e., they are reported for 1971 or earlier. All other data are "current" and were reported in 1972 or 1973]

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental illness, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the National Center for Health Statistics in the annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *Monthly Vital Statistics Report*. Reports in this field are also issued by State bureaus of vital statistics. Current data on fertility of the population and on age of persons at first marriage are compiled by the Bureau of the Census from its Current Population Survey (see text, p. 1) and published in *Current Population Reports*, series P–20.

Births and deaths.—The collection of death statistics on an annual basis began in 1900 with 10 registration States and the District of Columbia; the collection of birth statistics began in 1915, also with 10 States and the District of Columbia. The changing composition of the two registration areas[1] makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. Beginning 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Before 1946, vital statistics for the United States were compiled by the Bureau of the Census. From 1946 until 1960 this function was located in the Bureau of State Services of the Public Health Service. In 1960 it became a part of the National Center for Health Statistics, now located in the Health Resources Administration, Public Health Service, Department of Health, Education, and Welfare.

Prior to 1951, birth statistics were the result of a complete count of the records received in the Public Health Service (now in the National Center for Health Statistics). Since 1951, they have been based on a 50-percent sample of all registered births (except for 1955 when they reverted to a complete count and for 1967 when they were based on a 20–50 percent sample). Current provisional death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) and deaths among Armed Forces abroad are excluded.

Mortality statistics are compiled in accordance with World Health Organization regulations, which specify that member nations classify causes of death according to the *International Statistical Classification of Diseases, Injuries, and Causes of Death*. The current classification, "Eighth Revision International Classification of Diseases, Adapted for Use in The United States," has been used beginning with 1968.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for various years from 1867 to 1940 and for each year since 1944. Estimates have been made for intervening years and for years in which collections were not complete. A marriage-registration area was established by the Public Health Service in 1957, and a divorce-registration area in 1958. At the beginning of 1973, the marriage-registration area covered 41 States, the District of Columbia, Puerto Rico, and the Virgin Islands; the divorce-registration area, 29 States and the Virgin Islands.

Vital statistics rates.—Vital statistics rates computed by the National Center for Health Statistics are based upon the enumerated population figures as of April 1 for 1940, 1950, 1960, and 1970 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted.

[1] For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1–5.

Medical care.—Historical data on national health expenditures, by source of public and private funds and by object of expenditure, are compiled by the Social Security Administration and appear annually in the *Social Security Bulletin*. From this series are derived estimates of total personal health care expenditures, private consumer expenditures for health services, and those portions of such expenditures met by private health insurance and third-party payments, which include private health insurance benefit payments, government expenditures, and philanthropy, and the expenditures of employers to maintain in-plant health facilities.

Data on physicians, dentists, nurses, and other providers of health services are published in the *Health Manpower Source Book Series*, Public Health Service Publication No. 263. A comprehensive compilation of data on some 35 categories of health occupations, 25 categories of inpatient health facilities, and outpatient and nonpatient health services is presented in the annual *Health Resources Statistics, DHEW Publication No. (HSM) 1509.*

Statistics of hospitals are obtained from the American Hospital Association's annual survey of hospitals. They are published annually in *Hospitals*, Guide Issue superseded, in part, by *Hospital Statistics* in 1973), and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements, as follows: It must have at least 6 beds for the care of nonrelated patients for an average stay of over 24 hours per admission; be constructed and equipped to insure safety of patients and to provide sanitary facilities for their treatment; have an organized medical staff, registered nurse supervision, and nursing care for round-the-clock patient care; maintain clinical records on all patients and submit evidence of patient care by doctors; provide minimal surgical and obstetrical facilities or relatively complete diagnostic and treatment facilities; have diagnostic X-ray and clinical laboratory services readily available; and offer services more intensive than those required merely for room, board, personal services, and general nursing care.

The Social Security Administration is another source of data for hospitals and nursing homes. These data, available by State for such institutions and for extended care facilities and home health agencies, are based on the Health Insurance for the Aged program (Medicare) begun in 1966. They differ from those of the American Hospital Association and other sources because they are limited to the facilities meeting Federal eligibility standards for participation in Medicare.

Data on persons receiving inpatient care in short-stay hospitals, resident patients in mental hospitals, and residents of homes for the aged and chronically ill are collected by the National Center for Health Statistics and presented in *Vital and Health Statistics*, Series 12 and 13; data on patient visits to physicians, dentists, and other providers of health care are furnished in Series 10.

Another aspect of medical care is provided by statistics on patients in hospitals for the mentally ill, psychiatric services of general hospitals, outpatient psychiatric clinics, and institutions for the mentally retarded. From 1923 to 1946, data on mental health were collected annually by the Bureau of the Census. Since 1946 they have been issued by the Public Health Service. From 1947 through 1966, hospital data appeared annually in *Patients in Mental Institutions* and, from 1959 through 1966, clinic data appeared in *Data on Patients of Outpatient Psychiatric Clinics in the United States*. In 1967, these data appeared in *Mental Health Statistics*, Series A—*Mental Health Facilities Reports* The 1968 and 1969 data are published as reference tables for the different types of facilities. *Mental Health Statistics—Current Facility Reports* presented provisional data through 1969. These are now in the Statistical Note series which also include special reports as they become available.

Statistics on institutional population based on the 1960 and 1970 Census of Population include information on number and characteristics of persons in hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (see tables 62 and 63).

Illness and disability.—Annual data on notifiable diseases, based on reports from State health departments, are compiled by the Public Health Service at its Center for Disease Control in Atlanta, Georgia, and published as a supplement to its *Morbidity and Mortality Weekly Report.* The list of notifiable diseases is revised biennially and includes those which, by mutual agreement of the States and the Public Health Service, are communicable diseases of national importance.

General health statistics, including morbidity, disability, and the utilization of health services, are provided by the various surveys that make up the National Health Survey of the National Center for Health Statistics. They are published in *Vital and Health Statistics,* Series 10 and 11. Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see p. 363).

Nutrition.—Statistics on the annual per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation.* Data beginning with 1909 are published in *Food Consumption, Prices, and Expenditures,* Agricultural Economics Report No. 138, July 1968; they are updated in annual supplements. Data on Federal food distribution programs, quantity and cost of food commodities distributed, value of food stamps issued, and number of persons participating in the programs are published annually in *Agricultural Statistics.*

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 67. Live Births, Deaths, Marriages, and Divorces: 1910 to 1973

No. 69. Total Fertility Rate and Intrinsic Rate of Natural Increase, by Race: 1940 to 1970

[Excludes Hawaii and, prior to 1959, Alaska. Prior to 1960, based on births adjusted for underregistration; beginning 1960, on registered births. The *total fertility rate* is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement level" fertility for the total population under current mortality conditions. The *intrinsic rate of natural increase* is the rate that would eventually prevail if a population were to experience, at each year of age, the birth rates and death rates occurring in the specified year and if these rates remained unchanged over a long period of time]

PERIOD OR YEAR	TOTAL FERTILITY RATE			INTRINSIC RATE OF NATURAL INCREASE (expressed as a percent)		
	Total	White	Negro and other	Total	White	Negro and other
1940–1944	2,523	2,460	3,010	0.5	0.4	1.0
1945–1949	2,985	2,916	3,485	1.2	1.1	1.7
1950–1954	3,337	3,221	4,185	1.7	1.5	2.6
1955–1959	3,690	3,549	4,716	2.1	2.0	3.1
1960–1964	3,459	[1] 3,331	[1] 4,375	1.9	[1] 1.7	[1] 2.8
1965–1969	2,636	2,516	3,447	0.8	0.6	1.9
1965	2,928	2,790	3,891	1.2	1.0	2.3
1967	2,573	2,453	3,385	0.7	0.6	1.8

1970	[3] 87.9	84.1	113.0	1.2	68.3	167.8	145.1	73.3	31.7	8.1	0.5

[1] Rates computed by relating total births, regardless of age of mother, to women aged 15–44 years.
[2] Through 1960, rates computed by relating births to mothers aged 45 years and over to women aged 45–49 years.
[3] The live birth rate for 1971 was 82.3. Detailed data not available.

– Represents zero. [1] Excludes nonresident aliens.

[2] By place of occurrence. Details by race not yet available.

[3] Based on population (excluding Armed Forces abroad) enumerated as of Apr. 1 for 1960 and 1970, and estimated as of July 1 for other years. [4] U.S. total based on receipts corrected for observed differences between provisional and final data. State data not corrected in this manner and will not add to total.

No. 87. Death Rates for the 10 Leading Causes of Death—States: 1970

[By place of residence. Refers only to deaths occurring within the United States. Excludes nonresident alien deaths. Rates per 100,000 estimated midyear population in each area. Causes of death classified according to eighth revision of the International Classification of Diseases; see text, p. 49. For method of selecting the leading causes of death, see *Vital Statistics of the United States, 1968*, Technical Appendix, Part A]

No. 104. Major Medical Expense Insurance—Persons Covered: 1955 to 1972

[**In thousands.** As of December 31. For 1955, persons of all ages; thereafter, persons under 65 years of age only. Represents persons covered by insurance companies only. Excludes members of the Blue Cross-Blue Shield, medical-society sponsored, and all other independent plans. Major medical expense insurance provides protection against especially heavy medical bills resulting from "catastrophic" or prolonged illness, and is used as a supplement to basic medical care insurance or as a comprehensive integrated program providing both basic and major medical protection, including charges for private duty nursing, drugs, and medical appliances]

[1] A day when a person cut down on his usual activities for the whole day because of illness or injury. Includes bed-disability, work-loss, and school-loss days.
[2] A day when a person was kept in bed either all or most of the day because of illness or injury. Includes those work-loss and school-loss days actually spent in bed.
[3] A day when a person lost the entire work day because of illness or injury. Computed for persons 17 years of age and over in the currently employed population, defined as those who were working or had a job or business from which they were not on layoff during the 2-week period preceding the week of interview.
[4] Child's loss of entire school day because of illness or injury. Computed for children 6–16 years of age.

D Withheld to avoid disclosing figures for individual producers. [1] Excludes alicyclic and heterocyclic compounds for 1960; beginning 1965, excludes methionine. [2] Excludes benzenoid compounds. [3] Choline chloride only. [4] For human or veterinary use only through 1960. Sales of mixture and dosage-form products included through 1960; excluded thereafter. [5] Excludes semi-synthetic penicillins. [6] Includes derivatives. Beginning 1965, excludes derivatives other than salts. [7] Piperazine only. [8] Piperazine and piperazine dihydrochloride. [9] Piperazine dihydrochloride. [10] Includes skeletal muscle relaxants. [11] Excludes K vitamins through 1960.

No. 143. Nutrition—Nutrients Available for Civilian Consumption per Capita per Day: 1940 to 1973

[Prior to 1960, excludes Alaska and Hawaii. Based on Bureau of the Census estimated population as of July 1. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data include quantities of iron, thiamin, riboflavin, and niacin added to flour and cereal products; quantities of vitamin A value added to margarine, milk of all types, milk extenders, and used in other foods; quantities of ascorbic acid added to fruit juices, drinks, flavored beverages and dessert powders, milk extenders, cereals, and used in other foods. Minus sign (−) denotes decrease. See also *Historical Statistics, Colonial Times to 1957*, series G 546-551]

Section 3

Immigration and Naturalization

This section presents statistics related to immigration, naturalization, and alien registration. The principal source of these data is the *Annual Report of the Immigration and Naturalization Service.* Immigration statistics are prepared from entry documents. Statistics for naturalization are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compiled from alien address report cards.

The continuous record of immigration into the United States began in 1819, under the Act of March 2. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Information on immigration and naturalization has been included in annual reports issued by the Office of Immigration from 1892 to 1932, the Secretary of Labor from 1933 to 1940, the Attorney General for 1941, and the Immigration and Naturalization Service since then.

Immigrant.—An immigrant is defined as an alien admitted for permanent residence.

Quota immigrant.—Prior to July 1, 1968 quotas limited immigration only from the Eastern Hemisphere countries. Until 1920 there was only a qualitative limitation into this country, barring convicts, the mentally defective and insane, children under age 16 without their parents, persons likely to become public welfare cases, etc. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that country who were residing in the United States as reported by the 1910 Census of Population.

In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that, beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States as determined from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas.

The Immigration and Nationality Act of 1952 simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the U.S. population in the 1920 Census. Quotas revised by Presidential proclamation totaled 158,261 in 1967.

Effective December 1, 1965, quotas under the 1952 Act were continued but made subject to a new preference system. Moreover, at the end of each year, until July 1, 1968, the numbers allocated to each country which were not used were transferred to an immigration pool and made available to preference immigrants who could not obtain visas because the quota for their country was exhausted. The allocations from the pool and from existing numbers could not exceed 170,000.

Nonquota immigrant.—Prior to December 1, 1965, nonquota immigrants comprised immigrants born in Western Hemisphere countries, and their spouses and children under age 21 if accompanying or following to join such immigrants; spouses and children of citizens of the United States; ministers of religion, and their spouses and children if accompanying or following such ministers; refugees; and others.

After December 1, 1965, nonquota immigrants are either "immediate relatives" or "special immigrants". Immediate relatives of United States citizens are parents (if the citizen is over age 21), spouses, and children under age 21. They are exempted from numerical ceilings.

Special immigrants include returning resident aliens (although these are often classed as nonimmigrants for statistical purposes), certain former citizens, and certain other specified groups. The spouses and children under age 21 of the following groups are considered special immigrants if they are accompanying or following to join such immigrants: Western Hemisphere natives, retired employees of our government abroad, and ministers of religion. Special immigrants are also exempt from the numerical ceilings.

Effective July 1, 1968, a ceiling of 120,000 was set for Western Hemisphere natives on a first-come first-served basis with no limitation on the number from any one country. "Immediate relatives" and "special immigrants" other than those in the latter category because of Western Hemisphere birth continue to be exempt from numerical ceilings. Effective December 1, 1968, a limit of 170,000 was set for immigrants who are natives of the Eastern Hemisphere, with a 20,000 maximum on natives of any one country. Selection is made on the basis of preferences favoring family reunification and persons with skills and talents needed here.

Nonimmigrant.—Nonimmigrants are aliens who enter the United States for temporary periods. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants, and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; students; and others. Resident aliens returning from a temporary stay abroad are classed as nonimmigrants, although they are legally special immigrants. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Displaced persons and refugees.—The Displaced Persons Act of 1948 was the first of eight special acts passed between 1948 and 1960 that provided for the admission of refugees from Communist-dominated countries, victims of natural calamities, and orphan children without regard to the usual numerical ceilings.

Status of Cubans.—Effective November 2, 1966, Cubans admitted or paroled into the United States after January 1, 1959, and present in the United States for at least 2 years may obtain permanent resident status. A record of the alien's admission for permanent residence will be created as of 30 months prior to filing of an application or the date of his last arrival in the United States, whichever is later. Cuban immigrants who have been admitted for permanent residence may also have the date of admission adjusted to a date 30 months prior to the date of this Act.

Alien registration.—The Immigration and Nationality Act provides that each alien who is required to be registered under the Alien Registration Act of 1940, and who is in the United States on January 1, must report his current address to the Attorney General during the month of January. Alien address report cards are distributed through the post offices of the United States or the local offices of the Immigration and Naturalization Service.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 153. Immigration: 1820 to 1973

[**In thousands, except rate.** For years ending June 30, except as noted. For definition of immigrant, see text, pp. 95–96. For 1820–1867, alien passengers arriving; 1868–1891 and 1895–1897, immigrants arriving; 1892–1894 and 1898 to the present, immigrants admitted. Rates based on Bureau of the Census estimates as of July 1 for resident population through 1929, and for total population thereafter (excluding Alaska and Hawaii prior to 1959). See also *Historical Statistics, Colonial Times to 1957*, series C 88 and C 140–144]

No. 155. Immigrants Admitted, by Classes: 1930 to 1973

[For years ending June 30. For definition of immigrants, see text, pp. 95–96. Excludes border crossers, crewmen, and aliens admitted on documentary waivers. See also *Historical Statistics, Colonial Times to 1957*, series C 140–144]

CLASS OF ADMISSION	1930	1940	1950	1955	1960	1965	1967
Annual quota	153,714	153,774	154,206	154,657	154,887	158,561	158,261
Immigrants	241,700	70,756	249,187	237,790	265,398	296,697	361,972
Natives of Eastern Hemisphere	141,497	51,997	197,460	82,232	101,373	99,381	153,079
Immediate relatives of U.S. citizens	32,105	5,474	16,275	30,882	34,215	32,714	46,903
Natives of Western Hemisphere	63,147	11,985	33,238	94,274	91,701	153,199	151,034
Other	4,951	1,300	2,214	30,402	38,109	11,403	10,956

	1968	1969	1970	1971	1972	1973
Immigrants, total	454,448	358,579	373,326	370,478	384,685	400,063
Percent of aliens admitted	12.4	9.0	7.8	7.8	6.9	6.3
Subject to numerical limitations of Eastern Hemisphere	156,212	157,306	172,547	158,152	164,849	166,108
Relative preferences	68,384	92,458	92,432	82,191	83,165	92,054
Unmarried sons and daughters of U.S. citizens (1st preference)	1,105	1,124	1,089	1,111	858	936
Spouses, unmarried sons and daughters of resident aliens, and their children (2d preference)	21,002	25,719	30,714	33,990	36,484	38,680
Married sons and daughters of U.S. citizens (4th preference)	10,562	9,914	8,350	5,230	3,971	4,060
Brothers and sisters of U.S. citizens (5th preference)	35,715	55,701	52,279	41,860	41,852	48,378
Occupational preferences	26,865	31,763	34,016	34,563	33,714	26,767
Immigrants in professions (3d preference)	8,153	9,677	10,142	9,807	10,385	8,521
Other workers (6th preference)	7,940	9,100	8,786	9,011	7,915	4,549
Other workers' spouses and children	10,772	12,986	15,088	15,745	15,414	13,697
Conditional entrants (7th preference)	6,658	9,533	9,863	6,361	10,396	9,808
Nonpreference (includes private bill cases)	53,994	23,170	36,058	34,896	37,387	37,363
Adjustments under Section 244 of the I &N Act	299	372	176	131	185	114
Foreign government officials, Act of September, 1957	12	10	2	10	2	2
Subject to numerical limitations of Western Hemisphere	(X)	133,689	114,736	122,474	118,817	116,803
Natives of Western Hemisphere, their spouses and children [1]	(X)	127,346	102,529	102,938	101,232	96,762
Immigrants, Act of November, 1966	(X)	6,343	12,207	19,536	17,585	20,041
Exempt from numerical limitations	298,236	67,584	86,043	89,852	101,019	117,152
Immediate relatives	43,677	60,016	79,213	80,845	86,332	100,953
Wives of U.S. citizens	21,411	28,915	36,276	36,960	36,801	40,165
Husbands of U.S. citizens	6,479	10,358	15,619	17,340	21,496	27,123
Children of U.S. citizens (incl. adoptions)	7,866	12,731	18,095	17,970	18,797	22,990
Parents of U.S. citizens	7,921	8,012	9,223	8,575	9,238	10,675
Special immigrants	159,924	6,130	6,342	5,831	7,146	7,098
Natives of Western Hemisphere countries, their spouses and children [2]	153,929	(X)	(X)	(X)	(X)	(X)
Ministers of religion, their spouses and children	1,024	1,357	1,497	1,417	1,505	1,549
Employees of the U.S. Government abroad, their spouses and children	166	227	290	252	368	508
Children born abroad to resident aliens or subsequent to issuance of visa	2,593	2,935	3,012	2,939	3,566	3,760
Aliens adjusted [2]	2,212	1,611	1,543	1,223	1,707	1,281
Immigrants, various Acts, 1957–1962	[3] 91,708	113	54	40	30	16
Refugee-escapees, Act of July 14, 1960	2,637	985	20	36	4	–
Spouses of U.S. citizens and their children, Act of April, 7, 1970	(X)	(X)	9	2,641	6,828	8,276
Other immigrants not subject to numerical limitation	290	340	405	458	678	809

– Represents zero. X Not applicable.

[1] Effective July 1, 1968, natives of Western Hemisphere countries became subject to an annual numerical limitation of 120,000.

[2] Under sections 244 and 249, I & N Act.

[3] Includes 91,520 immigrants, Act of November, 1966.

Section 4

Education

This section presents data concerning the enrollment, personnel, level, extent, and finances of formal education in the United States. The chief sources are the decennial Census of Population and the Current Population Survey, both conducted by the Bureau of the Census (see text, p. 1), and annual, biennial, and other periodic surveys conducted by the Office of Edueation.

The Census of Population has included data on school enrollment since 1840 and on educational attainment since 1940. The Current Population Survey has reported on school enrollment annually since 1945 and on educational attainment and illiteracy periodically since 1947.

The Office of Education has collected statistical information on education since 1870. Its annual *Digest of Educational Statistics,* first issued in 1962, includes data on pupils, staff, finances, and organization at elementary, secondary, and higher education levels. The *Digest* is also the primary source for detailed information on Federal funds for education and related activities. Projections of enrollment, graduates, teachers, and expenditures appear in *Projections of Educational Statistics,* issued annually since 1964.

Other regular sources of education data include special studies of the Office of Education, publications of the National Education Association, and annual or biennial reports of education agencies in individual States. The quinquennial Census of Governments, conducted by the Bureau of the Census, provides data on school district finances. Reports published by the Bureau of Labor Statistics contain data relating employment experience to educational attainment. Data on vocational training are available in *Vocational and Technical Education,* issued annually by the Office of Education.

Types and sources of data.—The statistics in this section are of two general types. One type, exemplified by data from the Bureau of the Census, is based on direct questioning of individuals to obtain information about their own and their families' education. Data of this type relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. These school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual.

The second type, exemplified by data from the Office of Education and the National Education Association, is based on reports from administrators of educational institutions and of local and State agencies having jurisdiction over education. Data of this type relate to school enrollment, attendance, staff, and finances for the Nation, individual States, and local areas, by institutional characteristics.

Neither the Office of Education nor the Bureau of the Census regularly include specialized vocational, trade, or business schools, residential schools for exceptional children, and correspondence schools. Office of Education enrollment data include kindergartens and publicly financed nursery schools; Census enrollment data include kindergartens and all nursery schools. At the higher education level, the basic Office of Education statistics and the Bureau of the Census enrollment statistics are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges. Statistics for certain other types of institutions beyond the high school, such as those offering organized occupational curriculums of non-degree character, are also collected by the Office of Education.

State laws.—Although all States except Mississippi have requirements that children be taught, State laws vary as to the ages and circumstances of compulsory attendance. In the majority of States, the laws require that formal schooling begin by age 7 and continue to age 16.

Schools.—The Office of Education defines a "school" as "a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

"Regular" schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools. "Public" schools are schools controlled and supported by local, State, or Federal governmental agencies; "private" or "nonpublic" schools are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Bureau of the Census defines "elementary" schools as including grades 1 through 8; "high" schools as including grades 9 through 12; and "colleges" as including junior or community colleges, regular 4-year colleges, and graduate or professional schools. Statistics reported by the Office of Education and the National Education Association by type of organization, as elementary level and secondary level, may not be strictly comparable with those from the Bureau of the Census because the grades included at the two levels vary, depending on the organization of junior high schools. The trend is for the enrollment in grades seven and eight to shift from an elementary to a secondary organization, with resultant changes in grade distribution.

School year.—Except as otherwise indicated in the tables, data relating to enrollment and staff refer to the school year which generally begins in September of the preceding year and ends in June of the year stated. Statistics concerning school finances are for a 12-month period, usually July 1 to June 30.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

[1] Estimated. Excludes data for private residential schools for exceptional children and subcollegiate departments of institutions of higher education. [2] See headnote, table 224. [3] Includes estimates for nonreporting States. [4] Includes 17 U.S. service schools.

Source: U.S. Office of Education, *Fall 1973 Statistics of Public Schools: Opening Fall Enrollment in Higher Education, 1972;* and *Digest of Educational Statistics, 1973.*

No. 176. School Enrollment, by Sex and by Level: 1950 to 1990

[**In millions, except percent.** As of fall of year. Prior to 1960, excludes Alaska and Hawaii. Civilian noninstitutional population 5 to 34 years old. Elementary includes kindergarten (and beginning 1970, nursery schools) and grades 1–8; high school, grades 9–12 and postgraduates; and colleges, 1–4 year colleges and graduate and professional schools. Series shown represent projections based on different combinations of assumptions about population and enrollment rates. For basis of population projections, see headnote, table 3. Enrollment Series 1 and 2 are both based on the assumption that age-specific enrollment rates will continue to increase. Series 1 assumes a relatively rapid increase in the rates following the experience of 1950–52 to 1969–70; the projected rates are adjusted to tie in with the estimates for 1970. Series 2 assumes a more moderate increase based on an average of the projected rates in Series 1 and rates in 1970. More detailed methodology is given in source]

No. 189. Years of School Completed, by Sex: 1973 and Projections to 1990

[**In thousands of persons 25 years old and over.** As of March 1. Excludes Armed Forces overseas and in barrack Projections are based on the age-grade specific attainment trends between 1957–59 and 1969–70. The projections assume decline in the proportions of the population aged 25–29 terminating their education at a given level, some further attainment by ages 30–34, and a continuation of past attainment ratios for older age cohorts. Series 1 assumes lower rates of termination than indicated by the trends from 1957–59 to 1969–70. Series 2 assumes higher rates of termination. For basis of population projections, see headnote, table 3]

Year, series, and sex	Persons 25 years old and over	Years of school completed

NA Not available.

[1] For 1960, enumerated population as of Apr. 1; for all other years, estimated population as of July 1 of preceding year (1919, 1939, etc.). Excludes Armed Forces abroad.

[2] Includes librarians and other nonsupervisory instructional staff. Prior to 1940, figures represent number of persons employed rather than number of positions. [3] Beginning 1960, estimated. [4] 1972 data are preliminary.

[5] Through 1950, includes community services. Beginning 1960, not comparable with prior years.

[6] Comprises summer schools, community colleges, adult education, and, beginning 1960, community services.

[7] Excludes capital outlay by nonschool agencies.

[8] Based on current expenditures allocable to pupil costs, capital outlay, and interest.

[9] Excludes current expenditures not allocable to pupil costs.

– Represents zero. X Not applicable. Z Less than $500,000.

[1] Includes expenditures for summer schools, adult education, community services, and community colleges and technical institutes under the jurisdiction of local boards of education. [2] Based on U.S. Bureau of the Census estimated resident population as of July 1, 1973. Source: *Current Population Reports*, series P–25, No. 518. [3] Preliminary figures. Source: U.S. Bureau of Economic Analysis, *Survey of Current Business*, April 1974. [4] Total includes estimates for nonreporting States. [5] Amount shown is substantially inflated by high cost-of-living conditions in the State. [6] Includes expenditures for summer schools. [7] Does not include the value of commodities supplied by the Department of Agriculture. [8] Estimated by U.S. Office of Education. [9] Except for per capita personal income data, figures shown are for 1972. [10] New Hampshire and North Carolina share the same rank, 34. In order to have the lowest rank equal to the number of States presented, the number 35 is omitted.

Source: Except as noted, U.S. Office of Education, *Advance Statistics of Public Schools*, Fall 1973.

No. 215. Pupil Transportation—Summary, by States: 1970 and 1972

– Represents zero. NA Not available. [1] Number of pupils for whom subsistence was paid in lieu of transportation. [2] Totals are for States reporting this information. [3] Transportation program normally provides for handicapped children only; therefore computations for cost not comparable to those of the States. [4] 1967-68 school year. [5] Private school pupils included with public.

No. 232. Average Monthly Salary Offers to Male Candidates for Degrees: 1961 to 1973

[In dollars. The beginning salary data reported are based on offers (not acceptances) made by business and industrial employers to male graduating students in selected curricula and graduate programs during the normal college recruiting period, September to June. The data are submitted by a representative group of colleges throughout the United States]

FIELD OF STUDY	BACHELOR'S					MASTER'S [1]			DOCTOR'S

Job Corps	22	24	18	43	49	43	170	202	193
Public Employment Program [7]	(X)	193	(NA)	(X)	226	178	(X)	962	1,239

NA Not available. X Not applicable. [1] Refers to number of training positions provided for by funding. [2] Refers to new enrollees; their number per fiscal year is generally larger than the number of enrollment opportunities (slots) programmed, as a slot may be used by more than one individual during the year because of turnover or short-term training. If openings are unfilled, the number of first-time enrollments may be smaller than the number of enrollment opportunities. [3] Includes part-time and other training, not shown separately. [4] Includes the Jobs-Optional Program (JOP) which began in 1971 and the MDTA (OJT) which ended in 1970 except for national contracts. Also includes Apprenticeship Outreach. [5] Includes new careers. [6] Data not meaningful because an individual may be enrolled in one or more program components. [7] Program initiated August 1971.

Source of tables 238 and 239: U.S. Manpower Administration, *Manpower Report of the President*, 1974.

No. 240. Vocational Programs—Enrollment and Expenditures, 1950 to 1972, and by States and Other Areas, 1972

Section 5

Law Enforcement, Federal Courts, and Prisons

This section presents data on crimes, arrests, Federal court cases, the legal profession, Federal and State prisoners, and use of the death penalty. The chief sources of data on these subjects are: *Uniform Crime Reports for the United States,* issued annually by the Federal Bureau of Investigation; the *Annual Report of the Director* and *Special Reports on Federal Offenders and Persons Under the Supervision of the Federal Probation System,* issued by the Administrative Office of the U.S. Courts; and *Statistical Report,* an annual review of the Federal prison system, and *National Prisoner Statistics,* issued by the Law Enforcement Assistance Administration beginning 1971, and before then by the Bureau of Prisons; and *Governmental Finances* and *Public Employment,* issued annually by the Bureau of the Census. Limited information on juvenile delinquency and the operation of juvenile courts is collected by the Social and Rehabilitation Service of the Department of Health, Education, and Welfare. Statistics on lawyers are compiled by the American Bar Foundation, Chicago, Illinois, and on law firms by the Bureau of the Census.

Other recent reports on subjects in this section are: 1970 *National Jail Census,* presenting characteristics of jails and their inmates, issued by the Law Enforcement Assistance Administration; *The Challenge of Crime in a Free Society,* issued in 1967 by the President's Commission on Law Enforcement and Administration of Justice; the Report of the President's National Advisory Commission on Civil Disorders, issued in 1968; the various Task Force Reports of the National Commission on the Causes and Prevention of Violence, issued in 1969; *Crime Against Small Business,* issued in 1969 by the Small Business Administration; and, beginning 1969, the annual *Expenditure and Employment Data for the Criminal Justice System,* issued jointly by the Law Enforcement Assistance Administration and the Bureau of the Census.

Law enforcement and legal jurisdiction.—Law enforcement is for the most part a function of State and local officers and agencies. The U.S. Constitution reserves general police powers to the States. By act of Congress, Federal offenses include only offenses against the U.S. Government and against or by its employees while engaged in their official duties, and offenses which involve the crossing of State lines or an interference with interstate commerce. Consequently, criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws unless they involve Federal property or a Federal officer while engaged in his official duties, or unless they occur in Federal territories or reservations or on the high seas. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: 1 in each of the 50 States, 1 in the District of Columbia, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the system of law enforcement is quite similar among the States, although there are often substantial differences in the penaltics for like offenses.

Law enforcement can be divided into three parts. The first, covering the investigation of crimes and the arrest of persons suspected of committing them, involves municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State, and Federal grand juries, and prosecuting court officers. The third division of administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the penalty is enforced by the prison, reformatory, or jail, or by probation or parole officials.

Crime.—The Federal Bureau of Investigation, through its Uniform Crime Reporting Program, receives monthly and annual reports on a voluntary basis from law enforcement agencies throughout the country, currently representing 93 percent of the national population. Each month, city police, sheriffs, and State police file reports on the number of offenses that become known to them in the following seven crime categories—murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny–theft, and auto theft. These categories are the basis of the FBI's Crime Index, a measure of the extent, fluctuation, and distribution of serious crime in the United States. Monthly reports also contain data on the number of these crimes cleared by arrest and certain other analytical data pertaining to specific crime catcgories. Annual reports provide summaries of data concerning persons arrested for all criminal offenses, by age, sex, and race of the offender, as well as an accounting of the number of persons formally charged and their disposition.

In summarizing and publishing crime data, the FBI does not vouch for the validity of the reports it receives, but presents the data as information useful to persons concerned with the problem of crime and criminal-law enforcement. The FBI is the only agency which collects such data nationally on a regular basis.

Courts.—Court statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole although data are available for many States individually. The only national compilations of such statistics were made by the Bureau of the Census from 1932 to 1945. At no time, however, were there more than 32 States involved in the reporting system.

Comprehensive information on the business of the Federal courts is collected by the Administrative Office of the U.S. Courts and is published in the *Annual Report of the Director, Court Management Statistics*, and in *Juror Utilization in United States Courts*. The bulk of civil and criminal litigation in the country is commenced and determined in the various State courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. Whether a State court or a Federal court has jurisdiction over a particular action is often difficult to determine. Generally, the Federal courts have jurisdiction over the following types of cases: Suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different States; civil cases involving admiralty, maritime, or prizc jurisdiction; all matters and proceedings in bankruptcy.

The 94 Federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every State and one each in the District of Columbia, Puerto Rico, the Virgin Islands, the Canal Zone, and Guam. Appeals from the district courts are taken to intermediate appellate courts of which there are 11, known as U.S. courts of appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Prisoners.—Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Data on prisoners in Federal and State prisons and reformatories were collected annually by the Bureau of the Census until 1950. This work was transferred to the Bureau of Prisons in 1950 and to the Law Enforccment Assistance Administration in 1971. Summary statistics covering persons received and discharged from State prisons and reformatories and from Federal prisons and persons executed in the United States under civilian authority are now published periodically by the Law Enforcement Assistance Administration in *National Prisoner Statistics*. Also, nearly every State publishes annual data either for its whole prison system or for each separate State institution.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 242. Crimes and Crime Rates, by Type: 1960 to 1973

[**In thousands, except as indicated.** Data refer to offenses known to the police. Rates are based on Bureau of the Census population data, excluding Armed Forces abroad. For definitions of crimes, see footnotes, table 243. Minus (−) sign denotes decrease]

Larceny—theft [8]	3,465	2,471	437	1,812	282	725	3,594	2,351	478	2,101	232	678
Auto theft [9]	851	607	45	185	28	71	853	558	42	186	28	83

[1] For definition of standard metropolitan statistical areas, see text, sec. 34. [2] Rate per 100,000 population based on Bureau of the Census estimated population as of July 1, excluding Armed Forces abroad. [3] All willful felonious homicides. Excludes attempts to kill, assaults to kill, suicides, accidental deaths, or justifiable homicides, and deaths caused by negligence. [4] Limited to forcible rapes and attempts. [5] Includes the stealing or taking of anything of value by force or violence or by threat of force or violence; includes attempted robbery. [6] Includes assault with intent to kill. Excludes simple assault, assault and battery, fighting, etc. [7] Includes any unlawful entry to commit a felony or a theft. Includes attempted burglary and burglary followed by larceny. [8] Includes theft of property or articles of value (except auto theft) without the use of force and violence or fraud. Excludes larceny resulting from burglary, embezzlement, "con" games, forgery, worthless checks, etc. [9] Includes all cases where motor vehicles are driven away and abandoned. Excludes those taken for temporary use when actually returned by the taker.

NA Not available. [1] Not included in State figures.
[2] Total excludes, and individual State figures include, transfers.
[3] Beginning 1960, excludes male misdemeanant prisoners in adult correctional institutions. Beginning 1965, excludes female misdemeanants.
[4] Beginning 1960, prisoners present include prisoners out of the institution on temporary absences.
[5] For 1950, covers only the New Castle County workhouse; thereafter, also includes the Kent and Sussex County workhouses which were united with it to form a State correctional system.
[6] Includes all felony prisoners regardless of age.
[7] Beginning 1960, excludes misdemeanant prisoners received from court.

No. 286. Prisoners Executed Under Civil Authority: 1930 to 1973

[Includes 3 Federal executions in Alaska, 1 each in 1939, 1948, and 1950. Excludes executions by military authorities. The Army (including the Air Force) carried out 160 (148 between 1942 and 1950, 3 each in 1954, 1955, and 1957, and 1 each in 1958, 1959, and 1961). Of the total, 106 were executed for murder (including 21 involving rape), 53 for rape, and 1 for desertion. The Navy carried out no executions during the period. See also *Historical Statistics, Colonial Times to 1957*, series H 432–444]

Section 6

Geography and Environment

This section relates to area, climatologic, topographic, and hydrologic measurements of the United States. There are few official publications other than those showing area measurements (issued infrequently by the Bureau of the Census) which present area and geography statistics of national scope. However, many data are compiled for particular regions or for internal administrative purposes by such Federal agencies as the Geological Survey and the National Oceanic and Atmospheric Administration.

Area.—Area measurements in the United States began with the country as a whole and developed, as mapping progressed, to measurements for the States. The annual report of the U.S. General Land Office for 1850 contained the first reference to the areas of the States and Territories, although there was no indication of the method used in obtaining the measurements. In 1881, as part of the 1880 Census of Population, the Bureau of the Census laid the foundation for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies included, and the outer limits of the United States used as a basis for measurement. As part of the 1940 census, the Bureau published *Areas of the United States: 1940*, presenting data on the total land and water areas of the States, counties, cities, and minor civil divisions. For reports of the 1950 and 1960 censuses, adjustments in selected area figures were made for reasons of changes in boundaries, development of water reservoirs, or improvement in maps from which measurements are made. In 1964, the Bureau undertook measurement of the areas of cities, minor civil divisions, and census county divisions of the 1960 census. The results are published in *Area Measurement Reports, Series GE–20*, the series consisting of one report for each State and a U.S. summary. These reports include the same kinds of data as the 1940 report plus statistics on population for each area. Land areas as of January 1, 1970 of places with population of 2,500 and over are given in *1970 Census of Population*, vol. 1, part A.

Geography.—The Geological Survey, cooperating with State and local agencies, is responsible for topographic, geologic, and hydrologic maps; basic data on the quantity, quality, and movement of surface and ground water; and classification of Federal lands for mineral and waterpower potential. The Bureau of Land Management conducts surveys and maintains records of the public domain and other public lands.

The National Ocean Survey, a component of the National Oceanic and Atmospheric Administration, is responsible for coastal and geodetic surveys and measurement of certain physical phenomena. Currently, its primary functions are to provide charts for marine and air navigation, a basic network of geodetic control, and other basic data for engineering, scientific, commercial, industrial, and defense needs.

The surveying and charting functions of the U.S. Lake Survey, established in 1841 under the Corps of Engineers, were transferred to the National Ocean Survey in 1970. Its primary function is to furnish Great Lakes navigators with reliable charts and information on harbor facilities. It also maintains records of the fluctuating levels of the Great Lakes, the precipitation over them, and the flow through connecting rivers, and issues reports on all hydraulic problems relating to the Great Lakes.

Maps prepared by the Bureau of the Census show boundaries of various types of political and statistical areas such as unincorporated places, the urbanized areas around large cities, county subdivisions, and business districts, among others.

Environment.—The Council on Environmental Quality is responsible for coordinating all environmental quality programs and for reviewing all other Federal programs affecting the environment. Duties of the Environmental Protection Agency include

research and enforcement activities related to pollution abatement and control.

An air sampling network was established in 1953 by the Public Health Service. The basic sampling system of the present National Air Surveillance Network was set up in 1957. The Network's objectives are to determine the extent and nature of air pollution and to study trends in levels of atmospheric contaminants. Currently there are 264 sampling stations in the Network, 229 urban and 35 nonurban.

National Ambient Air Quality Standards for suspended particulate matter, sulfur dioxide, oxidants and carbon monoxide were set by the EPA in April, 1971. Responsibility for demonstrating compliance with, or progress toward achieving, these standards lies with the State agencies whose expanded pollution measurement effort is exemplified by the growth in non-Federal suspended particulate sampling stations from approximately 800 in 1969 to almost 2500 in 1972.

The Federal Water Quality Administration is responsible for enhancing and improving the quality of water in streams, lakes, estuaries, and coastal areas to levels which provide adequate supplies for all forseeable appropriate uses. Among its programs is assistance to State agencies in connection with water pollution control.

Climate.—The National Oceanic and Atmospheric Administration, through the National Weather Service and the Environmental Data Service, is responsible for collecting, processing, and publishing data on climate. It maintains about 11,000 weather stations, of which nearly 3,000 produce autographic precipitation records, about 600 take automatic or hourly readings of a series of weather elements, and the remainder record one observation a day.

Nearly all weather stations have been moved several times in their history. Consequently, the National Weather Service uses "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the different locations the stations may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1941 to 1970. For stations having records for the entire 30 years from the same instrument site, monthly precipitation and temperature normals are the means of the monthly values for the 30 years; for temperature, the normal maximum and normal minimum values were used to obtain monthly normals. The annual normal temperature is obtained by dividing by 2 the sum of the annual normal maximum value and the annual normal minimum value of temperature.

For stations that did not have continuous records from the same instrument site for the entire 30 years, 1941 to 1970, the means have been adjusted to the record at the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare against both sites for obtaining the resultant adjustment factors. Normals were thereafter obtained as outlined above.

This system of normals has three characteristics: (1) The 30-year period (1941 to 1970) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station and exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) the normals for maximum and minimum temperatures are separately tabulated.

The degree-day normals are derived from the values for the monthly normal maximum and minimum temperatures, and computed from the standard base 65° F. The heating degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are Fahrenheit degrees difference in the temperature between the average temperature for the day and 65° F."

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 288. Territorial Expansion of the United States and Acquisitions of Other Areas

[Boundaries of all territories listed under "United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession, which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1960. See also *Historical Statistics, Colonial Times to 1957*, series J 1–2]

X Not applicable.

[1] Includes that part of drainage basin of Red River of the North, south of 49th parallel, sometimes considered part of Louisiana Purchase.

[2] Not included in total. Ceded by Spain in 1898, the Philippines constituted a territorial possession of the United States from 1898 to 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines.

[3] Ceded by Spain in 1898, ratified in 1899, and became Commonwealth of Puerto Rico by Act of Congress on July 25, 1952. [4] Acquired 1898; ratified 1899. [5] Acquired 1899; ratified 1900.

[6] Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

[7] Included in total for 1970. Leased (1914) from Republic of Nicaragua for 99 years but returned April 1971.

[8] Under trusteeship. See table 4, footnotes 8 and 11.

[9] Comprises following islands with gross areas as indicated, in sq. mi.: Midway (2), Wake (3), Palmyra (4), Canton and Enderbury (combined area, 27), Swan (1), Navassa (2), Baker, Howland, and Jarvis (combined area, 3), Johnston and Sand (combined area, less than 0.5), Kingman Reef. Quita Sueno Bank, Roncador Cay, and Serrano Bank (each less than 0.5), and other islands for which area figures are not available.

[1] Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1: 1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.

[2] Figures obtained in 1939–1940 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet. [3] Statute.

– Represents zero. X Not applicable.

[1] Dry land and land temporarily or partially covered by water, as marshland, swamps, etc.; streams and canals under one-eighth statute mile wide; and lakes, reservoirs, and ponds under 40 acres of area.

[2] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Excludes areas of oceans, bays, sounds, etc., lying within U.S. jurisdiction but not defined as inland water.

[3] Year of ratification of Constitution; one of the original 13 States. [4] See table 4, footnotes 7, 8, and 11.

[1] Total take, including delivery losses but not including reservoir evaporation.
[2] Rural farm and nonfarm household and garden use, and water for farm stock and dairies.
[3] For 1900–1960, includes manufacturing and mineral industries, rural commercial industries, air-conditioning, resorts, hotels, motels, military and other State and Federal agencies, and other miscellaneous uses; thereafter, includes manufacturing, mining and mineral processing, ordnance, and construction.

Source: U.S. Bureau of Domestic Commerce. 1900-1960 based principally on committee prints, *Water Resources Activities in the United States*, for the Senate Committee on National Water Resources, U.S. Senate, 1960; thereafter, based on the first *National Assessment of the Water Resources Council*, 1968.

No. 296. Water Withdrawn—States and Puerto Rico: 1970

[**In millions of gallons per day except per capita in gallons per day.** Quantities are given to two significant figures; therefore, figures do not add to totals. Withdrawal signifies water physically withdrawn from a source. Includes fresh and saline water; excludes water used for hydroelectric power]

No. 308. Suspended Particulate Matter Levels, Selected Cities: 1972

[**In micrograms per cubic meter.** For definitiou, see headnote, table 307. The national primary standard for suspended particulate matter is 75 micrograms per cubic meter of air (μg/m3), annual geometric mean. The national secondary standard is 60 micrograms per cubic meter of air (μg/m3), annual geometric mean. (*Federal Register*, vol. 36, No. 84, April 30, 1971.) Data represent values of samples taken nationally on a biweekly basis by the U.S. Environmental Protection Agency. See text. pp. 169 and 170]

Section 7

Public Lands, Parks, Recreation, and Travel

Statistics in this section relate to the Federal public domain and other federally owned and leased real property, Indian lands, national parks and forests, State and municipal parks, domestic and foreign travel, and other forms of recreation.

Data on public lands are published primarily by the Department of the Interior, Bureau of Land Management, in *Public Land Statistics.* Data on federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World.* The Economic Research Service of the Department of Agriculture also issues statistics on land use and land ownership.

The Department of the Interior issues various reports relating to recreation, as follows: The National Park Service publishes information on national parks in its semiannual report, *Public Use of the National Park System;* its semiannual report, *Areas Administered by the National Park Service,* which gives breakdowns of acreage; and its *National Parks and Landmarks,* which gives a brief description of each area and also covers sites eligible for registry as natural or national historic landmarks and non-federally owned national historic sites. The Bureau of Outdoor Recreation administers a land and water conservation fund which provides funds to States, counties, and cities for outdoor recreation purposes and to designated Federal agencies for acquisition of new recreational lands and waters. It also provides statistics on the fund and on other aspects of outdoor recreation. In 1973, the Bureau published its first nationwide outdoor recreation plan, *Outdoor Recreation: A Legacy for America.* The Fish and Wildlife Service compiles and releases data on sport fishing and hunting and on number and acreage of national wildlife refuges and fish hatcheries. Data for State and municipal parks and playgrounds, as well as for other outdoor recreational activities, are compiled by the National Recreation and Park Association, Washington, D.C., which issues its *Recreation and Park Yearbook* at 5-year intervals. The Department of Agriculture's Forest Service, in its *Annual Report of the Chief,* issues data on recreational uses of the national forests.

Figures on expenditures for recreation and on domestic and foreign travel, compiled by the Department of Commerce's Bureau of Economic Analysis, appear periodically in the monthly *Survey of Current Business.* Domestic travel data by volume and type were collected by the Bureau of the Census in its 1972 Census of Transportation. Comparable data are published in the 1963 *Passenger Transportation Survey,* vol. I, and the 1967 *National Travel Survey,* vol. I. Foreign travel data based on analysis of passports (see table 354, p. 214 of this book) are published in the annual *Summary of Passport Statistics,* issued by the Department of State's Passport Office.

Few statistical series are available on activities of a cultural nature—art, music, theater, etc.—and those are generally based on infrequent and incomplete studies by private agencies. The available series in this field are presented in tables 350 and 351.

Other sources of data relating to individual sports and recreational activities appear in footnotes to table 349 and in the Guide to Sources in Appendix III of this book.

Public-domain and acquired lands.—The U.S. Government acquired sovereignty over its present land area through a series of international agreements and treaties. At the time of acquisition of sovereignty over the areas involved (now 2,271 million acres) title to about 463 million acres rested in individual States and their political subdivisions or in private owners, and was not relinquished to the U.S. Government. Title to the remaining land area passed to the U.S. Government. This area, except for lands in the District of Columbia, is known as the original public domain.

Public-domain lands or public lands are federally owned lands to which the public land laws apply. In general, they include that portion of the original public domain not disposed of under the public land laws, and lands declared by the Congress to be public lands. In addition to the original public domain, the U.S. Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for public purposes. Such lands are referred to as acquired lands.

Indian lands.—Indian lands are the private landholdings of individual Indians or Indian tribes that are subject to special restrictive provisions of Federal law administered by the Bureau of Indian Affairs. They have been set aside for Indian use by treaties, congressional acts, and executive orders. Although most of these lands are in reservations for specific tribes, there are groups of scattered off-reservation allotments in individual ownership and other small tracts of land occupied by Indian groups. Recreational facilities are increasingly being located and operated by Indians on Indian reservations (see table 338).

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal owners. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become final entries (perfected entries) upon issuance of a final certificate to the applicant after he has complied fully with the requirements of the laws relating to his application. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 322. Area and Acquisition of the Public Domain: 1781 to 1973

[Areas of acquisitions are as computed in 1912, and do not agree with figures in square miles shown in table 288, which includes later adjustments and reflects subsequent remeasurement. Excludes area outside the United States amounting to 537,216 acres (217,572 hectares) in 1973. See also *Historical Statistics, Colonial Times to 1957*, series J 3-9]

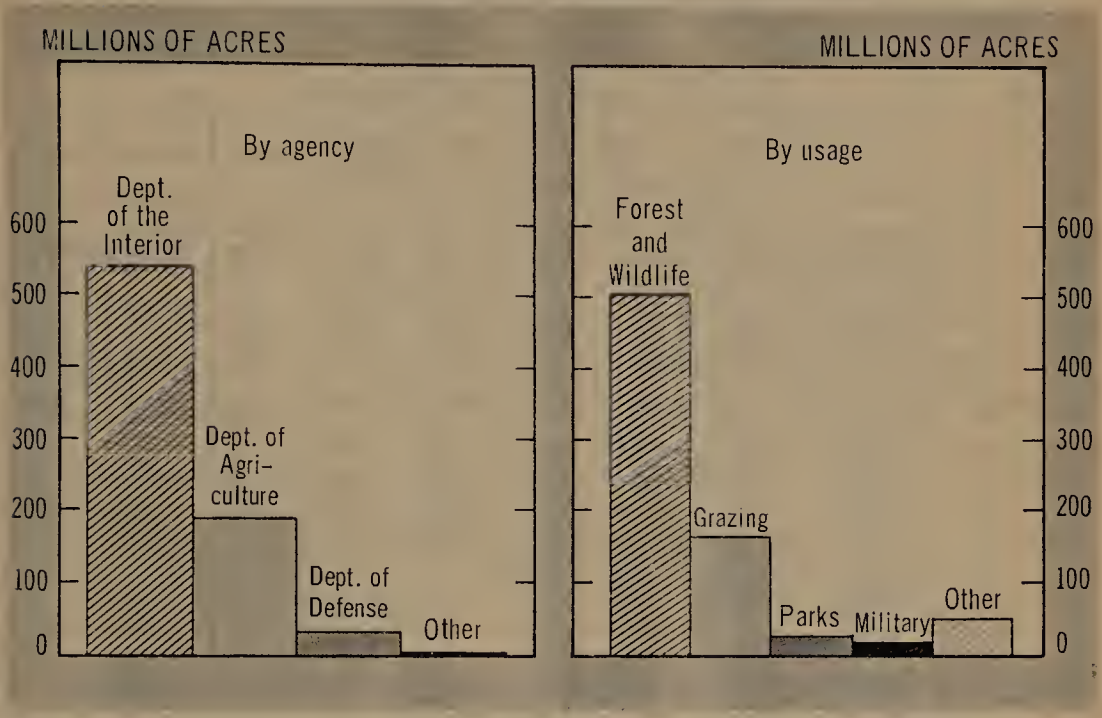
z Less than 500,000.

[1] Comprises original public domain plus acquired lands. Estimated from imperfect data available for indicated years. Prior to 1959, excludes Alaska, and 1960, Hawaii. Source, Beginning 1955: General Services Administration, *Inventory Report on Real Property Owned by the United States Throughout the World*, annual.

[2] Data for Louisiana Purchase exclude areas eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.



[3] Includes 33,920 acres (13,738 hectares) subsequently recognized as part of State of Texas, which is not a public-domain State.

[4] Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and date of its acquisition. Some hold it as part of Louisiana Purchase; others, as acquired from Great Britain.

[1] Changes in total land area are due to variable methods and materials used in periodic remeasurements, and to the construction of artificial reservoirs.
[2] Land owned by individuals, partnerships, and corporations.
[3] Trust land held by tribes and individual owners exclusive of federally owned land used by Indians.
[4] Gross acreage of Federal holdings including highway and road rights-of-way in Federal areas.
[5] Includes the major part of highway and road rights-of-way through predominantly private land areas.

No. 328. Public Lands—Homestead Entries, 1941 to 1973, and Vacant Lands, 1940 to 1973, by States

[Homestead entries for years ending June 30; vacant lands as of June 30. Excludes States with less than 500 acres in years specified. See text, p. 195. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry; the latter, lands not reserved for some public purpose, i.e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. See *Historical Statistics, Colonial Times to 1957*, series J 10, for vacant lands excluding Alaska and J 17-18 for homestead entries]

– Represents zero. NA Not available. X Not applicable. [1] Excludes transfers and allocations from appropriations to other agencies (e.g., Land and Water Conservation Fund, etc.). [2] Excludes salaries and wages. [3] Receipts deposited in Treasury; not available for expenditure by National Park Service. [4] For calendar year; 1950 and 1955 data not adjusted for comparability with counting system as modified in 1960. Prior to 1965, excludes visits to White House. [5] Excludes National Capital Parks. [6] Combined data for North Cascades National Park and two adjacent National Recreation Areas are included in National Parks total. 1973 data include 3,490,000 visits to 10 areas of miscellaneous other designations. [7] Excludes "other" overnight stays. [8] Federal land only. [9] Acreage as of Jan. 1 following year stated. [10] Acreage as of Dec. 31. [11] Represents U.S. lands alienated by exchange of U.S. and private lands.

No. 348. Participation in Selected Outdoor Recreation Activities: 1972

[**Persons 12 years old and over.** Based on a home interview survey of approximately 4,000 persons drawn from the non-institutionalized population of the conterminous United States. Data cover participation during June, July, and August 1972, except figures for hunting, snow skiing, snowmobiling, and other winter sports which reflect participation during the period from September 1971 through May 1972]

ACTIVITY	Participants (millions)	Participants as percentage of total population [1]	Total person-days of participation (millions) [2]	Average number of person-days per participant
Camping in remote or wilderness areas	7.7	5	57	7.5
Camping in developed camp grounds	17.5	11	153	8.8
Hunting	22.2	14	299	13.5
Fishing	38.0	24	278	7.3
Riding motorcycles off the road	7.4	5	58	7.8
Hiking with a pack, mountain/rock climbing	8.6	5	45	5.2
Nature walks	26.7	17	149	5.6
Walking for pleasure	54.2	34	496	9.2
Bicycling	16.7	10	214	12.8
Horseback riding	8.7	5	51	5.9
Water skiing	8.5	5	54	6.4
Sailing	4.1	3	32	7.9
Other boating	23.3	15	126	5.4
Outdoor pool swimming	28.5	18	257	9.0
Other swimming outdoors	53.8	34	487	9.0
Golf	7.7	5	63	8.2
Tennis	8.6	5	81	9.5
Playing other outdoor games or sports	35.0	22	339	9.7
Going to outdoor sports events	18.9	12	97	5.1
Visiting zoos, fairs, amusement parks	38.7	24	123	3.2
Sightseeing	59.8	37	363	6.1
Picnicking	74.4	47	405	5.4
Driving for pleasure	54.5	34	405	7.4
Snow skiing	7.2	5	58	8.1
Snowmobiling	7.2	5	104	14.3
Other winter sports	24.8	16	259	10.4

[1] Population of persons 12 years old and over. [2] Participation by a person in an activity during any part or parts of a calendar day is counted as a person-day.

NA Not available. [1] Through 1970, comprises new musicals and plays, revivals, special productions, and presentation of special companies and visiting foreign troupes. Beginning 1971, data from New York Times, N.Y., *Closing the Record Book*, annual; excludes presentations of foreign troupes.

[2] Comprises college, other amateur, and professional companies. Beginning 1971, data from Central Opera Service, New York, N.Y., *Directory of American Opera Producing Organizations.*

[3] Source: American Symphony Orchestra League, Inc., Vienna, Va. For years ending Aug. 31. Orchestras other than college are principally defined by their annual budgets: Community, $100,000 prior to 1967, $50,000 thereafter; urban, $50,000–$99,999; metropolitan, $100,000–$500,000. Metropolitan includes a few orchestras operating on budgets over $500,000. [4] Classification began in 1967. [5] Classification began in 1958.

[6] 26 orchestras reporting. [7] 27 orchestras reporting. [8] Includes 899 ensemble performances by orchestra member players under the orchestras' auspices. [9] Includes 574,000 attending the 899 ensemble performances shown in footnote 8.

No. 352. Volume and Characteristics of Travel: 1972

[**Person-trips in millions; person-miles in billions.** A trip is counted each time a person goes at least 100 miles away from home and returns, regardless of whether any nights are spent away from home. Based on a nationwide probability sample of households concerning trips during 1972. Subject to sampling variability]

No. 354. Passports, by Characteristics of Travel and Travelers: 1950 to 1973

[**In thousands.** Total passports are actual count; all other data based on a sample and prorated to total passports. Data are subject to error because sample has not changed since 1955, but volume of passports has increased over 400 percent. Data refer to number of passports issued, not travelers (except as noted). Covers new and renewed passports except, effective Aug. 26, 1968, passports became valid for 5 years and renewals were eliminated. A single passport may cover more than one trip and more than one person]

Section 8

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, other receipts, outlays and debt. Principal sources of the fiscal data are *The Budget of the United States Government* and related documents, published annually by the Office of Management and Budget (OMB), and the Department of the Treasury's annual *Combined Statement of Receipts, Expenditures, and Balances*, the official report relating to the receipts, appropriations, outlays, and fund accounts. The *Statistical Appendix* to the *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields. The personnel data relate to civil staffing and payrolls for the various public functions and agencies, to employee characteristics, and to civil service status.

Major budget concepts.—The unified budget concept was introduced in the 1969 budget. Under this concept all Federal programs are included in one comprehensive budget regardless of the manner of funding. In more recent years, however, the budget totals have excluded some Federal activities—principally the Export-Import Bank, the Postal Service, and the lending activities of the Rural Electrification Administration. Data showing unified budget totals of budget receipts and outlays are presented in the 1975 *Budget* for the years 1954 to 1975; more detailed historical summary tables generally show data since 1965.

The *Budget* totals embrace both the federally owned funds and the trust funds administered by the Government, such as the funds for social security, medicare, highways, airports and airways, and the Indian tribal funds. In addition, the budget shows, in part 2, a breakdown of the Federal fund and trust fund surplus or deficit.

The loan account/expenditure account distinction was discontinued in fiscal 1972 pursuant to OMB Circular No. A–11, Revised, dated June 12, 1972. This distinction formerly divided total budget outlays between net lending and expenditures. Receipts of the Government arising from its sovereign or compulsory powers are reported as governmental receipts; all other receipts, i.e., from business-type or market-oriented activities, are offset against outlays. Outlays are reported on a checks-issued basis, except for interest which is recorded on an accrual basis.

Treasury receipts and expenditures.—All receipts of the Government, with a few exceptions, are deposited to the credit of the United States Treasury regardless of ultimate disposition or availability for expenditure. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the Federal Government clearing through the accounts of the United States Treasury are reported in the *Daily Statement of the United States Treasury*. The issue for the last day of the month contains information as to the public debt receipts and outlays for the month, the public debt outstanding, and related data.

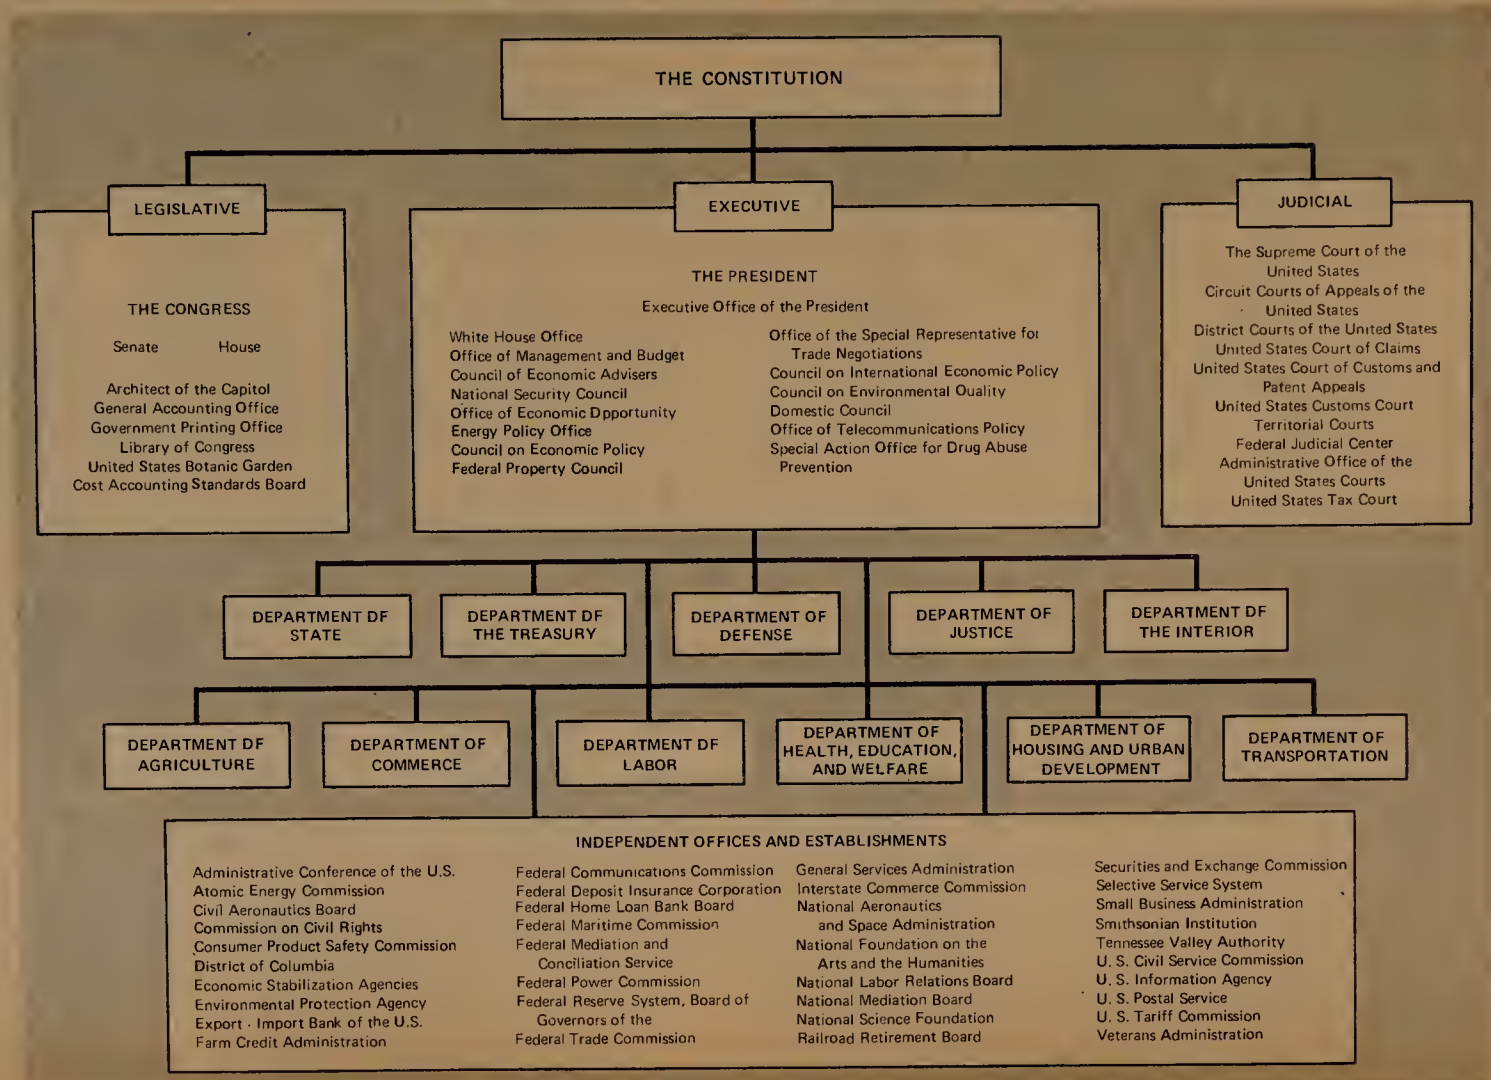
Receipts and outlays of the Government classified as to budget and other transactions and showing the budget surplus or deficit appear in the *Monthly Statement of Receipts and Outlays of the United States Government*. The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities, including financial statements of Government corporations and business-type enterprises. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Statement of United States Currency and Coin*.

Receipts such as taxes, customs duties, and miscellaneous budget receipts, which are collected by Government agencies, and outlays represented by checks issued and cash payments made by disbursing officers are reported in the *Monthly Statement of Receipts and Outlays of the United States Government* and in the annual *Combined Statement of Receipts, Expenditures, and Balances.* These monthly and annual reports include deposits and collections in, and payments from, accounts of Government agencies held outside the Treasury as well as those of the general account of the United States Treasury and are on the same basis as the unified budget.

Tax collections.—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by regions, districts, and States. The agency's three annual *Statistics of Income* reports present detailed data from individual income tax returns, corporation income tax returns, and business tax returns, respectively. The report on business tax returns presents financial data for sole proprietorships and partnerships and summary data for corporations. Periodic *Statistics of Income* publications present data from fiduciary income tax, estate tax, and gift tax returns, and data on sales of capital assets by individuals, foreign income and tax reported by corporations, depletion and related expenditures, and estate tax wealth.

Relation to national income accounts and GNP.—The Federal sector of the *national income and product accounts* focuses attention upon the Federal transactions entering into national income, the gross national product, and other portions of the national economic accounts (see table 362). The figures include transactions of both Federal and trust funds. However, they include only receipts and outlays which directly affect the current flow of income and output, and therefore exclude such transactions as loans. Also, the Federal sector account records many taxes as they accrue, instead of as they are collected, and records most purchases at the time of delivery.

Employment and payrolls.—The Civil Service Commission collects employment and payroll data from all departments and agencies of the Federal Government but not from the District of Columbia Government. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month.



Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months.

Federal employment and payroll figures are published by the Civil Service Commission in its regular *Annual Report* and its *Monthly Release, Federal Civilian Manpower Statistics.* It also publishes semiannual employment data for minority groups; annual reports on salary and wages; geographic distribution; and on occupations of white-collar workers as well as data on women Federal employees. Reports on occupations of Federal blue-collar workers are published biennially. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings.*

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

[1] Income after exclusions, deductions, and exemptions. For 1948–74, joint returns, in effect, double the tax on one-half of their taxable income. For 1954–74, the same treatment is provided for a surviving spouse. For 1952–73 heads of households compute their tax by use of a rate schedule which provides for about one-half the split income benefits allowed married couples filing joint returns. There was a maximum effective rate: 1944–53 on net income; 1954–63 on taxable income. [2] Includes effect of percentage reductions of tentative tax, which is tax computed from rate schedule before application of percentage reductions. [3] Includes effect of 7.5 percent, 10 percent, and 2.5 percent tax surcharge imposed for 1968, 1969, and 1970, respectively.

– Represents zero. NA Not available. Z Less than 500. [1] For definition, see footnote 1, table 374. [2] Exemptions: 1950–1969, joint return $1,200, single $600, each dependent $600; additional exemption for taxpayer, and his spouse on joint return, of $600 if blind and $600 if age 65 and over. For 1970, each exemption increased to $625; for 1971, to $675; for 1972, to $750. [3] Income tax after credits (including the investment credit for 1965–1972). [4] Joint returns counted twice in computing percent. [5] Salaries after sick pay exclusion. [6] Domestic and foreign. [7] After exclusions. [8] For 1950, business profit or loss after net operating loss deduction. [9] Farm included with business or profession. [10] Comprises all income subject to income tax not elsewhere listed, less adjustments.

No. 379. Corporation Income Tax Returns—Summary: 1950 to 1971

[**Number of returns in thousands; money figures in billions of dollars.** Based on returns for periods ending between July 1 of year shown and July 1 of following year, as filed, prior to audit adjustments and other changes made after filing. All corporations are required to file returns except those specifically exempt, such as fraternal, civic, and charitable organizations not operating for profit. Excludes returns of inactive corporations. See source publications for changes in law affecting comparability of historical data. Beginning 1955, based on a probability sample. Corporate data based on income tax returns appear on pp. 477, 478, and 483–488. See also *Historical Statistics, Colonial Times to 1957*, series Y 280–291]

ITEM	1950	1955	1960	1965	1968	1969	1970	1971
Returns with and without net income:								
Number of returns	629	807	1,141	1,424	1,542	1,659	1,665	1,733
Total receipts [1]	458	642	849	1,195	1,508	1,680	1,751	1,906
Net income less deficit [2]	43	47	44	74	86	80	66	80
Returns with net income:								
Number of returns	426	513	670	915	999	1,046	1,008	1,069
Total receipts [1]	431	585	724	1,080	1,350	1,461	1,453	1,595
Net income [2]	44	50	50	81	95	93	84	95
Total tax liability [3]	17	22	22	30	37	39	33	37
Distributions to stockholders [4]	11	13	17	25	31	32	30	31
Returns without net income:								
Number of returns	203	294	470	509	542	614	657	660
Total receipts [1]	27	57	125	115	158	219	298	270
Deficit [2]	2	3	7	7	9	13	18	16
Inactive corporations, number of returns	37	35	47	66	73	79	82	69

[1] Consists of business receipts, interest less amortizable bond premium, rents, royalties, net gain from capital assets (as defined by law) and other property, dividends, and other taxable income.
[2] Net income (less deficit) is a tax concept and therefore excludes wholly tax-exempt interest; beginning 1965, includes constructive taxable income from related foreign corporations.
[3] Beginning 1965, data are after adjustments for investment credit, and includes tax from recomputing prior year investment credit; 1968–1970, includes tax surcharge; 1969–1971, includes additional tax for tax preferences.
[4] Other than own stock.

1955	274.4	1,660	6.4	9.3	1973	458.1	2,177	24.2	9.8

Z Less than $50 million. [1] Based on estimated July 1 population; prior to 1960, excludes Alaska and Hawaii. [2] Calculated on total expenditures not reduced by interfund transactions representing interest and certain other payments to Treasury through 1950. Beginning 1955, outlays as defined under the unified budget, i.e., net of applicable receipts.

Section 9

State and Local Government Finances and Employment

Nationwide statistics relating to State and local governments, their numbers, finances, and employment, are compiled primarily by the Bureau of the Census. Each five years, the Bureau conducts a Census of Governments involving collection of data for all governmental units in the United States. The 1972 Census of Governments is nearing completion. The volumes are being issued as rapidly as available and will be available by the end of the year. A listing of reports from that census appears in Appendix III of this book. The Bureau of the Census also conducts annual surveys which cover all the State governments and a sample of local governments. Publications issued annually by the Bureau of the Census include a report on governmental finances which presents figures for the Federal Government, nationwide totals for States and local governments, by type, and State-local data by States. Also issued annually are series of publications on State finances, city finances, and public employment and a descriptive leaflet, *Recurrent Publications on Governments*. There are also three series of quarterly reports: on tax revenue, on public construction expenditures, and on investment holdings of major public employee retirement systems.

Basic information for Census Bureau statistics on governments is obtained mainly by mail canvass from State and local officials; however, financial data for each of the State governments and for many of the large local governments are compiled from their official records and reports by Census Bureau personnel, and classified into uniform categories for statistical reporting.

Statistics regarding particular functions in which State and local governments have an important role are presented in other sections of this book (for example, Education Social Insurance and Welfare Services, and Transportation—Land).

Governmental units.—The governmental structure of the United States includes, in addition to the Federal Government and the States, thousands of local governments—counties, municipalities, townships, school districts, and numerous kinds of "special districts." As shown by table 399, more than 78,000 local governments were identified by the 1972 Census of Governments. The figures for governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

Finances.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending June 30, except for a few States with other closing dates in the calendar year specified. Beginning 1963, local government figures are for fiscal years which closed at various dates during the 12 months ended June 30 of the year specified; figures for 1962 and earlier years are for fiscal years ended during the calendar year.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States, although based upon the

official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard reporting categories.

The statistics on governmental finances distinguish among general government, utilities and liquor stores, and insurance trust activities. The general government sector comprises all activities other than those classified as utilities, liquor stores, and insurance trusts. The utility sector includes only water supply, electric light and power, gas supply, and transit systems operated by local governments. Liquor stores are operated by 17 States and by a few local governments. Insurance trust figures relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

Employment and payrolls.—Public employment and payroll data are mainly based on mail canvassing of State and local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, figures shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 398. Government Finances—Revenue, Expenditure, and Debt: 1950 to 1972

[**In billions of dollars, except as indicated.** Prior to 1960, excludes Alaska and Hawaii. Excludes intergovernmental revenue and expenditure. Local government amounts are estimates subject to sampling variation; see source. See also *Historical Statistics, Colonial Times to 1957*, series Y 384–681]

– Represents zero. X Not applicable.

[1] Based on Federal income tax liability as follows: Nebraska, 13 percent; Rhode Island, 15 percent; Alaska, 16 percent; Vermont, 25 percent plus 12 percent surcharge. [2] As the Federal tax base or tax liability is used in computing the State tax, in effect the Federal standard deduction and exemption are adopted. [3] Tax credit. [4] Incorporates 1972 on 1973 legislative actions. [5] Plus tax credits. [6] Tax on capital gains. [7] Subject to specified limitations. [8] Data apply to tax on interest and dividends; 9 percent (flat rate) capital gains tax also levied. [9] Plus 10 percent surcharge. [10] Data apply to tax on interest and dividends; commuter tax (4 percent flat rate) also levied. [11] Data apply to New York commuter tax, plus 2.5 percent surcharge; Pennsylvania commuter tax (2.3 percent flat rate) also levied. [12] Nonresident; not general. [13] Tax on interest and dividends.

– Represents zero. Z Less than 0.05 percent.

[1] Time constraints made necessary use of 1970 data as follows: Alabama, Connecticut, Nevada, and West Virginia, all amounts; in Idaho and Virginia, locally assessed personal property; in Massachusetts, partial exemption amounts reflected in totals for locally assessed property; in Minnesota, State assessed property; in Mississippi, homestead partial exemption amounts reflected in totals for locally assessed realty; in New Mexico, State assessed property and locally assessed personal property.

[2] All assessment is performed by a State agency, but assessed values here are shown as "locally assessed" for comparability with data presented for other States.

[3] Exempt portion of personal property assessed value, if any, included with exempt portion of real property assessed value.

[4] Two sets of values are locally recorded for taxable property. The assessed values pertain to the final values against which tax rates are applied, rather than to the preliminary "full and time," "time and full," "adjusted market," or (in Illinois) locally unadjusted values.

[5] Totals exclude the following assessed values: private car lines, Illinois $2,669,000 and Louisiana $5,000,000.

[6] Distribution of amounts between realty and personalty estimated wholly or in part.

Section 10

Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age, survivors, disability, and health insurance (OASDHI); public and railroad employee retirement; unemployment and temporary disability insurance; aid to the needy; and maternal, child, and other welfare services. Also included here are selected data on workmen's compensation, including black lung benefits, pension plans and funds, the American Red Cross, United Way campaigns, and philanthropic trusts and foundations.

There are several principal sources for these data. The monthly *Social Security Bulletin*, a publication of the Department of Health, Education, and Welfare, presents current data on many of the programs and summarizes annual data in statistical supplements published each year. Current data on employment security activities are published monthly in the Department of Labor's *Unemployment Insurance Statistics*. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *RRB Quarterly Review* and *Annual Report*.

Social insurance under the Social Security Act.—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment, and protection against the cost of medical care during old age and disability. The old-age, survivors, disability, and health insurance (OASDHI) program provides monthly cash benefits to retired or disabled insured workers and their dependents and to survivors of an insured worker. Within specifications of the law, retirement benefits are payable to an aged insured worker; to his aged spouse or his spouse at any age caring for his child under age 18, totally disabled, or a full-time student, age 18 to 21. An aged worker becomes eligible for full benefits at age 65, although he or she may elect reduced benefits up to 3 years earlier; his or her spouse is under the same limitations. Special benefits are also provided the aged 72 and over who do not meet the insured status requirements. Under certain conditions, survivor benefits are payable to dependents of an insured worker, including his aged or disabled widow or his widow at any age caring for his child under age 18 or totally disabled; his child under age 18, totally disabled, or a fulltime student, age 18 to 21; and aged parents. Disability benefits are payable to an insured worker under age 65 with a prolonged disability that meets the definition in the Act and to his dependents on the same basis as dependents of retired workers. A lump sum benefit is also payable on the death of an insured worker.

Beginning July 1966, health insurance has been provided under two coordinated plans for nearly all people age 65 and over: A hospital insurance plan which covers hospital and related services and a voluntary supplementary medical insurance plan which covers physicians' services and related medical services. Beginning July 1973, this program was extended to disabled beneficiaries of any age under certain circumstances and to persons with chronic kidney disease.

Retirement, survivors, disability, and hospital insurance benefits are paid for by the contributions of workers, employers, and the self-employed on annual earnings up to $13,200 (beginning 1975, automatically adjusted to reflect increasing income levels). Currently (see table 447) workers and their employers each pay 4.95 percent, and the self-employed pay 7.0 percent of covered wages for retirement, survivors, and disability insurance. The special benefits for uninsured persons age 72 and over are financed from general funds. For hospital insurance, workers, employers, and the self-employed each pay 0.9 percent. For persons 65 and over with specified amounts of social security coverage less than that required for cash benefit eligibility, the hospital benefits are financed out of Federal general revenues. The voluntary

534-000 O - 74 - 19

medical insurance plan is financed by a $6.70 a month premium (effective July 1, 1974) paid by persons age 65 and over and the disabled who choose to enroll in the plan, and by Federal Government contribution from general revenues.

Both unemployment insurance and the public employment (placement) service are administered through the U.S. Manpower Administration and each State's employment security agency. Under agreements with the U.S. Secretary of Labor, the State agencies also administer unemployment compensation for eligible ex-servicemen and Federal employees, unemployment assistance under the Disaster Relief Act of 1970 to individuals unemployed as the result of major disasters, workers assistance and relocation allowances under the Trade Expansion Act, and direct aid (training and related cash allowances) under the several Federal manpower and adjustment acts.

State unemployment insurance laws pay benefits to unemployed covered workers meeting the qualifications in those laws. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 26 to 36 weeks among the States (most frequently 26 weeks); extended benefits are payable under a Federal-State program to workers who exhaust their regular State benefits during periods of high unemployment. Maximum weekly benefits without dependents' allowances range from $49 to $117. Ten States and the District of Columbia augment their unemployment benefits with allowances for dependents. Maximum augmented weekly benefits range from $75 to $147. Over half the States pay maximum weekly benefits that are adjusted automatically to reflect the upward movement of wages.

A 3.2-percent Federal tax is levied on the payroll of employers of 1 or more workers in industries covered by the Act and is used to finance the Federal-State program. Employers subject to the Federal law are allowed a credit of 2.7 percent of taxable payrolls for contributions paid to State agencies under State unemployment insurance laws; the Federal Government retains the balance of the tax to cover employment security administrative costs and to finance the Federal share of the extended-benefit program.

Excluded from coverage are the railroad industry (see below) and most workers in domestic service and agricultural employment. A limited number of State and local government workers are covered, usually on an optional basis.

Contributions payable to States by employers in all but 7 States is 2.7 percent of the taxable payroll. However, employers with favorable unemployment experience may be assigned a lower rate (except in Puerto Rico); in 1973 the average contribution rate under State laws was estimated at 1.9 percent of the taxable payroll (see table 465). The contribution is based on the first $4,200 paid to a worker during the year. In a few States, the rate applies to wages above $4,200. Contributions are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

Social insurance for railroad workers.—Programs administered by the U.S. Railroad Retirement Board cover employees of railroads and of companies and organizations affiliated with railroad transportation. The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. Wage credits of workers with less than 10 years of railroading are transferred to, and counted with, social security covered employment at retirement. Supplemental annuities have also been provided for career employees since 1966. In addition, Federal health insurance protection is available to railroad workers on the same basis as to workers covered by social security. The regular railroad program, including hospital insurance, is financed primarily through an employer-employee tax on the first $1,100 of each month's earnings (starting 1975, subject to automatic increases). The 1974 tax rate for employers is 15.35 percent and for employees, 5.85 percent. The supplemental annuity program is financed by a special variable quarterly tax on railroad employers for each man-hour compensated.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness financed by contributions from covered employers of 4 percent (applicable to earnings not in excess of $400 a month).

Social insurance for Government employees.—The major retirement system for Federal civilian employees is the Civil Service Retirement System. It provides age and service, disability, and survivor annuities for employees in the executive, judicial, and legislative branches. The employees contribution rate is 7 percent, computed on total base pay. Employing agencies pay amounts equal to employee contributions.

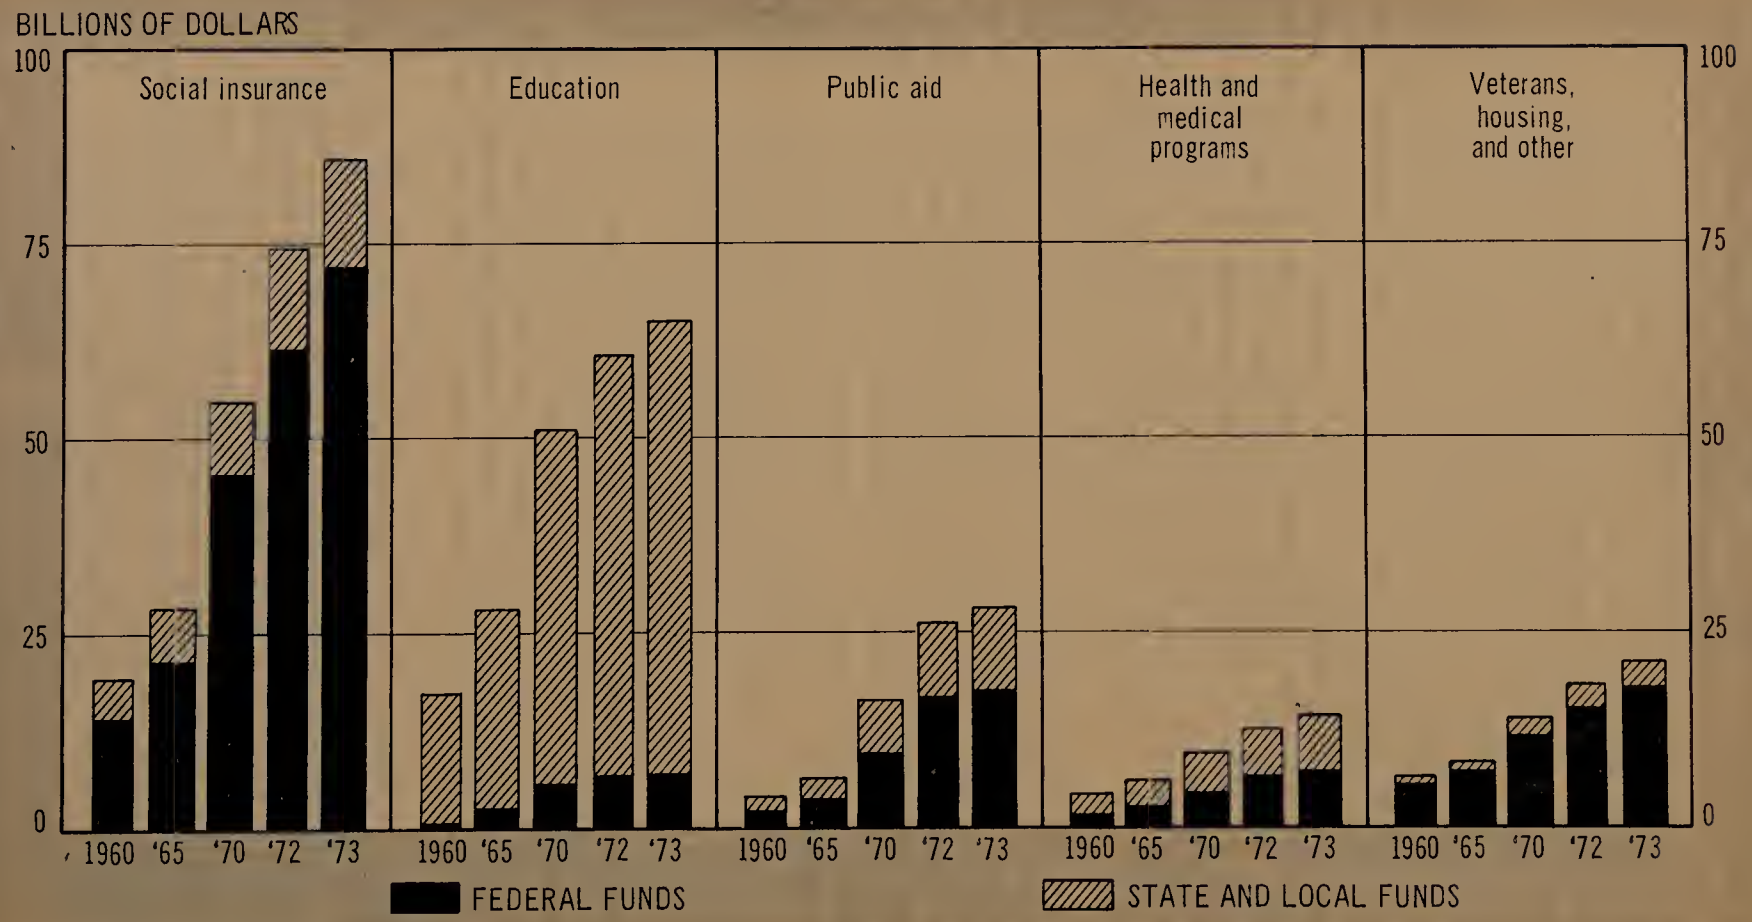
In addition, there are separate retirement systems for the uniformed services (supplementing OASDHI) and for a few special groups of Federal civilian employees.

State and local government employees are covered for the most part by their own State and local retirement systems that have many characteristics similar to those of the Federal civil service retirement system. In many jurisdictions these benefits supplement OASDHI coverage.

Workmen's compensation.—All States have programs providing protection against work-connected injuries and deaths. Federal workmen's compensation laws cover Federal employees, private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Social Security Administration and the Department of Labor administer a "black lung" benefits program for coal miners disabled by pneumoconiosis and for specified dependents and survivors. Most State workmen's compensation laws exempt such employment as agriculture, domestic service, and casual labor; about one-third exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States, benefits to injured workers or to survivor families compensate for two-thirds of the wage loss subject to dollar maximums which, in many States, are automatically adjusted to changes in wage levels. The maximum weekly benefits without dependents' allowances range from $49 to $175. All compensation acts require that medical aid be furnished to injured workers but a few State laws have duration and/or cost limitations on the amount of medical benefits provided.

Public Assistance.—During 1973, six programs, all administered by the States and localities, provided public assistance. Money payments and social services to four groups—the aged, the blind, the permanently and totally disabled, and families with dependent children whose need arises from certain causes—were financed in part from Federal funds granted to States under the Social Security Act. Federal grants also assisted States in providing medical assistance to persons not able to take care of their medical bills themselves. Aid to other needy persons was furnished mainly through general assistance, toward which the Federal Government makes no contribution.



Starting January 1, 1974, the Federal-State system of public assistance for the needy aged, blind, and disabled was replaced by a new wholly Federal-financed program of supplemental security income, administered by the Social Security Administration. States must supplement these Federal payments to bring the assistance up to former levels.

Health and welfare services.—Programs providing health and welfare services are aided through Federal grants to States for child welfare services, vocational rehabilitation, aging activities, maternal and child health services, services for crippled children, maternity and infant care projects, comprehensive health services and a variety of public health activities (including community mental health centers, medical facilities construction, regional medical programs, and control of specific diseases). The Social and Rehabilitation Service administers the first three of these programs; the others are administered by the Health Services and Mental Health Administration.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

– Represents zero. X Not applicable. [1] Excludes refunds to those leaving service. Federal data include military retirement. [2] Includes compensation for Federal employees and ex-servicemen, and trade adjustment and cash training allowances. [3] Cash and medical benefits in 5 areas. [4] Benefits by private insurance carriers, State funds, and self-insurers. [5] Includes work incentive activities, not shown separately. [6] Refugee assistance, surplus food for the needy, food stamps, and Job Corps, Neighborhood Youth Corps, and work-experience programs under the Economic Opportunity Act and related laws. [7] Excludes domiciliary care in institutions other than mental or tuberculosis, and services included with other programs in social welfare series. [8] Includes medical care for military dependent families. [9] Includes services for crippled children. [10] Includes burial awards and subsistence payments to disabled veterans undergoing training. [11] Excludes servicemen's group life insurance. [12] Federal expenditures for administrative costs (Office of Education) and research not shown separately but included in total. [13] Construction costs of vocational and adult education programs included under elementary-secondary expenditures. [14] Federal expenditures represent primarily surplus foods for nonprofit institutions. State and local expenditures include some amounts for antipoverty programs, foster care, legal assistance to the needy, and care of transients. [15] Represents primarily child welfare services under title V of the Social Security Act. [16] Includes community action, migrant workers, and VISTA programs and all administrative expenses of the Office of Economic Opportunity. [17] Includes administrative expenses of the Secretary of Health, Education, and Welfare; Indian welfare; aging and juvenile delinquency activities; certain manpower and child development activities; and other items.

[1] For old-age, survivors, disability, and health insurance (OASDHI), average monthly number; for railroad retirement program, public employee retirement systems, veterans programs, and the black lung benefit program, number on rolls June 30; for State unemployment and temporary disability insurance and veterans unemployment allowances, average weekly number; for railroad unemployment and temporary disability insurance, average number during 14-day registration period: Area Redevelopment Act and Manpower Development and Training Act programs, number on rolls December 31. [2] Includes benefits to dependents where applicable.

[3] Excludes payments for medical care. [4] Payable in Calif., N.J., N.Y., R.I., and Puerto Rico under public and private plans. Data for beneficiaries in N.J. not available.

[5] Number represents families for Federal programs under the Uniformed Services Contingency Option Act of 1953 and for State and local government retirement systems. [6] Lump sums are for burial of deceased veterans.

[7] Includes payments made by the States as agents of the Federal Government under the Federal employees' unemployment compensation program and under the Ex-Servicemen's Compensation Act of 1953, and payments under the extended unemployment insurance programs. Beginning 1961, includes Puerto Rico and, beginning 1966, the Automotive Products Trade Act of 1965.

[8] Under the Veterans' Readjustment Assistance Act of 1952 (terminated January 1960).

[9] Area Redevelopment Act of 1961 (November 1961-June 1966) and Manpower Development Training Act of 1962.

Employers reporting taxable wages 1,000	3,345	5,050	5,270	5,590	5,420	5,380	5,400	5,400

[1] Estimated number of persons who had covered employment at any time during the period 1937 to year shown; not adjusted to reflect effect of (a) provisions that coordinate the OASDHI and railroad retirement programs and (b) wage credits for military service. Only partially adjusted to eliminate duplicate count of persons with taxable earnings reported on more than 1 account number; effect of such duplication is substantially less significant for the insured than for the uninsured. [2] Fully or currently insured.
[3] Beginning 1955, includes self-employment. See table 447 for maximum taxable earnings.

No. 442. Pre-Retirement Years: Selected Characteristics of Noninstitutional Population Aged 58–63, Spring 1969

[Data are from the first wave of interviews for longitudinal study of retirement. Data exclude married women]

Characteristics	Men		Women, spouse in household
	Spouse present	No spouse in household	
Total population [1]...1,000	4,117	729	1,954
Percent distribution			
Pre-retirees employed	83	65	55
Pre-retirees unemployed	2	3	2
Pre-retirees not in labor force	15	32	42
Home ownership:			
Percent owning nonfarm homes	80	41	47
Median equity in nonfarm home	$14,115	$11,413	$12,796
Financial assets:			
Percent with holdings	85	66	72
Median amount for holders	$3,660	$2,190	$4,468

Characteristics	Men		Women, spouse in household
	Spouse present	No spouse in household	
Median money income in 1968	$8,122	$4,183	$2,788
Living alone or with spouse only	61	55	55
Living with relatives	39	36	40
With children, with or without others	33	14	23
With other relatives	6	22	17
Living with non-relatives only	(Z)	8	4
Pre-retirees with—			
Living parents	44	16	17
Living children	87	53	68
Living siblings	98	89	88
With health insurance	84	62	71

Z Less than 0.5 percent.
[1] The rate of response was generally high except for amount of asset holdings and total income.

Lump sum—mil. dol.	33	113	164	217	294	306	320	329

X Not applicable. [1] Figures for end of year. Benefit payment actually being made at a specified time with no deductions or with deductions amounting to less than a month's benefits, i.e., the benefits actually being received.

[2] Persons aged 65 and over (and aged 62–64, beginning 1956 for women and 1961 for men).

[3] July 1957–October 1960, disabled workers aged 50–64; thereafter, disabled workers under age 65.

[4] Includes wife beneficiaries under age 65 with entitled children in their care and, beginning September 1965, entitled divorced wives. [5] Beginning 1957, includes disabled persons aged 18 and over whose disability began before age (18, 22, beginning January 1973) and, beginning September 1965, entitled full-time students aged 18–21.

[6] Includes surviving divorced mothers with entitled children in their care.

[7] Beginning September 1965, includes widows aged 60–61 and surviving divorced wives aged 60 and over; beginning March 1968, disabled widows and widowers aged 50 and over; and beginning January 1973, widowers aged 60–61.

[8] Represents benefits for persons aged 72 and over who are not insured under the regular or transitional provisions of the Social Security Act.

[9] Benefits payable without reduction for early retirement. 1950 data are estimated.

[10] Benefits payable with reduction for early retirement, at ages 62–64.

[11] Includes awards that are suspended chiefly because of earnings of the retired worker and awards that have been converted from disability awards to retirement awards on attainment of 65. Also includes awards to transitionally insured persons aged 72 and over.

[12] Payments under 1939 and later amendments, except as noted. Represents total disbursements of benefit checks by the Dept. of the Treasury during the years specified. [13] Distribution by type estimated.

[1] Beginning 1951, includes deposits by States and deductions for refund of estimated amount of employee-tax overpayment. Supplementary medical insurance represents voluntary premium payments from and in behalf of insured persons. [2] Transfers for military wages credits and for cost of hospital benefits for persons not insured for OASDHI or railroad retirement cash benefits. [3] Transfers to trust funds represented by negative figures. [4] Trust fund activated Jan. 1, 1966; benefit payments, July 1, 1966. Administrative expenses include period from passage of 1965 amendments on. The supplementary medical trust fund was activated July 1, 1966.

Retirement	1.67	2.19	2.47	2.89	3.15	3.28

X Not applicable. Z Less than $50,000.

[1] Includes group and wholesale life insurance but excludes Servicemen's Group Life Insurance program. [2] Includes persons covered by group comprehensive major-medical insurance as well as those with basic benefits. [3] Includes private hospital plans written in compliance with State temporary disability insurance law in California. [4] Group supplementary and comprehensive major-medical insurance written by commercial insurance companies. [5] Includes private plans written in compliance with State temporary disability insurance laws in California, New Jersey, and New York; and formal sick-leave plans. Excludes credit accident and health insurance. [6] Starting 1966, excludes long-term disability policies. [7] Includes pay-as-you-go and deferred profit-sharing plans, plans for non-profit organizations, union pension plans, and railroad plans supplementing the Federal railroad retirement program. Excludes plans for the self-employed. Retirement coverage estimates exclude annuitants. [8] Includes data for supplemental unemployment insurance benefits, not shown separately. [9] Includes data under long-term disability policies. [10] For private and public employees, coverage and contributions related to private and government full-time and part-time civilian employees and payroll; for private employees to wage and salary employed labor force and payroll in private industry.

No. 467. Workmen's Compensation Payments: 1950 to 1972

[**Benefits paid in millions of dollars.** Prior to 1960, excludes Alaska and Hawaii. See also *Historical Statistics, Colonial Times to 1957*, series H 175–185]

ITEM	1950	1955	1960	1965	1969	1970	1971	1972
Workers covered per month, est.—mil.	37	41	45	51	59	59	59	62
Benefits paid during year	615	916	1,295	1,814	2,624	3,011	3,548	4,023
Type of insurance:								
Private carriers [1]	381	563	810	1,124	1,641	1,843	2,005	2,179
State funds [2]	149	238	325	445	607	755	1,098	1,351
Employers' self-insurance [3]	85	115	160	244	376	413	445	493
Type of benefit:								
Medical and hospitalization	200	325	435	600	920	1,040	1,110	1,230
Compensation payments	415	591	860	1,214	1,704	1,971	2,438	2,793
Disability	360	521	755	1,074	1,519	1,741	2,078	2,333
Survivor	55	70	105	140	185	230	360	460
Percent of payroll covered:								
Workmen's compensation costs [4]	0.89	0.91	0.93	1.00	1.07	1.13	1.13	1.16
Benefits	0.54	0.55	0.59	0.61	0.62	0.66	0.68	0.69

[1] Net cash and medical benefits paid under standard workmen's compensation policies.
[2] Net cash and medical benefits paid by competitive and exclusive State funds and by Federal workmen's compensation programs including black lung benefit program. [3] Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workmen's compensation policies that exclude standard medical coverage.
[4] Premiums written by private carriers and State funds and benefits paid by self-insurers increased by 5–10 percent to allow for administrative costs. Also includes benefits paid and administrative costs of Federal workmen's compensation programs.

No. 470. Workmen's Compensation Payments, by States: 1950 to 1972

[**In thousands of dollars.** Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator* (*Insurance by States . . . of Casualty Lines*), from reports of State insurance commissions, and from A. M. Best Co.); net disbursements of State funds (from the *Spectator*, from *Argus Casualty and Surety Chart*, and from State reports), estimated for some States; and self-insurance payments, estimated from available State data. Calendar-year data, except fiscal-year data for Federal civilian and other programs and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Bases Compensation Act for States in which such payments are made]

No. 475. Aid to Families with Dependent Children (AFDC)—Characteristics of Recipient Families: 1971 and 1973

[Refers to federally aided State programs providing aid to needy children deprived of parental care or support. [Based on a sample and subject to sampling variability; for details, see source]

CHARACTERISTIC	1971	1973
Number of families—1,000	2,524	2,990
Percent distribution	100.0	100.0
Metropolitan areas [1]	74.4	77.9
In central cities	56.5	57.6
Outside central cities	17.8	20.3
Nonmetropolitan areas [2]	25.6	22.1
White	48.3	46.9
Negro	43.3	45.8
Other [2]	8.4	7.3
Number of children: 1	29.7	33.8
2	24.5	25.5
3	18.0	16.3
4 or 5	18.9	17.2
6 or more [2]	9.0	7.2
Status of father: [3] Dead	4.3	4.0
Incapacitated	9.8	8.0
Unemployed	6.1	4.0
Absent from home	78.9	83.0
Percent distribution—Continued		
Status of mother in home, total	92.9	93.4
Employed [4]	13.9	15.0
Incapacitated	11.3	7.5
Full-time homemaker	37.1	43.8
Other	30.6	27.1
Number of years as recipient: [5]		
1 year or less	37.4	30.2
1–2 years	19.9	19.1
2–3 years	11.6	15.4
3–5 years	13.3	16.9
5–10 years	11.4	12.8
10–15 years	4.2	3.5
15–20 years	1.2	1.1
20 years or more	0.5	0.4
Unknown	0.4	0.4
Median [6] number of years	1.6	2.0

[1] For definition see sec. 34. [2] Includes unknown or not reported.
[3] Excludes status not reported or unknown. [4] Full-time and part-time.
[5] From most recent AFDC opening through month of study. [6] For definition of median see preface.

No. 486. Foundations—Number and Finances by States and Other Areas

[**Money figures in millions of dollars.** Figures are for latest year reported by foundations, usually 1968 or 1969. A foundation may be defined as a nongovernmental, nonprofit organization, with funds and programs managed by its own trustees or directors, established to maintain or aid social, educational, charitable, religious, or other activities serving the common welfare. Excludes organizations which make general appeals to the public for funds, act as trade associations for industrial or other special groups, are restricted by charter solely to aiding one or several named institutions, or which are captive trusts, within colleges, churches, or other organizations, or are very small—defined as having neither assets of $500,000 nor making grants of at least $25,000 in the latest year of record. There were approximately 21,000 very small foundations]

Section 11

National Defense and Veterans Affairs

This section presents statistics on national defense and its human and financial costs; military personnel, ships, and aircraft; Selective Service operations; and various federally sponsored programs and benefits for veterans. The principal sources of these data are the annual *Selected Manpower Statistics* and other reports issued by the Office of the Secretary of Defense; annual reports of the Departments of the Army, Navy, and Air Force, the Office of Civil Defense, and the National Guard Bureau; the Selective Service System; *Annual Report of Administrator of Veterans Affairs,* Veterans Administration; and *Budget of the United States Government,* Office of Management and Budget. Data on veterans also appear in reports of the Census of Population, conducted by the Bureau of the Census.

Department of Defense (DOD).—DOD provides for the security of the United States. It is the successor agency to the National Military Establishment and was established as an executive department by the National Security Act Amendments of 1949. DOD includes the Office of the Secretary of Defense, the Joint Chiefs of Staff, the military departments (Army, Navy, Air Force), and the unified and specified commands. The Secretary of Defense is the principal assistant to the President in all matters relating to DOD. He is appointed from civil life by the President with the approval of the U.S. Senate. The chain of command runs from the President to the Secretary of Defense and through the Joint Chiefs of Staff to the commanders of unified and specified commands.

The Joint Chiefs of Staff are the principal military advisers to the Secretary of Defense as well as the President and the National Security Council. Each member of the Joint Chiefs of Staff, other than the chairman, is the senior military officer of his respective service and is responsible for keeping the Secretary of his military department fully informed on matters considered or acted upon by the Joint Chiefs of Staff.

Each military department is separately organized under its own Secretary who is responsible to the Secretary of Defense for the operation of his department. Commanders of unified and specified commands are responsible to the President and the Secretary of Defense for the accomplishments of the military missions assigned to them.

Selective Service.—The Selective Service System is responsible for the registration, classification, selection, forwarding for examination, and delivery for induction into the Armed Forces of all men required to register under the Military Selective Service Act. The act, prior to July 1, 1973, required men to register at age 18 and to be liable for military service up to age 26 or, if they have been deferred from service, up to age 35. After July 1, 1973, generally, only registrants who had received deferments and the basis for the deferments had ceased to exist are liable for induction. Such persons are liable for induction until age 35. The authority to induct doctors and allied medical specialists expired July 1, 1973. Selective Service is also authorized to determine availability of members of the Standby Reserve of the Armed Forces for order to active duty in time of war or national emergency.

Military reserves.—Reserve personnel of the Armed Forces consist of the Army National Guard, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. They provide trained personnel available for active duty in the Armed Forces in time of war or national emergency and at such other times as required by the national security.

The National Guard has dual Federal-State responsibilities and uses jointly provided equipment, facilities, and budget support. In peacetime, the National Guard is State-administered, under command of the State Governors. The President is also empowered to mobilize the National Guard and to use such of the Armed Forces as he considers necessary to quell insurrection in any State against its government, to enforce Federal authority in any State, and to suppress interference with the execution of State and Federal law in a State by insurrection, violence, or conspiracy.

Veterans Administration.—The Veterans Administration administers laws authorizing benefits for eligible former and present members of the Armed Forces, and for the beneficiaries of deceased former members. Veterans benefits available under various acts of Congress include: Compensation for service-connected disability or death; pensions for nonservice-connected disability or death; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans; U.S. Government and National Service Life Insurance; hospitalization; domiciliary care; nursing home care; out-patient medical and dental care for service-connected disability; prosthetic and other appliances; special housing and automobiles or other conveyances for certain disabled veterans; burial allowances; and educational assistance to wives, widows, sons, and daughters of deceased or totally disabled veterans, servicemen missing in action or prisoners of war.

Estimates of veterans in civil life as published by the Veterans Administration generally cover all persons with war service or service between January 31, 1955, and August 5, 1964, and include those living outside the United States. Similar data from the Bureau of the Census relate to civilian males, 14 years old and over, who live in the United States and who have served in the Armed Forces, whether in war or peacetime.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 488. Federal Budget Outlays for National Defense and Veterans Benefits and Services: 1950 to 1974

[**In billions of dollars, except percent.** For years ending June 30. Includes outlays of Department of Defense, Veterans Administration, and other agencies for activities primarily related to national defense and veterans programs. See *Historical Statistics, Colonial Times to 1957*, series Y 357–358 and Y 360, for related data]

No. 493. Estimates of Total Cost of American Wars, by Rank

[In millions of dollars, except percent]

WAR	Estimated ultimate costs	Original war costs [1]	VETERANS' BENEFITS			ESTIMATED INTEREST PAYMENTS ON WAR LOANS	
			Total costs under present laws [2]	Percent of original war costs	Total costs to 1974 [3]	Total	Percent of original war costs
World War II	664,000	288,000	290,000	100	101,621	86,000	50
Vietnam conflict [4]	352,000	[5] 128,000	[6] 220,000	[6] 200	10,847	[7] 22,000	[7] 20
Korean conflict	164,000	54,000	99,000	184	17,949	11,000	20
World War I	112,000	26,000	75,000	290	55,233	11,000	42
Civil War (Union only)	12,952	3,200	8,580	260	8,573	1,172	37
Spanish-American War	6,460	400	6,000	1,505	5,566	60	15
American Revolution	190	100	70	70	70	20	20
War of 1812	158	93	49	53	49	16	17
Mexican War	147	73	64	88	66	16	14

[1] Based on expenditures of Departments of the Army and Navy to World War I and major national security expenditures thereafter. Usually the figures begin with the year the war began but in all cases they extend one year beyond the end of the actual conflict. See *Historical Statistics of the United States, Colonial Times to 1957*, series Y 351-352 and Y 358.

[2] To World War I, estimates are based on Veterans Administration data. For World War I, World War II, and Korean conflict, estimates are those of the 1956 report of the President's Commission on Veterans' Pensions plus 25 percent (the increase in the average value of benefits since the Commission made its report).

[3] Source: U.S. Veterans Administration, *Annual Report of Administrator of Veterans Affairs.*

[4] Estimates based on assumption that war would end by June 30, 1970 (except for original war costs and for veterans benefit costs to 1974).

[5] Estimated Department of Defense expenditure in support of Southeast Asia for fiscal year 1965 to 1972.

[6] Medium-level estimate of 200 percent (high, 300; low, 100) based on figures expressing relationship of veterans' benefits payments to original costs of other major U.S. wars.

[7] Medium-level estimate of 20 percent (high, 30; low, 10) based on figures showing interest payments on war loans as percentage of original costs of other major U.S. wars

[1] Agency for International Development (AID) obligations by year are on a *gross* basis, that is, total new obligations entered into during each year, not adjusted for deobligations of prior years' funds. The cumulative totals shown, however, are on a net basis, reflecting total deobligations during the entire span of years. Excludes reimbursements by the Dept. of Defense for grants.

[2] Includes aid to Indochina prior to partition into Vietnam, Cambodia, and Laos. [3] Includes undistributed.

[1] Military awards for supplies, services, and construction. Net value of contracts of $10,000 or more for work in each State and the District of Columbia (see also "Undistributed"). Figures reflect impact of prime-contracting on State distribution of defense work. Often the State in which a prime contractor is located is not the State in which the subcontracted work is done. See also headnote, table 499. [2] Military and civilian personnel.

[3] Includes contracts of less than $10,000, all contracts awarded for work in the U.S. possessions, the Commonwealth of Puerto Rico, the Trust Territories of the Pacific, and other areas subject to complete sovereignty of U.S., contracts which are in a classified location, and any intragovernmental contracts entered into overseas.

NA Not available. X Not applicable. Z Less than 500.

[1] Union forces only. Estimates of the number serving in the Confederate forces range from 600,000 to 1,500,000. [2] Covers period Dec. 1, 1941, to Dec. 31, 1946. [3] Covers period June 25, 1950, to July 27, 1953. [4] Covers period Aug. 4, 1964 to Jan. 27, 1973. [5] Covers period Apr. 21 to Aug. 13, 1898. [6] Originally organized in 1907: Established as Air Force under the Armed Services Unification Act of 1947. For World War I, known as Aviation Service and included in data for Army; for World War II, known as Army Air Forces and included in data for Army. [7] Included in Army. [8] Established Jan. 28, 1915. [9] Based on Army and Marines only. [10] Excludes Navy. See footnote 11. [11] Covers period July 1950 through January 1955. Represents Far East area only. [12] During hostilities only. [13] Covers war personnel who departed from conterminous United States through December 1898. [14] For periods covered, see footnotes 2, 3, 5, and 11. [15] Covers period Jan. 1, 1961 to Jan. 27, 1973 (date of cease-fire). [16] Includes gassed in action. Army data include casualties in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920; Marine data represent casualties in Europe only. [17] Excludes personnel lost in sinking of the *Maine*, which occurred 2 months before hostilities.

[18] Includes casualties incurred in October 1941, due to hostile action.

[19] Covers only Army personnel base of 1,908,800.

[20] Covers only Army personnel base of 246,410. [21] Covers only Army personnel base of 3,665,000.

[22] Covers all services base of 9,370,986. [23] Covers all services base of 4,428,939. [24] Covers all service base of 2,980,666.

– Represents zero. X Not applicable.

[1] Excludes transfers from appropriations to insurance trust funds from which the actual payments are made. Expenditures from VA Revolving Supply Fund also excluded to avoid duplication.

[2] Includes direct payments to beneficiaries from insurance appropriation, servicemen's indemnities, and benefits and dividends paid from insurance trust funds. Some noncash transactions, e.g., interest credited to dividends left on deposit, also included.

[3] Includes education and training allowances for veterans and servicemen, and educational assistance for wives, widows, sons, and daughters of deceased or totally disabled veterans.

[4] Includes subsistence allowances, tuition, supplies, and equipment for training of disabled veterans.

[5] Includes payments and allowances for various programs such as unemployment and self employment allowances, automobiles and other conveyances for disabled veterans, etc.

[6] Estimated; includes expenditures for hospital and domiciliary care, outpatient medical and dental treatment, medical research, and grants to Republic of Philippines for medical care and treatment of veterans.

[7] Comprises construction and related costs, and amounts transferred to Dept. of Army, Corps of Engineers, for construction of hospitals.

FIG. XXIII. TRENDS IN THE LABOR FORCE: 1961 TO 1974

[See table 542]

Source: Chart prepared by U.S. Bureau of the Census. Data from U.S. Bureau of Labor Statistics.

Section 12

Labor Force, Employment, and Earnings

This section presents statistics dealing with the characteristics of the economically active segment of the population, the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor.

The chief sources of these data are the census of population conducted by the Bureau of the Census (see text, p. 1); the monthly *Employment and Earnings* and *Monthly Labor Review*, issued by the Bureau of Labor Statistics (BLS); and *Farm Labor*, issued monthly by the Statistical Reporting Service (SRS), Department of Agriculture.

Types of data.—Statistics on the labor force, employment status, and jobs shown in this section are derived from two bodies of data. Each measures a different aspect of employment. Data based on household interviews conducted by the Bureau of the Census in the census of population and the Current Population Survey (see below) present information on employment status obtained from workers or members of their households. Each employed worker is counted only once, even though he may have held more than one job during a given period.

Data based on establishment reports are used in BLS industry surveys and in SRS surveys. Workers are counted each time they appear on a payroll during the same period. While population characteristics are obtained only from the household survey, detailed data on wages, hours worked, and labor turnover are more readily obtained from establishment reports.

The census of population provides detailed data for the United States and for each State, standard metropolitan statistical area, county, city, and other area. The data include personal characteristics (sex, age, race, etc.) of persons employed and unemployed, the numbers reported in each occupation and industry, and other items. Monthly data from the Current Population Survey, are published by BLS in *Employment and Earnings* and related publications. Data presented include national totals, by sex, race, and age, of the number of persons in the civilian labor force; the number employed, in nonagricultural industries and in agriculture, along with data on hours of work and occupational groups; the number unemployed and duration of unemployment; and the number of nonworkers, their work experience, and job-seeking intentions.

Employment and Earnings also presents monthly data from establishment surveys on nonagricultural employment, labor turnover, and hours worked. These data are shown for broad groupings in the BLS *Monthly Labor Review*, which also presents statistics on wage rates, industrial relations, and output per man-hour. Certain of these data are shown for States and most standard metropolitan statistical areas (see sec. 34). Historical statistics, in geographic detail, are shown in the BLS Bulletin No. 1370–9, *Employment and Earnings, States and Areas, 1939–71.*

Current Population Survey.—Monthly data on the labor force are collected and compiled for BLS as a part of the Current Population Survey, a nationwide sample survey conducted by the Bureau of the Census. (See text, p. 1.) A detailed discussion of the survey and its methodology appears in *Concepts and Methods Used in Manpower Statistics From the Current Population Survey* (Report No. 313), available on request from BLS. Because the data are derived from a probability sample, they may differ from the figures that would have been obtained if it were possible to take a complete census using the same questionnaire and procedures. Thus, the data are subject to some degree of sampling error which must be taken into account in evaluating changes in the data. According to current computations, the relative sampling error for summary estimates such as civilian labor force, total employment, and nonagricultural employ-

534-000 O - 74 - 23

ment is about 0.3 percent; for agricultural employment and for unemployment, it is roughly 2 to 4 percent. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 19 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than 2½ times the percentage. This sampling variability is illustrative of the variability of data based on the Current Population Survey. For further details, see the explanatory notes in the BLS *Employment and Earnings.*

Statistics obtained from the Current Population Survey may differ from decennial census data because of sampling variability as well as differences in the enumeration process and procedures. For further information, see *U.S. Census of Population: 1970,* vol. I.

Labor force.—Effective in January 1967, the lower limit for official statistics on the labor force was raised from 14 to 16 years of age. Data on employment status, collected each month in the Current Population Survey, relate to activity or status during the calendar week which includes the 12th of the month. Annual figures shown here are 12-month averages.

The *civilian labor force* comprises all civilians classified as employed or unemployed according to the criteria below; the "total labor force" also includes the Armed Forces. *Employed persons* comprise (a) all civilians who, during the survey week, did any work for pay or profit (minimum of an hour's work) or worked 15 hours or more as unpaid workers in a family enterprise, and (b) all persons who were not working but who had jobs or businesses from which they were temporarily absent for noneconomic reasons (illness, bad weather, vacation, labor-management dispute, etc.). *Unemployed persons* comprise all persons not working during the survey week who made specific efforts to find a job within the previous 4 weeks, (such as applying directly to an employer, or to a public employment service, or checking with friends) and who were available for work during the survey week (except for temporary illness). Persons on layoff from a job or waiting to report to a new job within 30 days are also classified as unemployed. All other persons, 16 years old and over, are "not in the labor force."

Changes in methods of measuring employment and unemployment were also introduced in January 1967. They have clarified underlying concepts but have not substantially altered the statistics. A detailed discussion of the changes and their effect on the various series appears in the February 1967 *Employment and Earnings and Monthly Report on the Labor Force.*

Beginning in 1972, information from the 1970 Census of Population was introduced into estimation procedures, producing increases in the civilian noninstitutional population, labor force, and employment totals, but having essentially no effect on unemployment levels and rates. A subsequent population adjustment, introduced in March 1973, affected the statistics by race but had little effect on totals or rates. Further changes in labor force statistics derive from a comprehensive revision in classification of occupations and industries for the 1970 census, and from inclusion of a question on major activities or duties in the December 1971 Survey. As a result, meaningful comparisons of occupational employment levels cannot be made between 1971–72 and prior periods nor between those 2 years. For further explanation of the changes, see the February 1971 and 1972 issues of *Employment and Earnings.*

Employment and earnings.—The monthly estimates and annual averages of nonagricultural employment prepared by BLS are based on voluntary reports from establishments which, in March 1971, employed 11 million manufacturing workers (61 percent of total manufacturing employment at that time), 10 million workers in nonmanufacturing industries except government (26 percent of the total in nonmanufacturing industries), and 8 million Federal, State, and local government employees (60 percent of the total in government). These reports are supplemented by data from other government agencies and adjusted at intervals to data from tabulations of reports under government social insurance programs. The monthly estimates exclude

persons not normally on establishment payrolls, such as proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and the Armed Forces. The employment data are for all employees, both full- and part-time, who received pay for any part of the period reported.

Estimates are available on a continuous basis from 1919 for total nonfarm payroll employment and the 8 major industry divisions. Estimates for other periods are available for several hundred selected industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 277 manufacturing subgroups, and 11 mining industries. Also, estimates for nonsupervisory workers are published at broad levels and in varying detail for wholesale and retail trade, transportation, public utilities, finance, insurance, real estate, and services; estimates for construction workers are published for the contract construction industries; and 402 series are published for the employment of women.

Average weekly hours and average weekly and hourly earnings are available for over 360 series covering production and related workers in manufacturing and mining, construction workers in contract construction, and nonsupervisory workers in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*. Annual estimates of persons 14 years old and over who did farm work for cash wages at any time during the year are published in *The Hired Farm Working Force*. Also reported are days employed, earnings from farm and nonfarm work, personal characteristics of hired farm workers and other pertinent information. These estimates are derived from a survey conducted once a year under contract by the Bureau of the Census for the Economic Research Service.

Output per man-hour.—BLS publishes annual measures of output per man-hour according to two broad concepts. The first, physical output per man-hour, deals with the relationship between production in physical units and man-hours used in production; the second, net output per man-hour, with the relationship between value added (at fixed prices) and man-hours. Both indexes measure the relationship between production and one factor of input—labor time. They do not measure the specific contribution of labor or capital nor the increased efficiency resulting from changes in technology or production procedures.

The indexes of output per man-hour for selected industries are based on the physical output per man-hour concept; measurements relating to the total economy and various sectors are based on the net output per man-hour concept. These indexes are influenced by the divergent movements of various industries which make up the total, as well as by changes in the relative importance of these components.

Labor turnover.—Labor turnover rates are published monthly in the *Monthly Labor Review* and in *Employment and Earnings* for over 220 industries on the basis of reports from cooperating establishments employing over 10 million workers (about 55 percent of the universe surveyed). Labor turnover data are available on a monthly basis from January 1930 for manufacturing as a whole and, from January 1958, for individual industries and industry groups.

Work stoppages.—Statistics on strikes are compiled by BLS and include stoppages, workers involved, and man-days of idleness. Basic data are obtained from the employers and unions involved in strikes. Knowledge of strikes comes from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau presents annual reports in the *Monthly Labor Review* and later, in bulletin form, giving totals for each month of the year and analysis of strikes by industry, State, city, causes, and other classifications.

Historical statistics.—Tabular headnotes provide cross-references, where applicable to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 542. Employment Status of the Noninstitutional Population, by Sex and Race: 1950 to 1974

[**In thousands of persons 16 years old and over.** Annual figures are averages of monthly figures. See *Historical Statistics, Colonial Times to 1957*, series D 1-14 and D 20, for similar but not exactly comparable data]

Year or month, sex, and race	Total noninstitutional population	Labor force								Not in labor force [1]
		Total, including Armed Forces	Percent of population	Civilian labor force						
				Total	Employed			Unemployed		
					Total	Agricultural	Nonagricultural	Number	Percent

No. 550. Marital Status of Women in the Civilian Labor Force: 1940 to 1973

[**Persons 14 years old and over through 1965; 16 years old and over thereafter.** As of March, except as indicated. Prior to 1960, excludes Alaska and Hawaii. Includes institutional population through 1971; excluded thereafter. Figures for 1940 based on complete census revised for comparability with intercensal series. Data for 1944–1972 based on Current Population Survey; see text, p. 1. Beginning 1955, figures not strictly comparable with previous years as a result of introduction into estimating procedure of 1950 census data through 1961, and of 1960 census data beginning March 1962. See also *Historical Statistics, Colonial Times to 1957*, series D 33–35]

Worked 35 or more hours	5,970	5,176	4,129	3,475	2,375	2,255	2,209	2,282	2,265
Percent of total	74.3	74.5	70.7	67.8	65.9	65.1	65.2	65.7	65.6

[1] Includes persons who had a job or business, but did not work at all during entire survey week because of illness, bad weather, vacation, industrial dispute, or various personal reasons, not shown separately.

Source of tables 559–562: U.S. Bureau of Labor Statistics, *Employment and Earnings*, monthly.

No. 563. Nonagricultural Establishments—Employees and Average Weekly Hours: 1950 to 1974

[Prior to 1960, excludes Alaska and Hawaii. Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, self-employed persons, farmworkers, unpaid family workers, domestic servants, and Armed Forces. Data are annual averages adjusted to March 1972 benchmark levels indicated by data from government social insurance programs. See *Historical Statistics, Colonial Times to 1957*, series D 48-56, for related data]

No. 566. Nonagricultural Industries—Number of Employees, 1960 to 1973, and Number and Earnings of Production Workers, 1965, 1970, and 1973

[Covers all full- and part-time employees who worked during, or received pay for, any part of the pay period including the 12th of the month. For mining and manufacturing, data refer to production and related workers; for contract construction industries, to employees engaged in actual construction work; and for other industries, to nonsupervisory employees and working supervisors. See also headnote, table 563. "N.e.c." means not elsewhere classified. See *Historical Statistics, Colonial Times to 1957*, series D 48–56, D 626–641, and D 669–684, for related but not comparable data]

No. 580. Percent Increase in Average Pay for Selected Occupations and in Consumer Prices: 5-Year Period Ending in 1972–73

[Data based on period January 1968–January 1973, except as noted]

Item	Total	Average annual rate	Item	Total	Average annual rate
Private industry:			**Government:**		
Prof., admin., tech., and clerical employees, average salaries:[1]			Police patrolmen and firefighters:[3]		
Clerical and beginning technicians	33.4	5.9	Minimum annual salary scales	42.2	7.3
Entry and development prof. levels, advanced tech. levels, supervisors of nonprof. levels	32.2	5.7	Police patrolmen	42.3	7.3
Fully experienced prof. working levels, supr. of prof. and program admin. levels	33.6	6.0	Firefighters	41.9	7.2
Production and nonsupervisory workers, nonagric. industries:			Maximum annual salary scales	47.8	8.1
Avg. hourly earnings adjusted for overtime[2] (mfg. only) and interindustry employment shifts	37.5	6.6	Police patrolmen	48.5	8.2
			Firefighters	46.4	7.9
			Federal classified employees:[4]		
			Basic annual salary scales	35.6	7.0
			Average annual salary rates	38.0	7.4
			Average annual salaries	48.2	9.1
			Consumer price index	25.2	4.6

[1] Covers the period between June 1968 and March 1973. For further details, see *National Survey of Professional, Administrative, Technical, and Clerical Pay*, Bulletin No. 1804.

[2] Derived from gross hourly earnings by assuming that overtime paid for at rate of time and one-half.

[3] Covers cities with 1970 population of 100,000 or more.

[4] Covers July 1967–April 1972. Basic salary scales reflect only statutory changes in salaries. Average salary rates show statutory changes and the effect of changes in the proportion of workers at each step within the salary ranges for individual grades. Average salaries measure the effect not only of statutory changes in basic pay scales and in-grade salary increases, but also changes in the proportion of workers in various grades.

No. 582. Percent Increase in Average Salaries for Selected Occupations in Private Industry: 1968 to 1973

[Excludes Alaska and Hawaii. Relates to establishments employing 250 workers or more in metropolitan areas and nonmetropolitan areas. Minimum employment was at 250 in manufacturing and retail trade industries, 100 workers in wholesale trade, services, and transportation, communication, and other public utilities; and 50 workers in finance, insurance, and real estate industries. When changes were made in survey coverage, year-to-year percent changes were based on data adjusted to represent same coverage in both years. Based on sample and subject to sampling variability]

No. 584. Percent of Workers Employed in Establishments Having Formal Provisions for Selected Supplementary Wage Benefits, 229 SMSA's: 1972

[Surveys relate geographically to the 229 standard metropolitan statistical areas in the United States, as established by the U.S. Office of Management and Budget through Jan. 1968. Data for half of the areas surveyed relate to late 1971 and early 1972; for the remainder, to late 1970 and early 1971. Data obtained from sample of establishments which employ 50 workers or more, except in 12 of the largest areas where the minimum size was 100 employees for manufacturing, public utilities, and retail trade; see source. Excludes government institutions, and construction and extractive industries. Excludes administrative, executive, and professional employees]

Type of benefit	Plant workers	Office workers
Paid holidays [1]		
No paid holidays	4	(Z)
6 or more days	89	97
7 or more days	77	86
8 or more days	65	75
9 or more days	43	52
10 or more days	21	31
11 or more days	10	18
12 or more days	6	8
Paid vacations [2]		
2 weeks or more:		
After 1 year of service	28	79
After 5 years of service	96	99
3 weeks or more:		
After 5 years of service	19	26
After 10 years of service	72	85
After 15 years of service	84	93
Paid vacations [2]—Con.		
4 weeks or more:		
After 15 years of service	24	26
After 20 years of service	58	69
After 25 years of service	65	77
Health, insurance, and pension plans

No. 585. Recordable Occupational Injury and Illness Rates, by Industry: 1972

[Incidence rates were calculated as: Number of injuries and/or illnesses divided by total hours worked by all employees during calendar year 1972, multiplied by 200,000 as base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks a year). SIC means Standard Industrial Classification.]

No. 592. Labor Unions—Financial Summary, by Type of Union: 1966 to 1972

[For fiscal years ending during calendar year. Data from annual financial reports of labor organizations filed with Department of Labor under provisions of Labor-Management Reporting and Disclosure Act of 1959 (LMDRA) which covers substantially all labor unions in the United States, except those which are State or local central bodies. Classification by type is based mainly on union's self-classification in filed reports]

YEAR AND TYPE OF UNION	Total number of unions	NUMBER OF UNIONS BY SIZE OF RECEIPTS					Assets (mil. dol.)	Liabilities (mil. dol.)	Receipts (mil. dol.)	Disbursements (mil. dol.)
		Under $10,000	$10,000–$49,999	$50,000–$99,999	$100,000–$999,999	$1,000,000 and over

No. 594. Work Stoppages: 1950 to 1972

[Prior to 1960, excludes Alaska and Hawaii. Excludes work stoppages involving fewer than 6 workers or lasting less than 1 day. Information obtained directly from companies and unions involved as well as from various Government labor boards, conciliation services, and other neutral parties. See also *Historical Statistics, Colonial Times to 1957*, series D 764–769 and D 774]

YEAR	WORK STOPPAGES BEGINNING IN YEAR		WORKERS INVOLVED		MAN-DAYS IDLE DURING YEAR		
	Number	Average duration (calendar days)	Number [1] (1,000)	Percent of total employed [2]	Number (1,000)	Percent of estimated working time [3]	Per worker involved
1950	4,843	19.2	2,410	5.1	38,800	0.33	16.1
1955	4,320	18.5	2,650	5.2	28,200	0.22	10.7
1960	3,333	23.4	1,320	2.4	19,100	0.14	14.5
1965	3,963	25.0	1,550	2.5	23,300	0.15	15.1
1966	4,405	22.2	1,960	3.0	25,400	0.15	12.9
1967	4,595	22.8	2,870	4.3	42,100	0.25	14.7
1968	5,045	24.5	2,649	3.8	49,018	0.28	18.5
1969	5,700	22.5	2,481	3.5	42,869	0.24	17.3
1970	5,716	25.0	3,305	4.7	66,414	0.37	20.1
1971	5,138	27.0	3,280	4.6	47,589	0.26	14.5
1972	5,010	24.0	1,714	2.3	27,066	0.15	15.8

[1] Workers counted more than once if involved in more than 1 stoppage during year.
[2] In 1967, total employed workers were redefined to coincide with the U.S. Bureau of Labor Statistics figures for nonagricultural employment, plus agricultural wage and salaried workers. Idleness computed on this basis is lower than the former series.
[3] Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

FIG. XXV. TRENDS IN MEDIAN FAMILY INCOME IN 1971 DOLLARS: 1951 TO 1971

Source: U.S. Bureau of the Census.

Section 13

Income, Expenditures, and Wealth

This section presents statistics on two different aspects of income and expenditures: One aspect relates to the national income and product system (a summation reflecting the entire complex of the Nation's economic activities and the interaction of its major components) and the other to the distribution of income to families and individuals. Statistics on national wealth are also included in this section. Figures from the flow-of-funds accounts, a financial view of the economy, appear in section 16.

The primary source for national income and product information is *Survey of Current Business*, published monthly by the Department of Commerce, Bureau of Economic Analysis. The complete set of national income and product tables for the 1969–72 period is published in the July 1973 *Survey*. Figures for 1968 may be found in the July 1972 *Survey*. For the 1964–1967 period, these figures are available in *U.S. National Income and Product Accounts*, 1964–67. Corresponding information for earlier years, with data starting in 1929 in most cases, is published in *The National Income and Product Accounts of the United States, 1929–1965, Statistical Tables*, a supplement to the *Survey*. Summary estimates for current periods appear in the most recent issue of the *Survey*. The basic reference sources for concepts and methodology are *National Income, 1954 Edition; U.S. Income and Output, 1958;* the August 1965 issue of the *Survey;* and *Readings in Concepts and Methods of National Income Statistics.*

The major source of data on income distribution is the Bureau of the Census (Census of Population and Current Population Survey). Annual data on income distribution by size-class appear in *Current Population Reports—Consumer Income*, series P–60. A brief description of the Current Population Survey, which is the basis for the data in that report, is given on page 1 of this edition of the *Statistical Abstract.*

A former primary source of information on income distribution was the national Survey of Consumer Finances conducted annually from 1946–1971 by the Survey Research Center of The University of Michigan. The results of these surveys are published in a monograph series, *Survey of Consumer Finances.*

Gross national product.—Gross national product (GNP) is the total national output of goods and services valued at market prices. It can be viewed in terms of expenditure categories. These categories comprise purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP measures the output attributable to the factors of production—labor and property—supplied by residents of the United States. GNP differs from "national income" mainly in that GNP includes allowances for depreciation and for indirect taxes (such as sales and excise taxes).

National income.—National income is the aggregate earnings of labor and property which arise in the current production of goods and services by the Nation's economy. It is the sum of compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of direct taxes on those earnings.

Personal income.—Personal income is the current income received by persons from all sources net of contributions for social insurance. Not only individuals (including owners of unincorporated enterprises), but nonprofit institutions, private trust funds, and private health and welfare funds are classed as "persons." Personal income includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons and Federal military pay in kind. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms.

Disposable personal income is the income remaining to persons after deducting personal tax and nontax payments to general government. It is the income of persons available for spending or saving.

Distribution of income by size-class.—Money income statistics are based on data collected in various field surveys of income conducted since 1936. In each of these field surveys trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social-security taxes unless otherwise specified in individual tables. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is "personal income."

Individuals' saving and assets.—The Board of Governors of the Federal Reserve System issues detailed estimates of individuals' saving based on flow of funds accounts and showing the increase in financial assets, net investment in tangible assets, less increase in debt of individuals. (See section 16.) Data back to 1946 are available upon request from the Federal Reserve.

The Survey Research Center of The University of Michigan also collected, from 1946 to 1971, annual data on assets, usually including the distribution of liquid assets, and occasional data covering positive, negative, and net savings of families, by income groups.

National wealth.—The national wealth data shown in table 652 are drawn from Supplementary Volume I of the *Institutional Investor Study Report of the Securities and Exchange Commission.* They are, in large part, an updating of data from R. W. Goldsmith, *A Study of Saving in the United States* and *The National Wealth of the United States in the Postwar Period.* As is the case in all national wealth estimates, the figures are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth over long periods. Definitions and analytical details are presented in the source publication.

Current and constant dollars.—Several of the series in this section are expressed both in current dollars and in constant dollars. Data shown in current dollars are unadjusted for comparability with respect to prices over a period of time; that is, the dollars shown are in terms of the level of prices prevailing for each of the years specified. Data shown in constant dollars are computed values which eliminate the effect of price changes. Constant dollars are derived by dividing current-dollar figures by their corresponding price indexes based on a year specified as 100.

GNP implicit price deflator.—The implicit price deflator is the ratio of GNP in current prices to GNP in constant prices. It is a weighted average of the price indexes used to deflate the components of GNP, the implicit weights are expenditures in the current period valued in prices of the base year 1958. The deflator measures the price change of a particular "market basket" since 1958.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 598. Gross National Product—Summary: 1929 to 1973

[**In billions of dollars.** Prior to 1960, excludes Alaska and Hawaii. For definition of gross national product, see text, p. 371]

No. 603. Gross Product by Industry, in Current and Constant (1958) Dollars: 1950 to 1972

[**In billions of dollars.** This series shows gross product at market prices by industry in current and constant dollars. The current-dollar data differ from national income by industry (table 610) for two reasons: (1) Non-factor charges against gross product are included; and (2) profits have been shifted from a company to an establishment basis]

No. 610. National Income, by Industrial Origin: 1950 to 1973

[**In billions of dollars, except percent.** Prior to 1960, excludes Alaska and Hawaii. Originating in each industry is the sum of factor costs incurred by the industry in production. Hence, it is net value added to production by industry, measured at factor costs. See also *Historical Statistics, Colonial Times to 1957*, series F 22-33]

[1] Income disbursed directly to persons by Federal, State, and local governments. Comprises wages and salaries (net of employee contributions for social insurance), other labor income, interest, and transfer payments.

[2] Net income of farm proprietors, farm wages, and farm "other" labor income, less personal contributions under the old-age, survivors, disability, and health insurance program.

No. 614. Money Income—Percent Distribution of Families, by Income Level, by Race of Head: 1947 to 1972

[Families as of March of following year. Prior to 1960, excludes Alaska and Hawaii. Based on sample; see text, p. 1. Includes members of the Armed Forces living off post or with their families on post (in 1972, about 979,000) but excludes all other Armed Forces. Includes small number of families with no money income. Excludes inmates of institutions. For definition of family, see text, p. 3. For definition of median, see preface]

Race of head and year	Percent distribution by income level											Median	
	Under $1,000	$1,000–$1,999	$2,000–$2,999	$3,000–$3,999	$4,000–$4,999	$5,000–$5,999	$6,000–$6,999	$7,000–$9,999	$10,000–$14,999	$15,000–$24,999	$25,000 and over	Income	Index (1947=100)

No. 632. Average Low Income Level for Nonfarm Families and Individuals, by Size of Family and Sex of Head: 1959, 1971, and 1972

[**In dollars.** Data exclude inmates of institutions, members of Armed Forces living in barracks, and unrelated individuals under 14 years of age. Families and unrelated individuals are classified as being above or below the low income level, using the poverty index adopted by a Federal Interagency Committee in 1969. This index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the differing consumption requirements of families based on their size and composition, sex and age of the family head, and farm-nonfarm residence. The low income cutoffs for farm families have been set at 85 percent of the nonfarm levels. These cutoffs are updated every year to reflect the changes in the Consumer Price Index. For further details, see source]

SIZE OF FAMILY	1959			1970			1972		
	Total nonfarm	Male head [1]	Female head [1]	Total nonfarm	Male head [1]	Female head [1]	Total nonfarm	Male head [1]	Female head [1]

No. 634. Persons and Families Below Low Income Level—States: 1959 and 1969

[**Number in thousands.** Persons and families as of April 1960 and 1970. For 1959, excludes all persons in group quarters. For 1969, excludes unrelated individuals under 14 years of age and specified types of group quarters, i.e. inmates of institutions, persons in Armed Forces living in barracks, and college students living in dormitories. Low income criteria computed on a national and farm-nonfarm basis only and not adjusted for regional, State, or other local variations in cost of living. See headnote, table 632]

No. 635. Persons Below Low Income Level and Aggregate Income Deficit by Race of Head and Family Status: 1959 to 1972

[**Number in thousands; amounts in millions of 1972 dollars, except percent.** Families and unrelated individuals as of March of following year shown. Income deficit defined as the difference between the total income of families and unrelated individuals below low income level and their respective low income thresholds. In computing the income deficit, families reporting a net income loss are assigned zero dollars; for such cases, the deficit is equal to the low income level. See headnote, table 632]

– Represents zero. Z Less than $0.05 billion.

[1] Programs that actively promote education, the development of work skills, and community and economic development.

[2] Programs that provide income support and certain non-cash support and services.

[3] These figures show an apparent decrease because the public assistance-Medicaid payment for the first month of fiscal year 1973 was advanced to the States during the last month of fiscal year 1972. However, aggregate benefits actually received by assistance recipients did not decrease.

[4] 1964 figure represents pre-Medicaid medical assistance programs under public assistance titles of the Social Security Act.

[5] Increases in overall Medicare benefits were more than offset by decreases in the proportion of Medicare beneficiaries in poverty, causing Medicare benefit outlays for the poor to show a decline.

[6] Programs initiated under the authority of the Economic Opportunity Act of 1964. Outlays for these programs appear in the Office of Economic Opportunity, Labor, Health, Education, and Welfare, and "All others" lines.

[7] Railroad Retirement Board, Interior (Bureau of Indian Affairs), Commerce (Economic Development Administration), Civil Service Commission, Action, Small Business Administration, and Postal Service.

Public	34.5	79.0	117.4	144.2	(X)	(X)	(X)	(X)

X Not applicable. [1] Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (*a*) reducing each year's gross capital expenditures in current prices to 1958 price level by means of appropriate construction cost or wholesale price indexes; (*b*) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1958 prices; (*c*) cumulating net capital expenditures for as many years backwards as corresponds to the assured length of life of the type of asset involved.

[2] Current dollar estimates are based on book values; constant dollar estimates reflect book values reduced by means of wholesale price indexes.

[3] Private farm land estimates based on census or similar data. Private nonfarm land estimates are derived by application of rough ratios of land to structure values for different types of real estate. Excludes subsoil assets.

Section 14

Prices

This section presents indexes of wholesale and consumer prices, actual prices for selected commodities and budgets for urban families and retired couples. The primary sources of these data are monthly publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review; Consumer Price Index; Estimated Retail Food Prices by Cities; Retail Prices and Indexes of Fuels and Utilities;* and *Wholesale Prices and Price Indexes.* The Bureau of Economic Analysis of the Department of Commerce is the source for the gross national product (GNP) implicit price deflator figures; see p. 405. The Statistical Reporting Service of the Department of Agriculture prepares indexes of prices received and prices paid by farmers; see section 23, Agriculture.

The Bureau of Labor Statistics prepares monthly indexes of wholesale prices for a large selection of commodities; monthly indexes of consumer prices for both commodities and services; and weekly indexes of spot market prices for 22 commodities. The single year 1967 is currently the standard reference base period for these and other general purpose index numbers prepared by Federal agencies. Wholesale and consumer price indexes were changed to the 1967 base effective with the release of data for January 1971. Indexes on the 1957–59 base appear, through 1969, in the 1970 edition of the *Statistical Abstract;* price indexes for later years on a 1957–59 base may be obtained from the Bureau of Labor Statistics.

Wholesale price index.—This index, dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of all commodities produced or imported for sale in primary markets in the United States. "Wholesale" refers to sales in large quantities, not to prices received by wholesalers, jobbers, or distributors.

The index has undergone several revisions (see *Monthly Labor Review*, February 1962). It is now based on approximately 2,690 commodity price series instead of the approximately 1,900 included in the 1947–60 period and the 900 included for the period prior to 1947. Prices used in constructing the index are collected directly from sellers, if possible, and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price, the importer's selling price, or the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value of commodities produced or processed in this country, or imported. The values are f.o.b. production point and are exclusive of excise taxes, interplant transfers, military products, and goods sold directly at retail from producing establishments. Effective January 1967, the weights are values of net shipments of commodities as derived from the industrial censuses of 1963 and other data.

Consumer price index.—This index measures the average change in prices of all types of consumer goods and services purchased by city wage earners and clerical workers. The weights used in calculating the index are based on studies of actual expenditures by wage earners and clerical workers. The quantities and qualities of the items in the "market basket" remain the same between consecutive pricing periods, so that the index measures the effect of *price change only* on the cost of living. The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

A study conducted during 1917–19 provided the weights used until 1935. Since then, this index has undergone four major revisions, which involved bringing the "market basket" of goods and services up to date, revising the weights, and improving the sample and methodology. The most recent revision, incorporated in a new series beginning in 1964, introduced expenditure weights relating to 1960–61. The description which follows and the tables in this section refer to the new series.

The list of items currently priced for the index includes approximately 400 goods and services. For some items, several different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. All taxes directly associated with the purchase or continued use of the items priced are included in the index.

Currently, the national index is based on prices collected in 56 areas. These include the urban portions of 37 standard metropolitan statistical areas (SMSA), the more extensive standard consolidated areas for Chicago and New York-Northeastern New Jersey; and 17 nonmetropolitan urban places. Area definitions are those established for the 1960 census and do not include any subsequent revisions. Foods, fuels, and a few other items are priced monthly in all areas. Prices of most other goods and services are obtained monthly in the 5 largest areas and every 3 months in other areas. Rents are surveyed bimonthly in the 5 largest areas and every 3 months in other areas. Between scheduled survey dates, prices are held at the level of their last pricing for all goods and services except new automobiles. Price data for the 56 areas are combined for the United States with weights based on 1960 population of the several areas represented by each sample area. Separate indexes are compiled for 23 of the 56 areas.

Consumer price index: Food component.—Food price indexes are computed as a subgroup of the consumer price index. Weights used at various times are consistent with those for the index as a whole. The indexes have been computed from prices of varying numbers of foods during different periods. They were based on 60 foods from 1950 through 1952, 90 foods from 1953 through 1963, and 96 foods beginning January 1964.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 656. Purchasing Power of the Dollar: 1940 to 1973

[1967=$1.00. Wholesale prices prior to 1961, and consumer prices prior to 1964, exclude Alaska and Hawaii. Obtained by dividing the average price index for the 1967 base period (100.0) by the price index for a given period and expressing the result in dollars and cents]

No. 659. Indexes of Spot Primary Market Prices: 1950 to 1974

[1967=100. Index computed daily through 1968; weekly beginning 1969; represents unweighted geometric average of price quotations of 22 commodities, traded on organized exchanges. This index is much more sensitive to changes in market conditions than is a monthly or weekly wholesale price index]

ITEM	Number of commodities	June 20, 1950	June 14, 1955	June 14, 1960	June 15, 1965	June 11, 1968	June 10, 1969	June 16, 1970	June 15, 1971	June 13, 1972	June 12, 1973	April 9, 1974
All commodities	22	104.0	106.3	100.5	106.2	96.0	111.3	113.6	108.2	119.5	171.3	229.8

No. 663. Wholesale Prices of Selected Commodities: 1960 to 1974

[In dollars per unit. Annual averages. See *Historical Statistics, Colonial Times to 1957*, series E 101–112, for selected items]

ITEM	1960	1965	1970	1971	1972	1973	1974, Apr.
Farm products:							
Wheat, hard winter, No. 1, Kansas City [1]—bu.	1.99	1.56	1.48	1.58	1.84	3.58	4.09
Steers, choice—100 lb.	26.71	25.72	30.04	32.19	35.71	44.90	41.80
Cotton, raw [2]—lb.	.314	.303	.251	(NA)	.342	.561	.63
Wool, combing and staple—lb.	1.16	1.25	1.03	.666	1.15	2.50	(NA)
Eggs, fancy, heavy weight [3]—doz.	.409	.380	.432	.343	.405	.646	.62
Corn, No. 2 yellow, Chicago—bu.	1.16	1.30	1.37	1.40	1.30	2.24	2.66
Processed foods:							
Flour, Kansas City—100 lb.	4.99	5.47	5.57	5.45	5.87	8.52	9.74
Beef, choice—100 lb.	44.88	43.05	48.93	53.51	56.60	[4] 69.18	66.37
Milk, Chicago—qt.	.238	.265	(NA)	(NA)	[5] .482	(NA)	(NA)
Sugar, granulated (excl. excise tax)—lb.	.087	.095	.112	.117	.123	.133	.226
Coffee, tin—lb.	.699	.803	.951	[5] .925	.961	1.07	1.20
Lard, refined, cartons, Chicago—lb.	1.35	.176	.168	[6] .157	.158	.254	.325
Textile products:							
Cotton sheeting, Class A—yd.	.223	.225	(NA)	.261	.311	(NA)	(NA)
Suits, men's, medium grade—each	44.44	(NA)	(NA)	67.95	70.68	75.98	83.78
Hides, skins, leather, and leather products:							
Cattlehides, packer, heavy native, steer—lb.	.138	.143	.129	.144	.296	.343	.263
Cattlehide leather, upper workshoe, elk—sq. ft.	.375	.464	(NA)	(NA)	.768	(NA)	(NA)
Oxfords, men's, elk or kip side upper—pair	(NA)	5.89	7.39	(NA)	8.51	9.31	10.24
Fuel, power, and lighting materials:							
Coal, anthracite, chestnut—sh. ton	13.95	12.98	16.57	17.67	18.23	20.04	26.03
Coal, bituminous, large domestic sizes—sh. ton	(NA)	6.93	[4] 9.27	(NA)	11.37	(NA)	(NA)
Gasoline, Oklahoma—gal.	.117	.112	.118	.120	.119	(NA)	(NA)
Distillate fuel oil, No. 2, N.Y. harbor—gal.	.095	.090	.108	.116	.117	(NA)	(NA)
Chemicals and allied products:							
Sulfuric acid—ton	22.35	23.51	32.30	31.45	31.45	32.38	33.315
Benzene—gal.	.340	.263	.243	.228	.232	.278	.657
Paint, outside—gal.	4.81	(NA)	[6] 5.67	5.85	5.96	6.19	7.16
Turpentine—gal.	.489	.545	(NA)	[6] 1.20	1.16	[4] .828	(NA)
Rubber and rubber products:							
Natural rubber, No. 1 ribbed, smoked sheets—lb.	.385	.257	.211	.180	.181	.351	.428
Synthetic rubber, butyl, Grade I type—lb.	.230	(NA)	(NA)	.250	.256	.262	.300
Reclaimed rubber—lb.	.110	.115	.115	(NA)	.112	.113	.125
Lumber and wood products:							
Softwood plywood, interior grade—1,000 sq. ft.	(NA)	(NA)	(NA)	(NA)	87.79	111.61	145.60
Flooring, maple—1,000 bd. ft.	208.95	210.54	[6] 282.37	304.46	321.34	405.05	500.97
Pulp, paper, and allied products:							
Woodpulp, sulphate, bleached—sh. ton	156.21	147.50	161.50	164.67	163.00	188.12	254.58
Book paper, A grade—100 lb.	16.85	16.78	19.51	[5] 18.94	18.71	19.29	23.03
Newsprint, standard—ton	134.40	132.40	150.50	157.00	163.20	170.44	205.13
Toilet tissue—case	7.38	7.08	9.07	(NA)	9.31	9.57	11.30
Paper towels—case	4.11	4.07	4.46	(NA)	4.79	4.87	5.44
Grocery bags—1,000	4.75	4.69	5.30	4.72	5.24	5.97	6.36
Metal and metal products:							
Iron ore, Mesabi, non-Bessemer—long ton	11.45	10.55	10.78	11.17	11.17	11.84	11.91
Iron and steel scrap, No. 1 heavy melting [7]—long ton	32.96	35.17	42.04	36.81	38.33	57.20	117.50
Steel rails, standard [8]—100 lb.	5.83	5.83	6.80	7.59	8.00	8.35	9.28
Copper wirebar, domestic origin—lb.	.325	.354	(NA)	.525	.512	.593	.686
Aluminum ingot—lb.	(NA)	.245	.288	.227	.224	(NA)	(NA)
Aluminum sheet—lb.	.468	(NA)	.463	.472	.439	.440	.523
Nails, wire, 8d, common [9]—50 lb.	9.60	4.65	(NA)	5.51	5.90	6.21	8.37
Nonmetallic mineral products:							
Brick, building—1,000	(NA)	30.46	(NA)	(NA)	42.17	45.57	48.64
Glass, window, single B—50 sq. ft.	(NA)	5.35	6.60	(NA)	7.32	7.78	8.66
Shingles, asphalt roofing, strip—square	5.26	5.88	(NA)	7.34	7.75	8.30	11.24
Miscellaneous:							
Cigarettes, nonfilter tip (excl. excise tax)—1,000	4.28	4.62	[6] 5.83	5.95	6.04	6.25	6.28
Soybean meal—ton	52.58	(NA)	79.08	77.60	105.72	234.00	117.00
Bran—ton	37.40	38.96	43.00	42.25	46.00	79.88	84.00

NA Not available. [1] Prior to 1965, No. 2 hard winter wheat. [2] 1960 price for 1″; 1965, for 15 market average; 1969, for 1 1/16″ middling for 12 spot market averages. [3] Prior to 1965, eggs, extras, New York. [4] 10-month average. [5] Price per ½ gallon. [6] 11-month average. [7] Consumers' buying price, including brokerage, delivered, Pittsburgh district. [8] Standard, carbon steel, No. 1 open hearth, 115 lb. per linear yard, control cooled, base quantity, f.o.b. mill. [9] Jan.–Aug. 1960 price packed in fiberboard boxes; Sept. 1960, lots of 30,000 lb.; prior to 1965, price is for units of 100; thereafter, for units of 50.

No. 664. Average Prices (Unit Values)—Selected Articles Exported and Imported: 1960 to 1973

[**In dollars per unit.** Includes trade of Puerto Rico with foreign countries. Values of goods imported represent market values in foreign country from which imported. Unit values obtained by dividing annual values of imports or domestic exports by annual quantities. Values of goods exported represent values at port of exportation. Unit values may show actual price movements only roughly for commodities subject to considerable price variations among different grades, methods of packing, etc., and to year-to-year variations in proportions of grades, etc. Unit values of agricultural exports also include effects of CCC sales for exports, at prices well below U.S. market quotations, and of other Government programs]

ARTICLE	1960	1965	1968	1969	1970	1971	1972	1973
EXPORTS								
Wheat—bu.	1.69	1.63	1.68	1.64	1.58	1.69	1.74	2.94
Milled rice, less than 75% broken kernels—lb.	.066	.072	.086	.080	.079	.080	.093	.161

No. 665. Consumer Price Indexes, by Major Groups: 1945 to 1974

[1967=100. Prior to 1965, excludes Alaska and Hawaii. Beginning 1965, index structure revised to reflect buying patterns of urban wage earners and clerical workers in the 1960's, including single workers living alone as well as families of two or more persons; indexes for prior years apply only to families of two or more persons. See *Historical Statistics, Colonial Times to 1957*, series E 113–139, for indexes on 1947–49 base]

[1] Not intended to represent a minimum or subsistence level.
[2] Metropolitan areas as defined in May 1967; for definition, see text, section 34.
[3] Places with 2,500–50,000 population in 1960. [4] Includes the weighted average cost of renter and homeowner shelter, housefurnishings, and household operations. Four-person families in the lower budget are assumed to be renters. A small allowance for lodging away from home city is included in the higher budget. [5] Includes gifts, contributions, life insurance, and occupational expenses. [6] Includes gifts and contributions and, at the intermediate and higher levels, an allowance for life insurance and personal income taxes.

No. 672. Retail Price Indexes of Food—Selected Areas for Urban Wage Earners and Clerical Workers: 1950 to 1973

[**1967=100.** See text, p. 404, and headnote, table 666. Through 1960, indexes applied only to families of 2 persons or more in urbanized area. Beginning 1965, area indexes represent entire urban portion of standard metropolitan statistical area, except that standard consolidated area is used for Chicago and New York; see text, sec. 34. See *Historical Statistics, Colonial Times to 1957*, series E 114–120, for indexes on a 1947–49 base]

NA Not available. [1] Based on 56 cities for 1950, 46 cities for 1955 and 1960, an average of 50 urban areas for 1965, and 56 areas beginning 1968. 1960 and earlier years exclude Alaska and Hawaii. [2] "Food at home" only. [3] See footnote 2, table 667.

Source: U.S. Bureau of Labor Statistics, *The Consumer Price Index, U.S. City Average and Selected Areas*, monthly.

No. 673. Average Retail Prices of Selected Foods: 1960 to 1974

[**In cents per pound, except as indicated.** Prior to 1965, excludes Alaska and Hawaii, and represents averages of prices reported by retail dealers in cities included in the Retail Food Index. Beginning 1965, data are estimated averages of prices reported by retail dealers. Number of cities varies according to the number of cities in which an item was priced and the availability of prices within the cities. Excludes sales taxes. Prices for individual cities combined on basis of population weights. See also *Historical Statistics, Colonial Times to 1957*, series E 161–176]

FIG. XXVIII. POPULAR VOTE CAST FOR PRESIDENT, BY MAJOR PARTY: 1932 TO 1972

[See table 680]

Source: Chart prepared by U.S. Bureau of the Census.

Section 15

Elections

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on Congressional legislation, population of voting age, voter participation, and campaign expenditures.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election.* Congressional Quarterly Inc., Washington, D.C., publishes a special report, *Complete Returns of the 19—Elections by Congressional District,* in March or April of each odd-numbered year, presenting the results of presidential, congressional, and gubernatorial elections. Federal and State election statistics appear also in *America Votes,* issued biennially by the Governmental Affairs Institute, Washington, D.C.; and data on Federal elections appear in the *Congressional Directory,* United States Congress, and in official State documents.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for candidates, except for Federal offices and, in most States, for State offices. The conduct of elections is regulated by State laws or, in some cities and counties, by local charter. An exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States, and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. The 24th Amendment to the Constitution, adopted in 1964, gave citizens the right to vote in any election for Federal office without payment of tax.

Presidential election.—The election of the President is provided for in the Constitution, article II, section 1, through establishment of an electoral college in each State, for each presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States. The 22d Amendment to the Constitution, adopted in 1951, limits presidential tenure to 2 elective terms of 4 years each, or to 1 elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years. The 23d Amendment, adopted in 1961, grants the District of Columbia electors for President and Vice President.

Congressional election.—The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912, it has remained constant at 435. However, the legislation granting statehood to Alaska and Hawaii allotted 1 Representative to each of those States and, during 1960 to 1962, increased the total of members to 437. The total reverted to 435 after reapportionment following the 1960 Census. The Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers. . . ." The Constitution also requires that each State have at least 1 Representative. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 100 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the State legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 680. Vote Cast for President, 1900 to 1972, and for Representatives, 1932 to 1972, by Political Parties

[Prior to 1958, excludes Alaska and Hawaii. Vote cast for major party candidates includes the votes of minor parties cast for those same candidates. See also *Historical Statistics, Colonial Times to 1957*, series Y 27–31 and Y 146–149]

No. 687. Apportionment of Membership in House of Representatives, by States: 1790 to 1970

[Population figures used for apportionment purposes are those determined for States by each decennial census. No reapportionment based on 1920 Population Census. For method of calculating apportionment and a short history of apportionment, see House Report 91-1314, 91st Congress, 2d session; *The Decennial Population Census and Congressional Apportionment*. See also *Historical Statistics, Colonial Times to 1957*, series Y 155-204]

X Not applicable.
[1] Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See footnote 4.
[2] Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 4.
[3] Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192).
[4] Assigned after apportionment. [5] Included in apportionment act in anticipation of statehood.
[6] Included in the 20 members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 689. Vote Cast for United States Representatives, by Major Political Parties, by States: 1968, 1970, and 1972

[**In thousands, except percent.** In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Alaska, Delaware, Nevada, Vermont, and Wyoming, only 1 Representative was elected from the State at large. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party as such are cast in endorsement of a candidate of another party, votes are counted as for the endorsing party. See also footnotes below]

X Not applicable. [1] Includes vote cast for minor parties. [2] Excludes District of Columbia.
[3] Arkansas law does not require tabulation of votes for unopposed candidates. 1968 data for 1st and 3d Districts; 1970 and 1972 data for 3d District only.
[4] As of 1970, Florida and Oklahoma do not require tabulation of votes for unopposed candidates. In 1972, all but 1st, 2d, and 9th Districts were counted for Florida.
[5] In 1968, voters entitled to vote for any 2 candidates; total ascertained by adding the highest vote received by a single candidate in each political party; in 1970 there were two separate districts.
[6] Election by districts in 1968 and 1970. [7] Includes endorsing votes cast by other parties for Democratic and Republican candidates. [8] In 1970, includes "provisional votes."

No. 703. Participation in National Elections, by Population Characteristics: 1968 and 1972

[**Persons in thousands.** As of November. Covers civilian noninstitutional population. For 1968, persons 18 years old and over in Georgia and Kentucky, 19 and over in Alaska, 20 and over in Hawaii, and 21 and over elsewhere; for 1972, persons 18 years old and over in all States. Includes aliens. Figures are based on a population sample (see text, p. 1) and differ from those in tables 702 and 704 based on population estimates and official vote counts. Differences in percentages may also be due to overreporting of voting by persons in the sample. Excludes persons who did not report whether or not they had voted]

No. 708. Election Campaign Costs for National Offices: 1960 to 1968

[**Money figures in thousands of dollars.** Covers expenditures officially reported to the Clerk of the House and the Secretary of the Senate. Cost of political activities at all levels, including primaries and intrastate committees, estimated by Citizens' Research Foundation at $200 million for 1964 and $300 million for 1968. Known campaign debts not actually reported are added to reported expenditures to determine total spending. Data in this table not comparable with those in 709. See headnote to table 709.

ITEM	1960	1964	1968 [1]
Campaign costs	32,896	47,763	69,999
National spending	28,074	38,601	62,765
Expenditures reported	23,504	37,401	61,765
Debt	4,570	1,200	1,000
Congressional spending	4,822	9,162	8,483
Democratic	2,250	5,736	4,974
Republican	2,524	3,369	3,184
Third party	48	58	325
Less lateral transfers	–	–	*1,249*
Democratic committees:			
Number reporting	29	49	97

Number reporting	22	34	66
Spending	873	2,121	4,869
Percent of national spending	3.1	5.5	7.8

– Represents zero. X Not applicable. [1] Lateral fund transfers between national level committees have been deducted from expenditures and receipts except for the labor and miscellaneous committees expenditures, which represent total reported spending, even when some of the funds were transferred to other committees. The lateral transfers by labor committees, $1,035,000, and by miscellaneous groups, $214,000, are subtracted to avoid counting them twice in total "campaign costs." [2] Democratic National Committee debt: Covers only unpaid post-convention presidential campaign expenses; excludes some $5 million in unpaid loans.

No. 709. Election Campaign Costs for National Offices: 1972

[**Money figures in millions of dollars.** Covers some prenomination expenditures. Data are provided by the U.S. General Accounting Office, Office of Federal Elections (O.F.E.), newly created to administer the Federal Elections Campaign Act of 1971, effective as of April 7, 1972. Previously, only committees operating in two or more States were required to report receipts and expenditures. In 1968 there were 222 such committees, not all of which contributed to a presidential campaign. The new requirement of comprehensive disclosure resulted in 1,785 committees filing reports with the O.F.E. in 1972, all of which contributed in some way, but not exclusively to a presidential candidate. Except for Congressional spending, all other figures are from the O.F.E]

ITEM	1972	ITEM	1972
Campaign costs	**219.0**	Republican committees:	
		Number reporting	418
National spending	138.2	Spending	71.4
Congressional spending	[1] 80.8	Percent of national spending	51.7
		Third party committees:	
Democratic committees:		Number reporting	57
Number	1,048	Spending	.8
Spending	65.2	Percent of national spending	.5
Percent of national spending	47.1	Miscellaneous committees: [2]	
		Number	262

Section 16

Banking, Finance, and Insurance

Flow of funds.—The flow of funds accounts of the Federal Reserve System (see tables 712 to 718) bring together statistics on all of the major forms of financial transactions and financial claims to present an economy-wide view of asset and liability relationships. In flow form, the accounts relate borrowing and lending to one another and to the nonfinancial activities that generate income and production. Each claim outstanding is included simultaneously as an asset of the lender and as a liability of the debtor. The accounts also indicate the balance between asset totals and liability totals over the economy as a whole. Data included here present end-of-year asset and liability positions in financial claims rather than flows that occurred during the year. Summary flow data are available in the *Federal Reserve Bulletin;* a discussion of the concepts and organization of the accounts appears in *Flow of Funds Accounts, 1945–1968,* published by the Board of Governors of the Federal Reserve System.

Banking system.—Banks in this country are organized under the laws of both the States and the Federal Government. State-chartered banks are supervised by officials of the respective States. "National" banks are supervised by the Comptroller of the Currency. *Reports of Condition* have been collected from national banks since 1863. Summaries of these reports are published in the Comptroller's *Annual Report,* which also presents data on the structure of the national banking system.

The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the U.S. Treasury. It includes national banks and such State banks as voluntarily join the System. Statements of State bank members are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the System. Balance sheet data for member banks are published in condensed form in the *Federal Reserve Bulletin.*

The Federal Deposit Insurance Corporation, established in 1933, insures each depositor up to $20,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund. From 1947 through 1968, a balance sheet for all banks in the country was published semiannually by the Corporation in *Assets, Liabilities, and Capital Accounts—Commercial and Mutual Savings Banks.* Since mid-1969, this volume has been a joint publication of the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System, and the Comptroller of the Currency. An abbreviated balance sheet for all commercial banks has been published monthly by the Board of Governors of the Federal Reserve System.

Savings and loan and other credit agencies.—Government corporations and credit agencies make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. Data on operations of Government credit agencies, along with other Government corporations, are available in reports of individual agencies; data on their assets and liabilities are published in the *Treasury Bulletin.*

Among other types of credit agencies, the most important are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Federal Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are published principally by The Spectator and by the Institute of Life Insurance in its *Life Insurance Fact Book.* Consumer credit data are published currently in the *Federal Reserve Bulletin.*

Federally chartered credit unions are under the supervision of the National Credit Union Administration, established in 1970. That agency also administers the Federal program under which savings accounts of members of all Federal credit unions and of qualified State-chartered credit unions are insured up to a maximum of $20,000. State-chartered credit unions are supervised by the respective State supervisory authorities. Comprehensive program and statistical information on all Federal and federally-insured State credit unions is published each year in the *Annual Report of the National Credit Union Administration.* The Administration, through the cooperation of the State supervisory authorities, also compiles and publishes an *Annual Report* on the operations of all State-chartered credit unions. In addition, monthly series on major balance sheet items and other information are published in the monthly release, *Credit Union Statistics.* Current and historical data, 1956 to present, are available on request.

Currency.—Currency, including coin and paper money, represents almost one-fourth of all media of exchange in the United States, with most payments made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Statement of United States Currency and Coin*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, except gold and silver coin known to have been exported and, beginning with 1934, all gold coin. It includes all coin and paper money held by the public in the United States, whether in current active use or held idle. It also includes cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers. Historical data on the stock of money and money in circulation appear in the *Statistical Appendix* to the *Annual Report of the Secretary of the Treasury.*

Securities.—A comprehensive series, new corporate securities offerings by type of issues and type of security, has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over $100,000 and with terms to maturity of more than one year. (See table 744.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin,* and the *Survey of Current Business.*

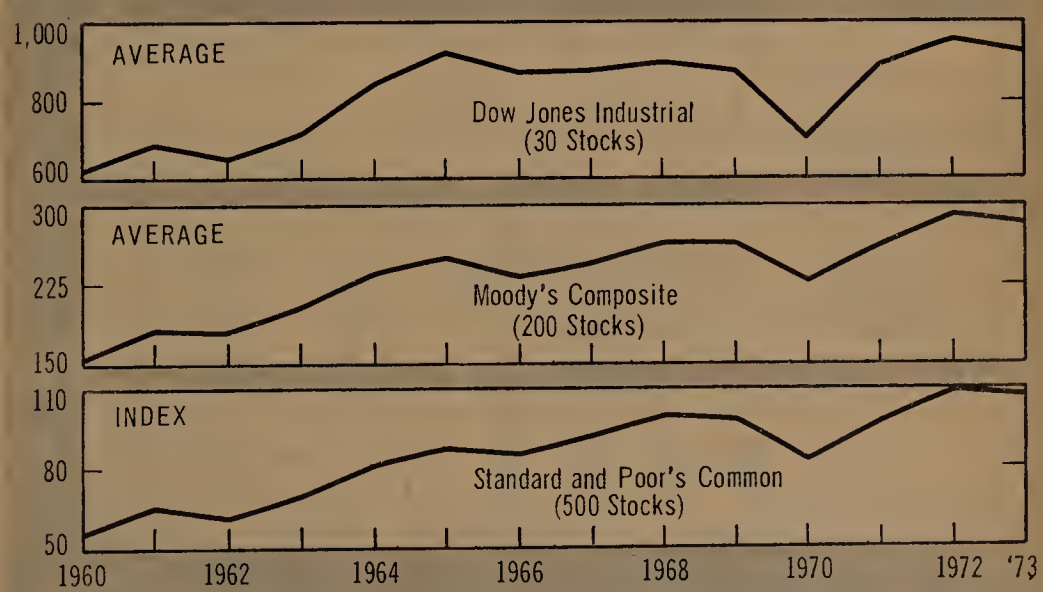
In addition, the Commission has been compiling statistics since 1933 on the net change in outstanding corporate securities through cash transactions. The latter data are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin.*

Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, U.S. Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately. These series appear monthly in the Commission's *Statistical Bulletin.*

A section of the *Annual Report* of the Securities and Exchange Commission is devoted to statistics of the securities industry.

Insurance.—Insuring companies are classified as either life or property. Companies which underwrite accident and health insurance only are included with life insurance; those which underwrite accident and health insurance in addition to one or more property lines are included with property insurance. Insuring companies, other than those classified as life, are permitted to underwrite one or more property lines provided they are so licensed and have the necessary capital and/or surplus.

Insurance is regulated by the various States and the District of Columbia, which collect a great deal of primary information on it. The Federal Government does not collect comprehensive statistics on insurance on a national basis.



commercial publishers, such as The National Underwriter Company and the Alfred M. Best Company. The National Underwriter's *Argus Chart* (annual) contains financial and operating data for individual health and accident insurance companies, including Blue Cross and Blue Shield Plans. The *Argus F.C. & S. Chart* summarizes property and liability business of 924 companies and *Life Reports* provides information on 1,200 leading life insurers. *Best's Life Insurance Reports* and *Best's Insurance Reports*, fire and casualty edition, both annual publications, give individual company data for all types of life and fire and casualty insurance companies.

Public and private debt.—These data appear annually in the May or June issues of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following: (1) the Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the private area, those affiliated corporations which operate under a single management. In the noncorporate private area, data are assumed to be net, since interpersonal debts are not measured in this series.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 722. Federal Reserve System—Member Bank Reserve Requirements: 1972 to 1974

[Percent of deposits. Effective Nov. 9, 1972, a new criterion was adopted to designate reserve cities. The presence of a Federal Reserve Bank or branch or of the head office of a bank having net demand deposits of more than $400 million constitutes designation of that place as a reserve city bank. Any banks, wherever located, having net demand deposits of $400 million or less are considered banks outside of reserve cities and are permitted to maintain reserves at ratios set for banks not in reserve cities]

Effective date of change	Net demand deposits [1]					Time deposits [3]		
	Under $2 million	$2 million to $10 million	$10 million to $100 million	$100 million to $400 million	$400 million [2] and over	Savings	Other time	
							$5 million and under	Over $5 million
1972—Nov. 9	8	10	12	[4] 16½	17½	3	3	5
Nov. 16	8	10	12	13	17½	3	3	5
1973—July 19	8	10½	12½	13½	18	3	3	5
In effect Apr. 30, 1974	8	10½	12½	13½	18	3	3	5

Legal requirements as of Apr. 30, 1974:	Minimum	Maximum
Net demand deposits, reserve city banks	10	22
Net demand deposits, other banks	7	14
Time deposits	3	10

[1] Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks. [2] Reserve city banks. [3] Christmas and vacation club accounts subject to same requirements as savings deposits. [4] Applied only to former reserve city banks for one week. Other banks continued previous requirement of 13 percent.

No. 753. Federal Reserve System—Maximum Interest Rates Payable on Time and Savings Deposits: 1962 to 1974

[**Percent per year.** Maximum rates payable by Federal Reserve member banks; may not exceed maximum rates payable by State banks or trust companies on like deposits under laws of State where member bank is located]

TYPE OF DEPOSIT	Jan. 1962	July 1963	Nov. 1964	Dec. 1965	July 1966	Sept. 1966	Apr. 1968	Jan. 1970–June 1973	July 1973–Jan. 1974
Savings	[1] 4	[1] 4	4	4	4	4	4	4½	5
Multiple maturity:									
90 days or more	[3] 4	[3] 4	[3] 4½	[3] 5½	5	5	5	[2] 5–5¾	[4]
Less than 90 days (30-89 days)					4	4	4	4½	
Single maturity:									
Less than $100,000					5½	5	5	[5] 5–5¾	[6] 5–7¼
$100,000 or more					5½	5½	[7] 5½–6¼	[8] 6¼–7½	[9]

[1] 3½ percent for deposits of less than 12 months maturity.
[2] 5 percent, 90 days to 1 year; 5½ percent, 1 to 2 years; 5¾ percent, 2 years and over.
[3] Prior to July 20, 1966, time deposits other than savings were not segregated as to multiple or single maturity or by denomination. Rates shown for Dec. 1965 are for all maturities of 30 days or more; rates for July 1963 and Nov. 1964 are for deposits with maturities of 90 days or more, and for Jan. 1962 for maturities of 12 months or more; for rates applicable to shorter maturities, see *Annual Report* of the U.S. Board of Governors of the Federal Reserve System, 1970, p. 232.
[4] Effective July 16, 1973, the distinction between single- and multiple-maturity deposits was eliminated.
[5] 5 percent, 30 days to 1 year; 5½ percent, 1 to 2 years; 5¾ percent, 2 years and over.
[6] 5 percent, 30–89 days; 5½ percent 90 days to 1 year; 6 percent, 1 to 2½ years; 6½ percent, 2½ years or more except for 4 year deposits in minimum denominations of $1,000 which had no ceiling between July and November, 1973. Effective November 1, 1973, a ceiling of 7¼ percent was imposed on 4-year deposits.
[7] 5½ percent, 30–59 days; 5¾ percent, 60–89 days; 6 percent, 90–179 days; 6¼ percent, 180 days and over.
[8] 6¼ percent, 30–59 days; 6½ percent, 60–89 days; 6¾ percent, 90–179 days; 7 percent, 180 days to 1 year; 7½ percent, 1 year or more. Effective June 24, 1970, maximum interest rates on maturities of less than 90 days were suspended.
[9] Maximum interest rates on time deposits of $100,000 or more were suspended: Effective June 1970, on maturities of less than 90 days, effective May 1973, on maturities of 90 days or more.

[1] For 1950, average yield on taxable bonds due or callable after 15 years; thereafter, on those due or callable in 10 years or more. Data from Board of Governors of the Federal Reserve System.

[2] For 1950, estimated yields prevailing on highest grade issues in first quarter of year; thereafter, in February only. Through 1955, from National Bureau of Economic Research, New York, N.Y.; thereafter, Scudder, Stevens & Clark, New York, N.Y. [3] More than usually liable to error.

[4] Number of issues as of Sept. 18, 1972; number varies for earlier years.

[5] Yields based on number of stocks and determined from average of median yields as follows: 1950 to 1965 (Sept. 8), 14 stocks, 8 yields; beginning Sept. 9, 1965, 10 stocks, 4 yields. Issues converted to a price equivalent to $100 par and a 7 percent annual dividend before averaging.

[6] Yields are obtained by dividing the average per-share dividend by the average per-share price in each group

No. 760. Securities—New Securities Offered for Sale: 1950 to 1973

[**In millions of dollars.** Estimated gross proceeds derived by multiplying principal amounts or number of units by offering prices, except municipal issues where principal amount is used. Covers substantially all new securities offered for cash sale in United States in amounts over $100,000 and with terms of maturity of more than 1 year. Includes privately placed and publicly offered issues, unregistered issues, and those registered under Securities Act of 1933. See also *Historical Statistics, Colonial Times to 1957*, series X 355, X 359-362, and X 372]

No. 761. Securities—Net Change in Corporate Securities Outstanding: 1950 to 1973

[**In millions of dollars.** Covers estimated cash transactions only. New issues exclude foreign and investment companies, and include sales of securities held by affiliated companies, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements include the same types of issues, and also securities retired with internal funds or with proceeds of issues for that purpose. See *Historical Statistics, Colonial Times to 1957*, series X 363-365, for related but not comparable data]

NA Not available. [1] For 1955, includes $1.9 billion group life insurance for Federal employees.
[2] Includes servicemen's group life insurance of $27.4 billion for 1965, and $16.8 billion for 1970.
[3] The rate is the ratio of the number of policies lapsed or surrendered (for cash, extended term, or reduced paid up insurance), less reinstatements, to the mean number of policies in force.
[4] Total income and payments to policyholders include data on operations of accident and health departments of life insurance companies; since these data are not shown separately, components do not add to totals.
[5] Accidental death benefits included with disability benefits.

Section 17

Business Enterprise

This section relates to the place and behavior of the business firm and of business initiative in the American economy. It includes data on the number and types of businesses; assets and liabilities of corporations; types of business income and expenditures; business sales and inventories; consumer cooperatives; mergers, acquisitions, and business failures.

The principal sources of these data are the *Survey of Current Business* and *The National Income and Product Accounts of the United States, 1929–1965*, published by the Bureau of Economic Analysis (BEA); the *Federal Reserve Bulletin*, issued by the Board of Governors of the Federal Reserve System; the annual *Statistics of Income* reports of the Internal Revenue Service (IRS); *The Failure Record Through (Year)*, issued by Dun & Bradstreet, Inc., New York; and *Fortune* and *The Fortune Directory*, issued by Fortune, New York. Other sources are publications of the Securities and Exchange Commission (SEC), the Federal Trade Commission (FTC), Interstate Commerce Commission, Federal Power Commission, and the Administrative Office of the United States Courts. For a comprehensive list of reports, see "Business" in Appendix III of this book.

Business firms.—A business firm is generally defined as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole. The IRS concept of business firm relates primarily to the legal entity used for tax reporting purposes. (See page 712 for explanation of difference between "firm" or "company" and "establishment.") The IRS *Statistics of Income* reports present data separately for proprietorships, partnerships, and corporations. While a few corporations file consolidated tax returns (i.e., one return for the parent firm and all its subsidiaries), most corporate tax returns represent individual corporations, some of which are affiliated through common ownership or control with other corporations filing separate returns.

Corporate assets and liabilities.—In its annual report, *Statistics of Income, Corporation Income Tax Returns*, the IRS presents balance sheet and income data for all active U.S. corporations. The *Quarterly Financial Report for Manufacturing Corporations*, published by the FTC, presents current quarterly income account and balance sheet data for manufacturing industries. In a quarterly, compilation *Working Capital of U.S. Nonfinancial Corporations*, the SEC publishes data on components of current assets and liabilities of all nonfinancial U.S. corporations. Broker-dealer financial data are detailed in the *Annual Report* of the SEC.

Corporate income, profits, dividends, and taxes.—Several agencies, among them the IRS, the BEA, and the Federal Reserve Board, compile corporate income account data. These data, however, are not comparable because of differing methods of compilation.

The IRS publishes financial data for all business enterprises, based on income tax returns filed by proprietorships, partnerships, and corporations. These data appear in *Statistics of Income—Business Income Tax Returns* and *Corporation Income Tax Returns*. Supplemental reports published periodically present data on foreign income and taxes reported by U.S. corporations.

The corporate data issued by the BEA are a part of its national income and product accounts and are defined as required for purposes of national income estimation. The primary sources of data for the estimates of profits, taxes, dividends, and undistributed

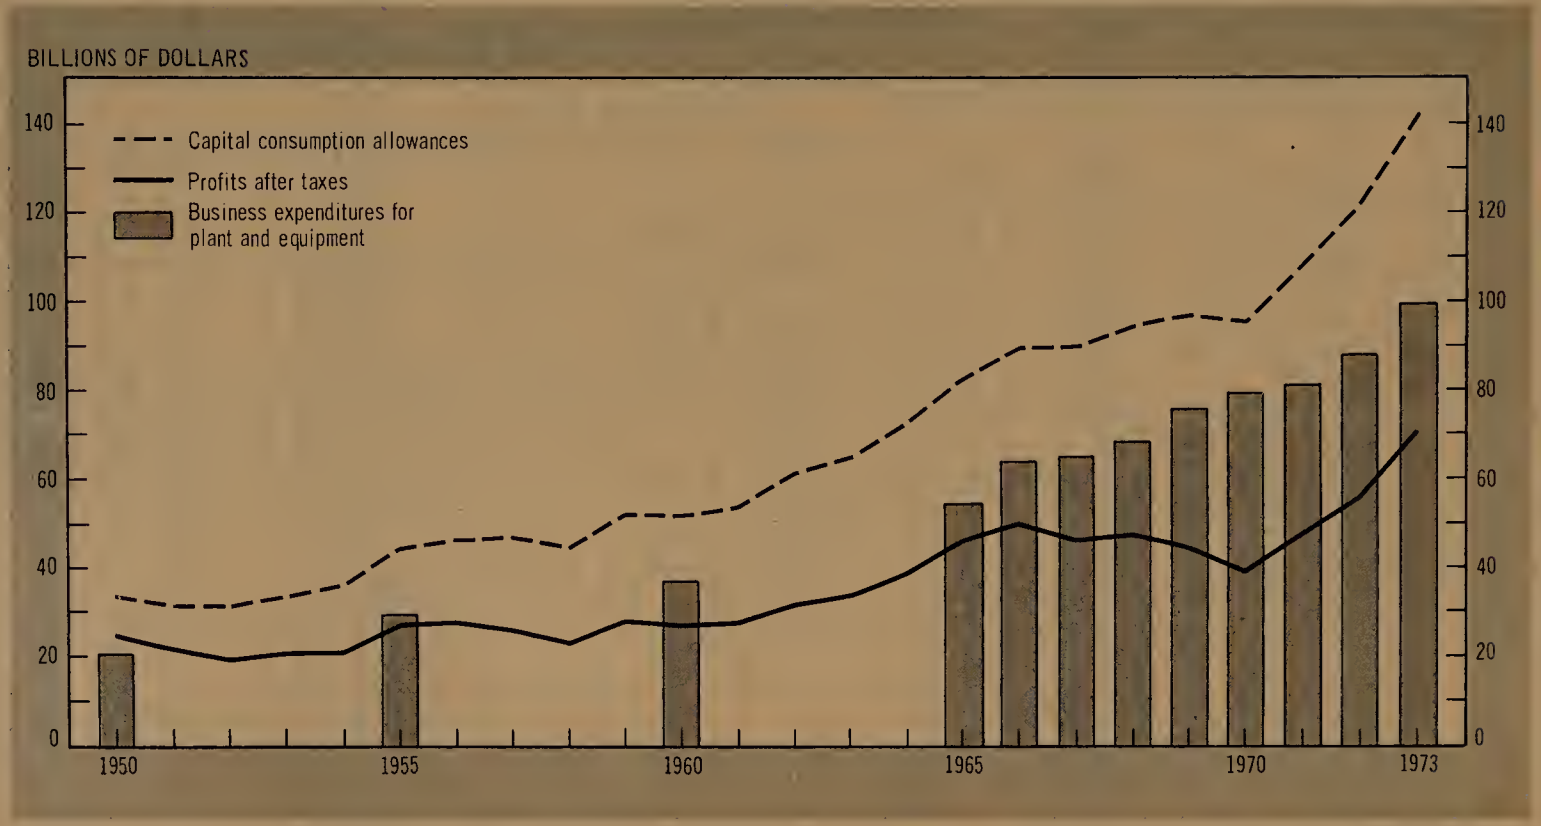
profits are the original corporate tax returns submitted to the IRS. Various adjustments of the *Statistics of Income* data are required by the national income treatment, particularly with respect to depletion, capital gain or loss, treatment of bad debts, measurement of income received from abroad, and intercorporate dividends, and because the original corporate income statements do not represent the final stage of information. BEA's corporate profits data also include the net earnings of several federally sponsored credit agencies which are not included in *Statistics of Income*.

Federal Reserve Board data relating to profits and dividends apply to particular industrial segments only, such as large manufacturing and public utility corporations.

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and the manner in which they are financed. Sources of funds are equal to their uses. Certain discrepancies, however, interfere with this equality due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment, (2) transactions in securities held as permanent investments except public offerings, and (3) net purchases of land. Also, the balance sheet data upon which many of the financial flow estimates are based are not fully comparable with the tax-return based estimates of internal sources, or the establishment series underlying the figures on inventory change.

Business sales and inventories.—Business sales and inventories as defined by the BEA are the sum of data for manufacturing, merchant wholesalers, and retail trade. Sales are estimated aggregate values and inventories are book values at the end of the period. Sales signifies sales or shipments for retail and wholesale trade and billings or shipments for manufacturing. Trade inventories are valued at cost of merchandise on hand, while manufacturers' inventories are valued at approximate current costs or at book values, as reported by the manufacturer. Inventories data for manufacturing (see tables 789 and 790) are based on data from the *Census of Manufactures* and the *Annual Survey of Manufactures*.

To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios or current prices to base year prices. Change in farm inventories is estimated by the Department of Agriculture from physical quantity data; therefore, no inventory valuation adjustment is shown.



Plant and equipment expenditures.—A survey by the BEA presents quarterly data on actual and expected plant and equipment expenditures. In addition, at the end of each year, a survey is made of plans of business regarding capital expenditures during the next year. The data are based on reports submitted by transportation companies under Interstate Commerce Commission jurisdiction and by a large sample of other companies reporting to the Department of Commerce.

Industrial and commercial failures.—These data, collected by Dun & Bradstreet, are available by years since 1857 and by months since 1900. The number of failures includes concerns involved in court proceedings or voluntary actions likely to end in loss to creditors; discontinuances with outside obligations paid in full are not included. Data cover manufacturers, wholesalers, retailers, building contractors, and certain types of commercial service, but do not encompass finance, insurance, and real estate companies; railroads and steamship lines; and amusement enterprises. Failures data are published monthly in the monthly Failure Report by the Business Economics Department of Dun & Bradstreet, Inc.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XXX. BUSINESS OUTLAYS, PROFITS AFTER TAXES, AND CAPITAL CONSUMPTION ALLOWANCES: 1950 TO 1973
